AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 3 PAGES
Wing Intelligence, Moody AFB, Ga	IR-1-52	0030 4

1. At approximately 0030 hours to 0128 hours on 24 July 1952, SOURCE stated that he observed one (1) of three (3) objects in the form of a very brilliant light, more brilliant than a star. The shape and size of the three (3) objects was not determined. The first object appeared white in color, then changed to a brilliant hue of red, then to blue-white, and back again to white. The interval between color changes was approximately one (1) second. A total of three (3) objects were observed. No particular formation was performed by these objects. SOURCE could not determine the aerodynamic features. No trail or exhaust was observed, and the propulsion system could not be determined. SOURCE could not estimate the speed of the objects, however, he stated the speed at which they traveled was extremely high. No sound was emitted from them. After the initial change of coloring as mentioned, the first object proceeded in an upward direction and then descended to a much lower altitude. It hovered at this point, then darted in circles, proceeded again in an upward course, descended again and disappeared in a westerly direction. The object maintained its original bright glow while disappearing. SOURCE observed the above mentioned maneuvers for approximately seven (7) minutes. SOURCE stated that no further objects were observed until approximately 0135 hours, when two (2) much dimmer lights appeared and performed gyrations while traversing in a parallel course in a south southwest direction. No changing of coloring was observed, however, on one (1) occasion at approximately 0137 hours, a white flash appeared between the two (2) objects which were then performing gyrations. The distance between the two (2) objects could not be determined. The objects disappeared at approximately 0140 hours while traversing in the above described manner in a westerly direction. SOURCE had no further information.

2. The above sightings were observed from approximately 0030 hours to 0140 hours (one (1) hour and ten (10) minutes) on 24 July 1952.

3. SOURCE observed the objects visually.

4. Point of observation was approximately two (2) city blocks west of the eastern city limits of Lakeland, Georgia. (Latitude: 31 03 N-Longitude: 83 03 W). SOURCE estimated the distance of the objects to be at least fifty (50) miles away from him in a west southwest direction. The first object was estimated by the SOURCE to be at an altitude of approximately fifty thousand (50,000) feet; the second and third objects at an altitude of approximately thirty thousand (30,000) feet.

5. SOURCE, a high school graduate, with eleven (11) years of service in the United States Air Force, has flown forty-seven (47) missions as a flight engineer in B-25 type aircraft during World War II, and twenty-three (23) missions as a gunner in B-26 type aircraft during his tour of duty in Korea. Approximately three (3) years were spent on flying status. SOURCE is a graduate of the Air Force Jet Mechanic School; is a Mechanical & Electrical Instrument Specialist; attended DeForrest Radio Institute (did not graduate); on-the-job training as an aircraft mechanic. SOURCE could not offer any additional information pertaining to his background knowledge and practical experience on which his reliability can be judged. SOURCE stated that the objects which he observed, did not, in any way resemble any type aircraft of which he had knowledge or practical experience.

NOTE: THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U. S. C.—31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. IT MAY NOT BE REPRODUCED IN WHOLE OR IN PART, BY OTHER THAN UNITED STATES AIR FORCE AGENCIES, EXCEPT BY PERMISSION OF THE DIRECTOR OF INTELLIGENCE, USAF.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)

REPORT NO.

Hq Pacific Division, MATS, Hickam AFB, T. H. IR-538-52

PAGE 2 OF 3 PAGES

1. Observer: Technical Sergeant T. B. Mezo, AF 16 040 992, 1501st Maintenance Squadron.

a. Sgt Mezo was the first man apparently to observe the unidentified object. He states that at first he thought it was an aircraft landing or taking off from Travis. It was a very bright light such as one might see if an Aldis Lamp were pointed at the observer from approximately one mile. It was almost orange in color. After watching it for an estimated thirty seconds, he called several of the other men on duty to come out and take a look. He states that at first it seemed to be at an estimated five degrees above the horizon and the only apparent motion that it had was the appearance of moving directly away from the field. It almost seemed to hover, until it made a fairly slow turn to the right (West) and after finishing the turn moved off at a very fast rate of speed until it disappeared. The object seemed to remain at the same altitude during the entire time of observation. The object, as observed, seemed to be a well defined object and definitely not a reflection of light such as that which might be made by a rotating beacon or other light in the area. Sgt Mezo and the other personnel interrogated all mutually agreed that the unidentified object observed, although it had some characteristics of natural phenomena, was peculiar in its behavior and not like anything they had ever seen before. The object had the same appearance after turning and disappearing into the West as it had while apparently moving directly away from the observers. This would seem to indicate that it was not the identification light on an aircraft or the tail blast of a jet aircraft.

2. Observer: Mr. [REDACTED], Civilian Electrician.

a. Observed unidentified object at approximately 2215 hours, 24 July (PDST). Object described to be similar to large star, reddish in color. Object seemed to be moving away from the observer in a south south westerly direction at estimated ten to twelve miles. After observing object in this manner it turned at a very fast rate of speed and moved almost directly west until it disappeared from view. Object estimated to be 15 degrees above the horizon. Weather very clear at time of sighting with no cloud layers. The reddish core of the object had a glow extending around the circumference, giving the effect of a halo. The object was described to be unlike anything ever seen before, such as aircraft identification light or flare. No sound was heard.

3. Observer: Master Sergeant L. E. Hanson, AF 16 005 726, 1501st Maintenance Squadron.

a. Sgt Hanson's attention was called to the object when observed by Technical Sergeant Mezo. He came out of the alert shack and observed a bright reddish orange object in the sky at an estimated fifteen to twenty degrees above the horizon. He looked at his watch and noted that it was 2215 hours (PDST) 24 July. He watched the object for three to four minutes as it seemed to hover in the sky an unknown distance to the south of Travis AFB. The object seemed to have lateral rays extending to each side of it, not as bright as the center core. He called to man on duty inside the alert shack to call the Travis Control Tower to confirm the observation, however, the man was busy and failed to do so. After this apparent time of hovering, the object turned off to the right (West) and moved off at a very fast rate of speed until it completely disappeared. In comparing the size of the object, say to a star, it was much larger and brighter, and was unlike anything Sgt Hanson had ever observed previously. For purposes of comparison, if a star was considered to be a pin-point of light, the object observed was the size of a grapefruit. After the object turned off to the west, it was observed for approximately one minute, during which time it traveled an estimated forty-five degrees of azimuth from the point of observation.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	3	OF	3	PAGES
Hq Pacific Division, MATS, Hickam AFB, T. H.	IR-538-52					

After the object started turning, it seemed to decrease in size fairly rapidly, apparently due to a very fast rate of speed. The weather was clear at the time of sighting.

4. Observer: Staff Sergeant D. C. Steen, AF 19 356 301, 1501st Maintenance Squadron.

a. Sgt Steen's attention was called to the unidentified object in the sky and he describes it as follows: It was a reddish orange, circular body with a glow not quite as bright as the center core; apparently just stationary in the sky an unknown distance to the south of the field. It stayed in this position for an estimated two to three minutes and then started moving off to the right (West). In contrast to Mr. [redacted] and Sgt Hanson's report, Sgt Steen did not estimate the rate of speed to be very fast in the turn, however, he did note that the relative size of the object did not seem to change after the turn was made. Sgt Steen compared the object to the size of a nickel, if a star was considered to be a pinpoint of light, and very unlike an identification light on an aircraft. Observer also noted that it definitely did not appear to be a star or planet, or anything he had ever seen before. No sound was heard.
