Dear Sirs,

I hope you will give this sighting some consideration, even though I am 15 years old.

On March 31, 1967 between 10:45 and 11:00 E.S.T. someone called my father and said "Do you have a red light moving over your house"?. A look outside showed a light moving slowly from west to east. No noise was heard. My father, brother, and I watched it until it could not be seen. The light gave a very bright red. The light did not seem to blink, but rather it pulsated. Gradually the light got dimmer until it faded away. I waited for it to reappear but I did not see it again that night. But someone else did. The next day another person told us that she thought it was a helicopter, but she also heard no noise. She stayed out longer than I did. She says that it did reappear and when it did, it did blink. At no time did illuminate anything else in the sky. The two persons that saw the object besides myself were Richard Burnell and Helen Ziegler.

For three nights between 9:00 and 10:00 getting to it's earliest at 8:00, I saw the same or similar object that looked like night identification lights on an object & could not see. The lights were blinking. I would have been convinced it was a plane, but it went at a east to west direction, stopped and went backwards once it went south and disappeared on April 1, 1967 between 9: and 10:00. The night after that it did not go south, but it did everything else at 8:00. Please investigate this object.

Sincerely

f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	(Yes)	No	Don't know
h. Disappear and reappear?	(Yes)	No	Don't know

14. Did the object disappear while you were watching it? If so, how? 1 Moved away fast
2 Flashed until light went out
3 Went down to ground (but did not see land)

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: trees as it went down

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

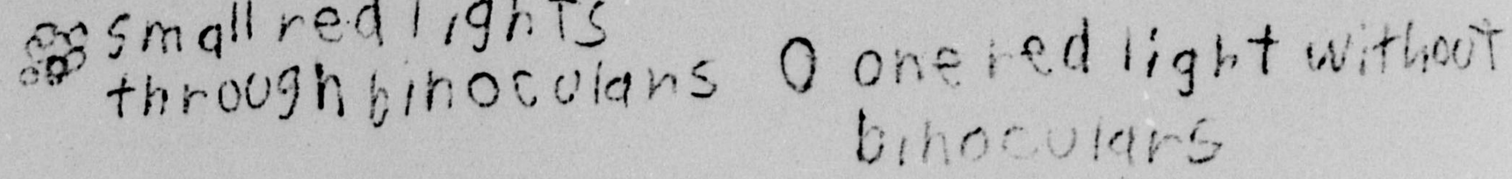
a. Sound No sound

b. Color Very bright red

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? All of the object

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.



20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c.) In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

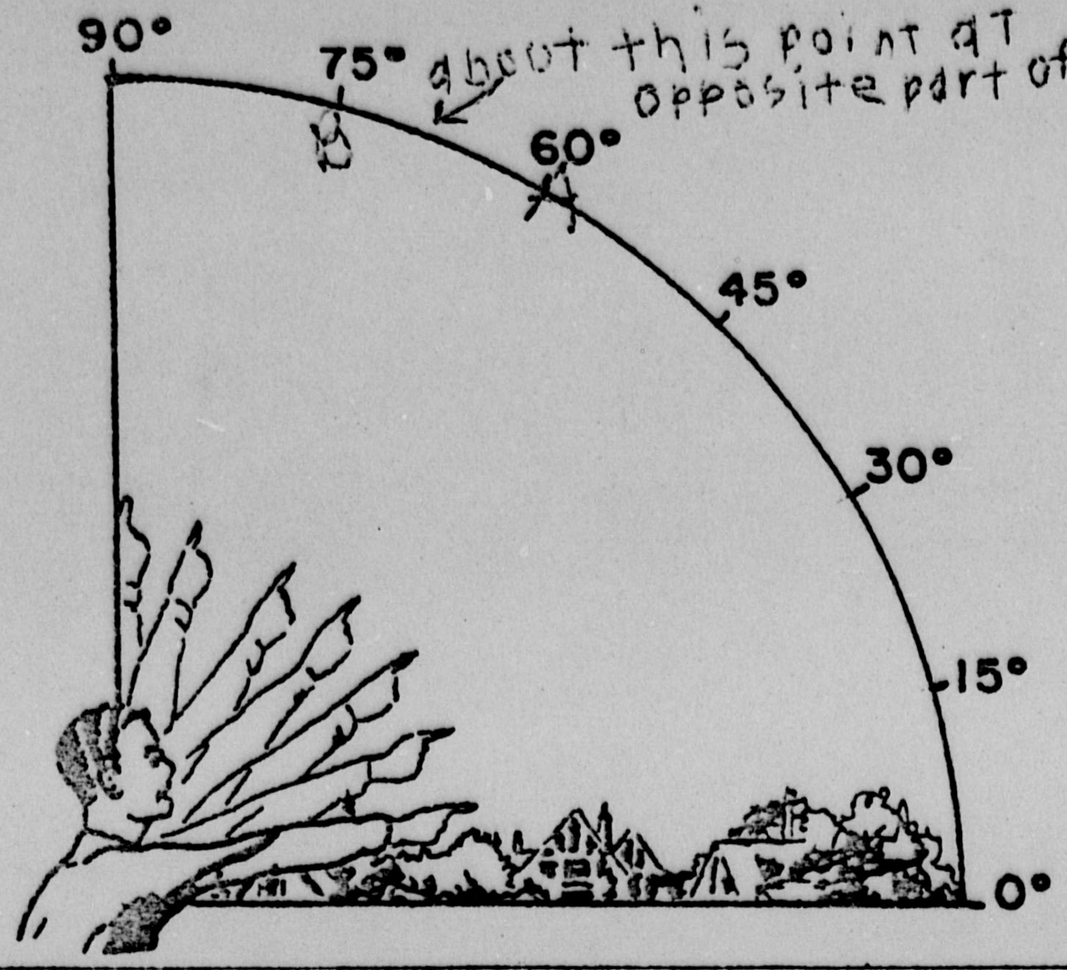
25. Did you observe the object through any of the following?

