Date of sighting: 15 May 1952
2. A brief description of the sighted object or objects:  
Shape: Appeared spherical and at one time when it was climbing it looked like it was flat  
Size: Estimated 50 feet in diameter  
Color: Silvery Color  
Number of objects: One  
Trail or exhaust: None noted  
Propulsion system: Not noted  
Estimated speed: 1000 MPH  
Aerodynamic features: None noted.  
Any unusual maneuvers: Moved horizontail for approximately 4 seconds until 90° from pilot's wing, it went into steep climb and then continued on and went into a shallow descent until lost in the haze.  
Formation if more than one: None  
Any other pertinent or other unusual features: The object appeared to leave its own source of light and was very bright.
3. Manner of observation; Visual or electronic: Visual  
From air or surface: Air  
Course: 180° heading  
Altitude: 9000 feet  
Type of reporting aircraft: F-51 Ftr Bmr - Speed - 240 MPH  
Any type of optical or electronic equipment used should be described: None  
If radar, the type and whether it was functioning normally before and after the incident: None  
Location of observer during the sighting: CT 8000  
Latitude: Unknown  
Longitude: Unknown  
Location of object relative to observer, giving distance: 1 o'clock position approximately 1-1½ in front  
Direction: Heading east and then north  
Altitude: Approximately same as aircraft  
Identifying information on observer and witnesses, estimate of reliability and experience and any factor bearing on the estimated reliability of the sighting:  
[REDACTED], Pilot, 18th Ftr Bmr Gp. 2 combat missions completed present tour. Flew 76 combat missions in ETO WWII. Appears very reliable.  
Weather and wind condition at time of sighting: Up to 7000-8000 feet, Hazy, above this it was very clear and is where the object was first seen until lost in haze.  
If sighting was by electronic methods a statement whether any attempt to visually sight the object was made: None  
Any activity or conditions meteorological or other wise which might account for the sighting: None
4. Remarks: None Pilot's statement inclosed

COMMENTS OF REPORTING OFFICER:

Capt [REDACTED] at time of observation called it in as a bogey to his flight but his transmission was weak and was not heard by the others in the flight. It wasn't until after they had landed and were discussing the object that either observer knew that the other one had seen it. The two observations were made separately without being called to their attention at the time seen.

## STATEMENT

15 May 1952

Returning from target area May 15, 1952 I was flying number four position. At approximately 1835 hour I first sighted this object. Our altitude was 9000 feet. First sighted object at about one o'clock position from our flight. By the time I called the object in as a bogie, it had moved to the three o'clock position and started a steep climb, which I assumed was the beginning of a loop, but at the vertical position in the loop, the object moved forward in its original course of travel (360°) and wavered momentarily and then descended and disappeared into the haze which reached an altitude of approximately 7000-8000 feet.

12. Extracted from FEAF "Intsum" #717, dtd 0320/Z, 13 June 1952:

Enemy balloons: Recently several reports have been received concerning the sighting of an unidentified object in the air having a primary color of white changing to red, then to green, and located in the area of DT 204398. These observations were made on 10 May and on 4, 6, and 7 June between the hours of 2102/I and 2400/I. In the majority of cases the object was described as being egg shaped or round, at an altitude estimated between 1000 ft and 10,000 feet, and in one case it was reported to have moved very rapidly horizontally for a distance. This movement was observed through a battery commander's scope and measured for 10 miles of travel, but the operator reported that he could not traverse fast enough to keep on target. This object was observed on 7 June for 1 hour and 5 minutes by a trained Air Technical Intelligence specialist and an ordnance Technical Intelligence specialist. As a result of these observations, a forward observer investigated the area at 091445/I June and saw a balloon being raised and lowered on a cable. D/I FEAF Comment: Most of the previous sightings of unidentified objects have occurred in the CT and DT grid areas. The high horizontal speed of the one sighting could be accounted for by a free balloon caught in a horizontal draft in the mountainous areas of that sector. The purpose of raising and lowering a balloon so near the front lines is not apparent, but could possibly be a method of communication.

## 6. Extracted from Fifth Air Force "Perintrep", 19 May 1952:

Balloon sightings: At 160210-I, vicinity of CT 4035, an F-94 crew observed a balloon approximately 3 feet in diameter. Observation was made by means of a small light suspended from the balloon. The balloon was first observed at 13000 feet and the F-94 followed to 24000 feet. Estimated rate of climb of balloon was 2000 ft/min, as the F-94 had to use afterburner in the chase. The balloon was shot down over CT 4016. At 160353-I, vicinity CT 2828, an F-94 crew again observed a balloon, this time at 12000 feet. Again by means of a steady burning light suspended from the 3 to 6 feet diameter balloon. Friendly pursued the balloon using afterburner, shooting it down at CT 4010. The white light, described as "Very powerful," was still burning as the balloon fell. D/I Comment (5th AF) - Further investigation is being made by the 6004th AISS.

a. Comment - This report of lighted balloons may be a basis of explanation for many of the sightings reported over this area of Korea.
