AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT		
AREA REPORTED ON	FROM (Agency)	
Albuquerque, New Mexico	30th Air Division (Evaluation Zone)	
DATE OF REPORT	DATE OF INFORMATION	SOURCE
21 October 1952	21 October 1952	2-1
PREPARED BY (Name)	Visual Observation	
REFERENCES (Check where applicable)		
SUMMARY: (Give main summary of report. Give significance in first one-sentence paragraph. List sources at lower left. Begin text of report on AF Form 113—Part II.)		
SUBJECT: FLYOBRPT		
In accordance with AFL 200-5, dated 29 April 1952, Subject: Unidentified Flying Objects Reporting (short title: FLYOBRPT), the following report of Unidentified Flying Objects is submitted:		
On 17 October 1952, Charles R. Coble, Major, USAF, Richard D. Volk, 1st Lt., USAF, William J. Arrowood, 2nd Lt., USAF, and Warren J. Bljenholm, 2nd Lt., USAF, stationed at Kirtland Air Force Base, New Mexico, sighted an unusual aerial object north of the city of Albuquerque, New Mexico.		
These sightings were made from different locations, which were as follows: Major Coble's sighting was made from approximately ten (10) miles south of Taos, New Mexico, and appeared to be approximately 25 miles northeast of the observer at an altitude of approximately eighteen thousand (18,000) feet MSL. The other observers were at the local football stadium and were watching the activities of the half time break when sighting the object. All sightings were made from 2110 to 2115 MDT.		
APPROVED: <i>John Parrish</i> JOHN D. PARRISH 1st Lt., USAF Director of Intelligence

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE <u>1</u> OF <u>2</u> PAGES		
<u>34th Air Division (Defense)</u>	<u>IR-20-52 W</u>			

(1) Shapes: Round
Size: About the size of a Volley Ball
Colors: Bright Blue
Numbers: One
Formations: None
Maneuvers: North to Northeast at a 45° angle
Manner of Disappearance: Suddenly
Other Factors: Negative

(2) 2110 MST, 17 October 1952. Length of observation 2 to 3 seconds.

(3) Visual observation.

(4) Ten miles south of Taos, New Mexico, on highway 65.

(5) Observer's reliability is considered excellent. (Maj. Coble)

(6) Visibility was unlimited. Winds were negative.

(7) through (10) Negative

The information given above is true and correct to the best of the observer's ability and knowledge.

Comments of Preparing Officer: It is believed that this could be a meteor.

Gordon K. Rendall
GORDON K. RENDALL
1st Lt., USAF
Assistant Intelligence Officer

COMMENTS of Approving Officers: After investigation, it has been determined that this sighting could be accounted for by being a meteor. This object was observed by a large number of people not included in this report, due to the sighting receiving newspaper publicity. Local newspapers received many reports on this sighting which were carried in the paper before investigation could be initiated.

SWORN STATEMENT

I, Charles R Coble, Major, USAF, AO 904573, 4910th Air Base Group, Kirtland AFB, New Mexico, do hereby make the following statement:

At approximately 2110 hours, on the night of 17 October 1952, while traveling into Taos, New Mexico, I observed from the car window, high in the sky, a large blue object about the size of a volley ball. This object was traveling from a north to a northeast direction at about a 45 degree angle, and was bright blue in color. I would estimate its speed at approximately 2,500 miles per hour, and was approximately 10,000 feet above the ground.

I would say that I observed the object for about 2 or 3 seconds, and it then disappeared.

Charles R. Coble

SWORN STATEMENT

I, Richard D Volk, 1st Lt., USAF, AO 1903267, 34th Air Division (Def), Kirtland AFB, New Mexico, do hereby make the following statement:

On Friday evening 17 October 1952, at approximately 2110 hours MST, I observed a strange object in the sky. While watching a football game at Municipal Stadium, I noticed what appeared to be a very large meteor east of Albuquerque traveling north. The object was a bright blue-green, and falling very rapidly. It was only in view for about one (1) second, and it was not possible to estimate any speed. The object appeared to burn itself out rather than fall from sight.

SWORN STATEMENT

I, William J. Arrowood, 2d Lieutenant, USAF, AO 1850521, 4910th Air Base Group, Kirtland AFB, New Mexico, do hereby make the following statement:

At about 2115 hours, 17 October 1952, I saw an object about the size of a football streak through the sky in a southwest to northeast direction. I was sitting in the public schools stadium in the city of Albuquerque, New Mexico at the time. I estimate the object to be traveling at a speed of over 2000 miles per hour and at an altitude of 30,000 feet. It seemed to me that this object was a meteorite and it was bright blue in color.

I would say that I observed the object for about 3 seconds, and it then disappeared.

SWORN STATEMENT

I, Warren J Eljenholm, 2nd Lt., USAF, AO 1861372, 34th Air Division (Ref), Kirtland AFB, New Mexico, do hereby make the following statement:

On Friday evening 17 October 1952, at approximately 2115 MST, I observed a strange object in the sky. While sitting in the Municipal Stadium, watching a local football game, I happened to look to the north and saw what appeared to be a very large meteor, the path of fall was almost vertical and toward magnetic north. The object gave off a bright bluish-green color, and emitted a sudden flash when it disappeared from view.

It is extremely difficult to describe the size of the object because, at the most, it was only in sight for two (2) seconds. It was, however, larger than the average falling star. The object appeared to burn itself out rather than fall from sight. This was borne out by the apparent flash at the end of the fall. Distance and speed were other factors of which it would be impossible to give an accurate estimate due to the lack of comparable size.