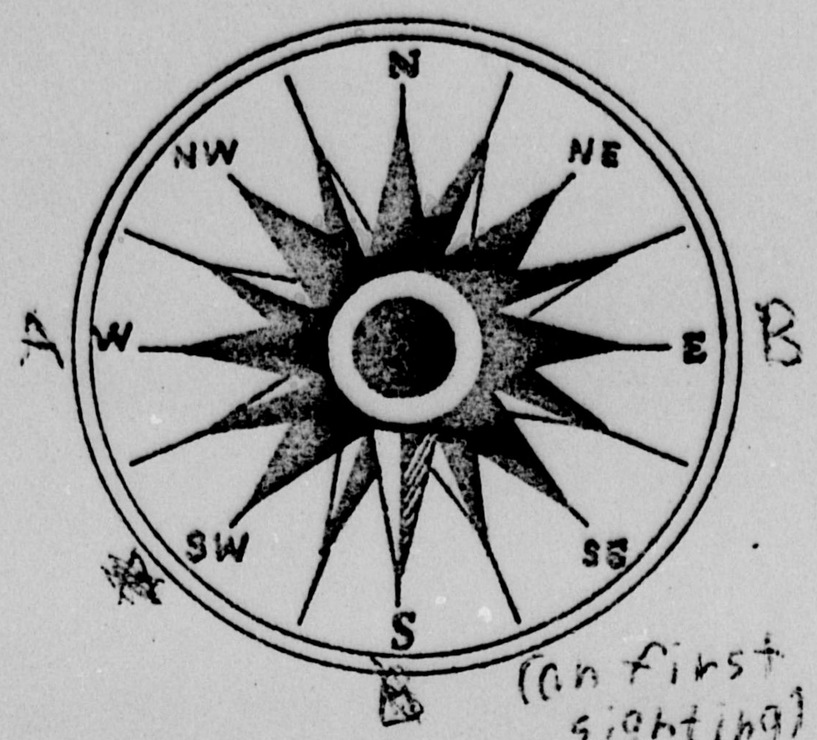
a. Eyeglasses	(Yes)	No	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The object looked like a plane with one red night flying light on at first. o then time it looked like a radio tower beacon beacon light in the sky.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object? other than my family; only to you.

_____ (Day) _____ (Month) _____ (Year)

34. Date you completed this questionnaire: 16 (Day) April (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

On March 31, 1967 I saw the object for the first time. It was a very bright red moving in a west to east direction. It stopped and started flashing until the light went out. But later, Helen Ziegler, said she saw it before and after it disappeared. When it came back into sight she said it was still blinking and going twice as fast. No sound was heard by anyone at any sighting. Time 10:45.

On April 1, the object was moving in a east to west direction. The object stopped and started going back from where it came, but it then turned and went south & watched it until out of sight. Time; between 10:00 and 10:30.

On April 2, the object was going in a east to west direction, stopped and went back until out of sight Time: 8:00 (object flashing at all times).

The object was not seen until April 3
(It may have been the same or similar object)
On April 3, the object was hovering the western sky. I looked at it through binoculars, just after I did, it started blinking. I saw that the object was made up of seven small red lights blinking at the same times. Then the object went toward the ground, but I did not see it land because it was behind trees. Time 9:30

On April 9, the object was hovering and blinking in the western sky, then the object went south, until out of sight. Time 10:00. I have never seen it again.

