Sept. 30, 65

Dear Sirs,

I am writing in regards to Mr. [redacted] statement on what he saw on Monday Sept. 27 th. Which I read about in the record(Times Herald, Milltetown) of Sept. 29 th.

My son who is on the Ellenville police force and his partner of that shift stopped on their rounds patrolling the streets and asked my older son and I what we were doing outside on that time of night (9:30) in the cold. We told him that we were looking at some flying objects in the sky, and one of them had just passed over our heads and he said that it was probably Telestar which goes over at about 8:50 and 9:00 every night. But it was not because I had seen Telestar go over about 9:30 and this came from the South west, and went Northeast.

While we were standing and talking we were looking to the west at somethin with flashing lights, we saw this bright green flash of light go down behind the hill in the direction of Oak Ridge. He yelled did you see that? And every one that was with us looked in that direction and we saw what appeared to be a very large explosion that lit up the whole side of the hill. My son and I are the only ones that saw this green flash before the explosion, and there was no sound. In my 49 years I have seen a lot of falling stars but never bright green like this.

Getting back to the object that went over our heads, I would say it was between 5 & 8,000 feet up. It had flashing red and green lights which were rotating clockwise, and a large amber light in the center which did not move. The red and green lights were the size of nickels, and the amber light was larger, but not much. It was perfectly silent, and looked to be round from the way the lights were moving around it. At a rough estimate I would say it was about 2 feet across, and as far as color, I could not see any. It was travelling from South to North. I watched it approach me, and go as far as I could see it. I listened very carefully, for sound, but there was none at all. I also saw two more, but they were off in the distance, I would say over Napanoch. They went from East to West...Still no sound. We, my older son and I, saw three objects to the south, about over the Nevels (a Motell R.V.). All we could see of them were flashing red and green lights. But what made them different was the fact that they would go alittle way and stop and go back, like snapping your fingers. Still no sound.

Now if this operations officer from Stewart Air Force Base can tell me we have silent plauses, and also plauses that can stop in mid air, and change course, then that is what they were.

I do not believe in flying saucers, or science fiction, and all that kind of type, so I suggest the government tell the people what they are doing, or just tell us that they are doin something, and cut out all this mystery.

Very Truly Yours,

Mr. [redacted]

Ellenville, N.Y.
