10. BRIEF SUMMARY OF SIGHTING

UFO's being reported by air crews in Golden Spur area (Northern Spain) during the West to East run on night missions. Visual sightings of red, green or white lights, steady or blinking. Motion includes following the a/c and horizontal motion, astern to right or left and/or changing altitudes.

11. COMMENTS

Insufficient data for analysis, however all objects have been in West (Astern of a/c on flights to East) and are reported as lights. No configurations noted and no mention of disappearance. Very likely objects under observation are the planets Venus or Jupiter.

On the 14 February to 13 March cases in Spain - can we get more information, or is this completely dead by now? Very likely these were Venus and Jupiter, but I would like to see at least one of the original reports.

OK VENUS + JUPITER HYNEK