I live in Bethdale Pennsylvania. I'm president of the Swedtown UFO club. I have seen the UFO's in two years but can't take any pictures of the UFO's because I don't have a camera that takes pictures in the dark. Sports and astronomy is my hobby. I like to be a sports broadcaster. Me and my friend Jim Oliver who is now serving in the Navy took a walk in the Jacobs Creek dumps. We went into the deepest part of the dump when all of a sudden we heard big. Claps like foot steps coming in back of us we started running and never went into the creek in the lightning again. I have seen other sightings like the one time me and [redacted] were on a hill grade when all of a sudden a green red and white light stopped in mid air then it let a little and disappeared in about

Western Skies. Friday March 24th, 1967.

Observed at 7:57 P.M. As big and bright as a large bright light. Lower than a low flying airplane and could see it like it was just above my neighbor's roof. (about 25° angle) Saw it for about 2 minutes, ran for the binoculars got right back to the window and it had already moved up and further away. to about 40° angle to my right still rocking up and down, back and forth. and had beautiful hues of green, blue and red. I called the State Police and gave him a discription of what I saw. however, gave him the wrong direction in which I was watching. This was at the left of the tower, and not to my left. At the time, I did not know this, but the tower I was actually seeing is the new Norwich Television Tower in Bozrah. and not the one on Radio Hill (Radio Tower.) like I thought. Therefore, I probably misled the Officer by telling him I could see this U.F.O. in the vicinity of Uncasville & Montville. Went back to the window, by that time, my daughter and 2 boys were also seeing this. My husband gets home from a fishing trip. He also took a look through the binoculars, and agreed that it looked like something else than a star but was not interested enough to watch any longer. Finally it

I have checked with the control
tower at Douglas Airport here and
there are clouds or an overcast at
8,000 feet with visibility of 7 miles.
I was told by the tower that a
similar occurance was reported
last night, 3-26-67, about the same
time and was seen in Charlotte
by four people. Also the same
night a report came from Hickory,
N.C. about the same object.
Evidentally this was a meteriate

If at all possible I would
like a reply to this report.

This object looked like a yellow light bulb which was brighter than and bigger than surrounding stars. The color caught my eye at first. After several seconds it seemed to explode into three objects with the other two objects red and green. The green object fell like the back end of a rocket. The red object went up and for a few moments the yellow object appeared to stay stationary then drop a few degrees then move forward and burn out. Proposed reply to letter from [redacted] Aug 2, 67 (Sightings Mar 29 & May 10,67)

Dear Mr [redacted]

Reference your recent letter in which you reported your unidentified observations of March 29 and May 10, 1967.

With the information submitted, it would be extremely difficult to offer much of an explanation. Essential data such as flight characteristics, maneuvers, etc., are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The local UFO investigator is in a far better position to conduct an on-the-spot investigation. Your nearest military installation is:

910 Troop Carrier Group
Youngstown Municipal Airport
Vienna, Ohio 44472
phone: area code 216; 374-1551 ext 258

The information on your unidentified observations will be added to our present data base.

The inclosed information on Project Blue Book may be of interest to you. Thank you for reporting your observation to the AirForce.

