Sighting of [redacted] 2 July 67

Rec at TD [redacted]/UFO in Jan 68

At 3:00 P.M. Central Daylight time, on July 2, 1967 I was watching a baseball game at the Twins Stadium in St. Paul, Minnesota. It was a cloudy-partly cloudy day, with ~~rain~~ clouds, scattered with alto-cumulus. I was thinking of how I had read that bright lights, like those there, could produce after-images in the eye. I was testing ~~it~~ this; and it worked with only faint images. These disappearing, I looked back & saw a fighter jet go over just south ~~[illegible]~~ of the field. Excited by my thinking of UFOs, I looked up and found I was looking at a flying saucer over ~~to~~ the ~~[illegible]~~ press box west of the ball park. Watching it fly SW to NE ~~[illegible]~~ about like the speed of a prop airplane at that height. It passed over the lights (always at a constant speed, not moving with my eyes) and ~~to~~ toward the low cloud. I just barely went over the cloud and was obscured to me for its journey across the cloud, about 3 sec. It came out and then climbed very fast, disappearing into the heavens. I was so absorbed in it I didn't call my cousin's attention to it, and I should have. The others didn't believe it, but my mother did, since she doesn't doubt my honesty and believes in UFOs, like ~~my~~ I do.

It was bright metallic in color and was not an after image of the field lights, since I ~~have~~ had tested this. It was definitely round.

If it were 2:00 or 4:00 it could be a balloon, but weather stations don't launch them at 3:00. (I don't think...?)

It was moving against the wind, which was a north wind.

While moving laterally it was a disc viewed from side. When it ascended, it tilted upward to get a bottom view.

There was no sound, so as

There were 2 cloud layers. It went over the upper one which was almost non-moving. The lower clouds were very fast.

Dear Sirs in Project Blue Book,

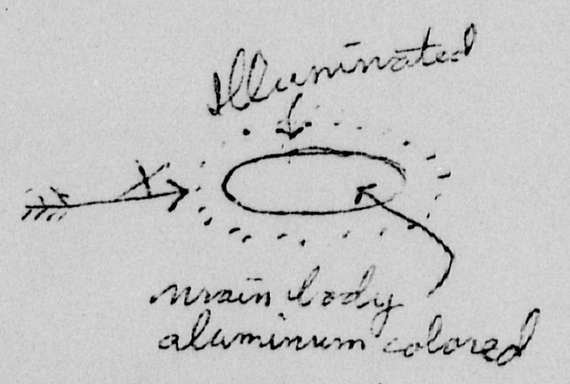
The last time I wrote you I mentioned a couple of sightings. I must add details to one, as I wasn't able to get them on the other. I am a legal member (new) of APRO. I don't have much faith in your investigation methods, but here are two sightings anyway.

Subject and witness [redacted]

During my interview with him he said it ~~would~~ happened 10-12 yrs. ago. This would be ~~of~~ 1955-1957

He says: "I was about the altitude of the saucer when my wife and I saw it glide across the road about a quarter of a mile away. Another party at Ray by name of Eilander saw it the same night. Eilander was under it and it looked like a saucer to him. I was on the highest point of the county road in this neighborhood. few stars... moon was overhead... it was about 10:30 p.m. It looked like aluminum as if a flood light was turned on it. The space around it was sort of illuminated same shape as the main body of the UFO (to the dots in illustration marked "x")

It traveled north no noise.



Mr Melheim is a retired lawyer who came to America from Norway. He raised reindeer as a side-line when younger. He is well-educated. He is in his seventies and lives on the shore of Lake Kabetogama near Ray, Minn.

Reply, please.

Sincerly, Greg Watts

P.S. over-found other report.
