The driver of the second car came back to our car and stated that he had been watching these lights and had never seen anything like it before. These lights over the highway appeared to be 1000 feet and on a vertical plane. Two of the lights were green and the third light was red, forming a triangle. There were three of these triangles in the group over the highway, making one large triangle. We looked to the east of Highway 81 and could see another triangle. We saw three lights approximately three to five hundred yards to the east, and to the west we noticed three to four groups of lights arranged in the same manner. These lights appeared to be five to seven hundred yards to the west of the main group over the highway. We stood outside the car and observed these lights, which were stationary at first. After a short while we noticed that the group of lights over the highway began moving north in the direction of Fort Worth, Texas and we estimated the speed of these lights to be 100 miles per hour or less. The two green lights appeared to be moving to the north followed by the red light. We looked at the group of lights in the east. They had also started to move north toward Fort Worth. The group of lights on the west appeared to be moving toward Fort Worth, but traveling at a speed of approximately twice that of the group over the highway. We noticed that the group of lights to the east of the highway and to the west of the highway appeared to be on a horizontal plane. These lights did not blink and resembled the lights on a water tower or radio antenna. As these lights moved away a sound resembling an outboard motor trolling in the distance could be heard. We observed these lights for approximately five minutes and from our observation, agreed that the distance between the lights in each of the smaller triangles was ten to fifteen feet. Knowing that several air fields were in the vicinity of our location, we did not introduce ourselves to the man in the other car but drove on toward Waco. The other automobile was a 1946 or 1948 Plymouth coupe with a National Guard tag on the rear license plate. This person stated to us that he was just coming from a National Guard meeting. We noticed that shortly after driving off, the National Guardsman turned to the left off the main highway and therefore, we assumed that he lived in that immediate vicinity. We had been in Fort Worth on business and had not touched as much as one bottle of beer."

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

The following report of an unidentified flying object has been received from the Commanding Officer, Wright-Patterson Flight Service Center, Dayton, Ohio, who in turn received the data from the Cincinnati Air Route Traffic Control Center.

a. Sighting: An unidentified aerial object was sighted traveling northwest to southeast from as far north as Lexington, Kentucky and as far south as Atlanta, Georgia, with the center sightings mostly around Corbin, Kentucky. The date and time of sightings was between 2229E 11 January 1951 and 0415E 12 January 1951.

b. Weather: Twenty-five thousand thin scattered, visibility 1/4 to 3/4 of a mile with ground fog.

c. Witnesses: Mr. [redacted], Airport Guard, Lexington, Kentucky; Mr. [redacted], c/o L & N Railroad, Corbin, Kentucky; Mr. [redacted], Radio Station WCTT, Corbin, Kentucky; Mr. [redacted], c/o Corbin Police Department, Corbin, Kentucky.

d. Description: The witnesses did not describe the sighting as an object but more as a flash moving northwest to southeast, therefore, no information on the shape, size, color or maneuverability was given. One witness, a truck driver at Harrodsburg, Kentucky, estimated the altitude as 1000 feet above the horizon. There were reports of severe shock waves at Corbin, Kentucky with less severe ones at Lexington, Kentucky and Atlanta, Georgia.

e. Photograph or sketches: None made.