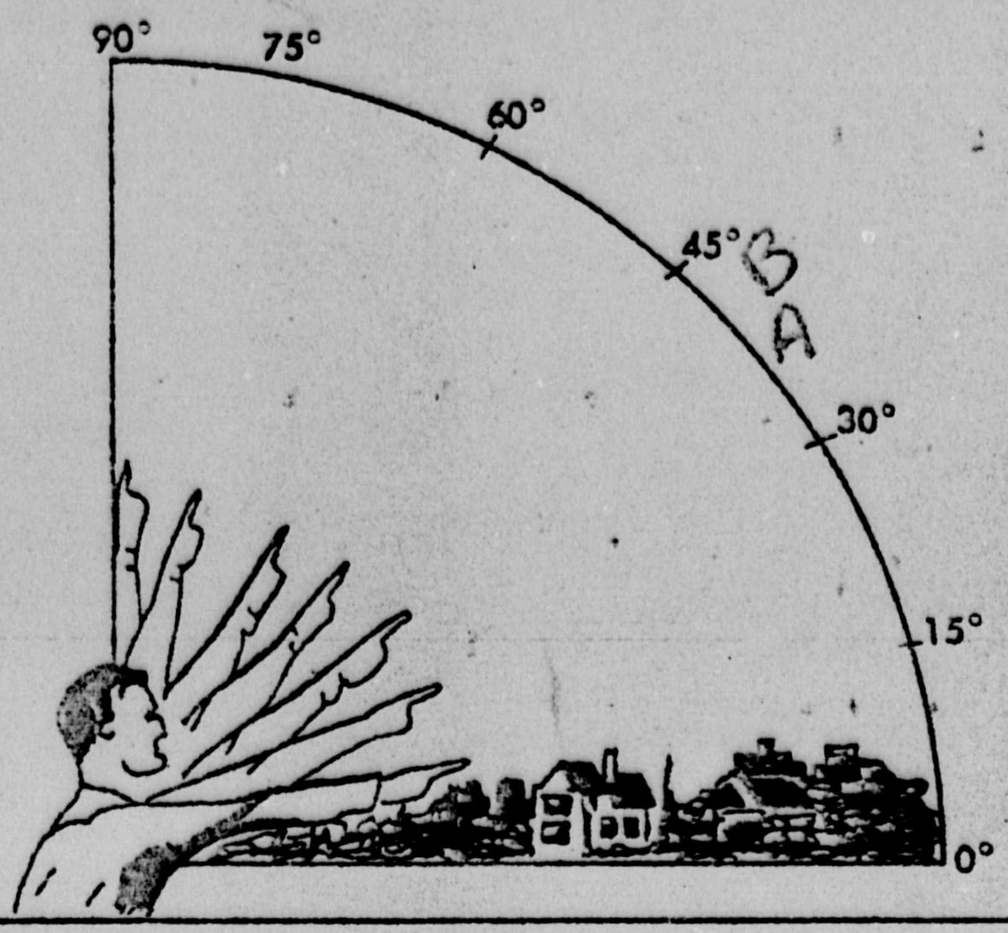
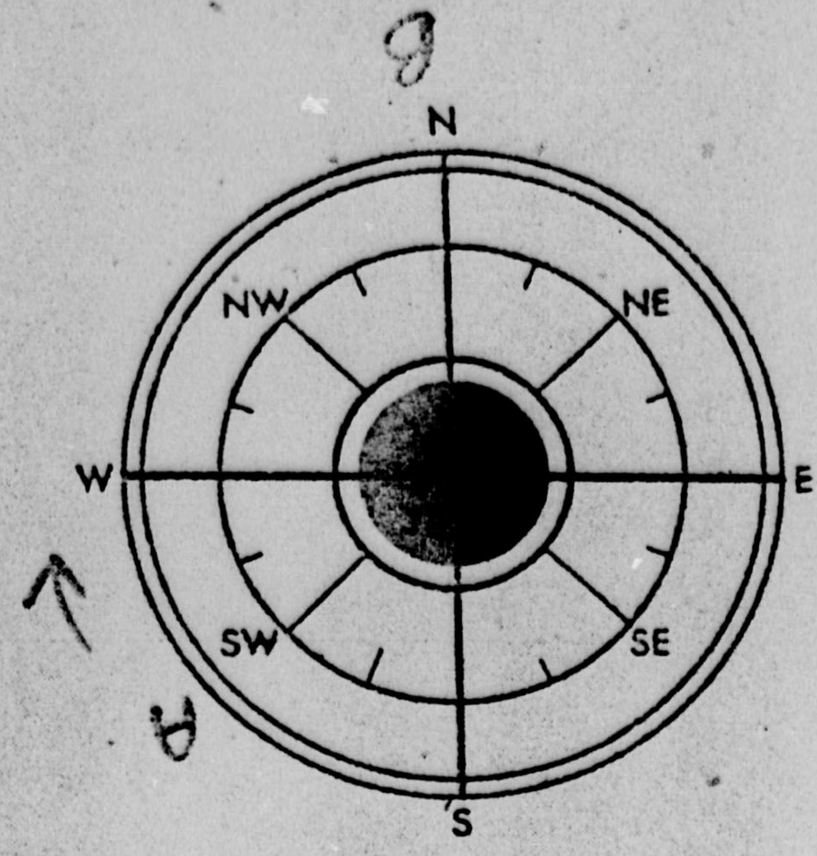
27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

A'-B' is motion towards me. motion was almost entirely horizontal

29. IF there was MORE THAN ONE object, then how many were there? 4
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

They would occasionly pair off and move in different horizontal directions. Sometimes towards me.

I have talked to four other people who saw similar objects on that night at the same time but they were not with me. I also saw these objects on 3/30/67 and 3/31/67. I am not given to hallucinations and was very much surprised to see these objects. I had the uneasy feeling, while watching these objects, that I was being watched myself.

The objects usually moved in pairs and two of them came close enough to town (Crookstville) that I could see the shape. But they were usually too
