AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT "FLYOBREP"		(Page 1 of 2 Pages)
AREA REPORTED ON Germany/ West Zone	FROM (Agency) Hq, USAFE, ATI Branch	
DATE OF REPORT 5 March 1953	DATE OF INFORMATION 28 Jan 53	EVALUATION A-1
PREPARED BY (Officer) GERALD M. JONES, Capt.	SOURCE Lt. Col. M.O. Mitchell & Major D.W. Pearsall	
REFERENCES (Control number, directive, previous report, etc., as applicable) AF Letter 200-5, PIR-60W-1-53		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

1. The information contained in this report concerns the sighting by two USAF officers of an unidentified flying object near Frankfurt/Main, Germany on 28 January 1953. The officers, Lt. Col. Max O. Mitchell and Major David W. Pearsall, both members of the ATI Branch, are rated pilots and have been on flying status for several years. They are considered to be exceptionally reliable.

2. Information concerning their experience is presented in reproduced copies of the U. S. Air Force Technical Information Sheet attached as Inclosures 1 and 2. Immediately after the sighting Lt. Col. Mitchell wrote on a blank AF Form 1 a description of the event. This description, a good summary of the sighting, is quoted verbatim in order to prevent any misstatement of facts surrounding the incident.

"On the night of 28 January 1953 at 1952 hours I observed the following phenomena. We were on top of an overcast at 7500 ft. flying on a heading of 0°. Visibility was for all practical purposes unlimited. Temperature was 5° C. I sighted a very bright light passing in front of us at a slight (45°) elevation above us from our left to right. I called Major Pearsall's attention to the light and we both watched it move to our right simultaneously remarking that the light was moving at an extremely high rate of speed. In a few seconds it turned to the North (very high acceleration turn evidently) and then turned again in front of us climbing slightly until it was directly ahead of us again, where it seemed to linger. The light was judged at that time to be 8-10 miles ahead of us. Then the light made several violent maneuvers from just above the horizon to 15° above the horizon. Then it paused for a few seconds, made several more maneuvers (as though in a dogfight) and then disappeared at a very high rate of speed to the North. We reported this phenomena to Frankfurt airways and Cornbeef. The object was in sight for only a total of approximately 1-1/2 minutes. I held a heading of 0° all of this time."

3. It has come to the attention of the reporting officer that an unidentified flying object was sighted at about the same time and location by another USAF officer. This sighting was reported in PIR-60W-1-53, dated 30 January 1953, from the 60th Troop Carrier Wing, Medium at Rhein Main AF Base, Frankfurt/Main Germany.

4. The 1900 hours Zebra weather reported at Rhein Main Air Base was:

- a. No precipitation
- b. 8/8 stratocumulus cloud coverage, base 3000 ft., tops 8000 ft., 3/8 stratus cloud coverage at 1200 ft., scatter clouds at 20,000 ft.

The image shows a document page that is extremely degraded. It features a large grid of small, dark squares, likely representing a data table or a heavily redacted area. The text is mostly illegible due to the high contrast and noise. At the top, there is a header section with some faint, unreadable text. The bottom of the page contains a few lines of text, including what appears to be a footer or a page number. The overall appearance is that of a very old or poorly scanned document.

On the morning of 26 January 1977, at 10:00 hours, I was taking a walk in a park in the city of New York. I was walking along a path that was lined with trees and bushes. I was walking towards a large building that was in the distance. I was walking at a steady pace and was looking around me. I was looking at the trees and bushes and at the building in the distance. I was looking at the path that I was walking on and at the people who were walking on the path. I was looking at the sky and at the clouds. I was looking at the sun and at the moon. Air-visual sighting by two USAF pilots flying a C-47 over this locality state that both pilots sighted a very bright light passing in front of them at an elevation of about 45° moving from their left to right. Appeared to be moving at a very high rate of speed. In a few seconds it turned to the North and then turned again in front of the observers, climbing slightly until it was directly ahead of them, where it seemed to linger and then go out of sight. The object was sighted for a total of approximately 1 1/2 minutes. The pilot was on a heading of 0° during the entire period of sighting. Weather was clear with a slight temperature inversion between 3 to 4,000'. A check with the Frankfurt Flight Service by the pilots revealed the information that no jet aircraft were operating in the vicinity of Rhein Main at the time of sighting. However, other C-47's were flying in the vicinity and might account for the sighting.

AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT UNIDENTIFIED FLYING OBJECTS NEAR RHEIN MAIN, GERMANY		
AREA REPORTED ON U.S. ZONE OF GERMANY	FROM (Agency) 60TH TROOP CARRIER WING, MEDIUM	
DATE OF REPORT 30 JANUARY 1953	DATE OF INFORMATION 29 JANUARY 1953	EVALUATION B-6
PREPARED BY (Officer) RAYMOND O DANIEL, CAPTAIN, USAF	SOURCE SORGE, MARLOWE B., 1stLT., USAF	
REFERENCES (Control number, directive, previous report, etc., as applicable)		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

1. SOURCE, 1st Lt Marlowe B. SORGE, 17835A, USAF, 60th Air Police Squadron, was pilot of USAF C-47 aircraft No. 3734 returning to RHEIN MAIN Air Base, GERMANY from the vicinity of STUTTGART the night of 28 January 1953.

a. Lt. SORGE is well known to me, and is a conscientious and capable officer whose judgement may be relied upon. He stated that he has been skeptical of reports of unidentified flying objects, so took necessary action to determine if the lights reported below could be a reflection from the instrument panel or stars shining through the clouds.

2. At approximately 2020Z, 28 January 1953, Lt SORGE noticed a bright light ahead and slightly to the right of his aircraft. These lights appeared to be about three to five miles distant and at the same altitude as the aircraft, approximately 8500 feet.

a. The light was a bright white light with green around the edge, and no size or shape could be determined. SOURCE at first thought the lights were on an aircraft, so he flashed his landing lights, but received no response.

b. The light appeared to be traveling the same direction (300°) as the aircraft and at approximately the same speed. The light made no violent maneuvers, but drifted to the right a distance estimated to be one half mile and then returned to its original position. It also dived approximately 1000 feet at about a 75 degree angle and then climbed perpendicularly to its original position. This maneuver consumed only 4 or 5 seconds.

c. This light was visible for approximately ten minutes.

3. At approximately 2030Z, another light appeared, this one ahead and slightly to the left of the aircraft.

a. The light was bright and white, but no size or shape could be determined.

b. The light appeared to vary in distance from three to five miles as evidenced by the fact that the light would grow brighter and then dimmer and the relative positions would change from 11 o'clock to 10 o'clock and then back to its original position.

INCL.

e. This light was visible for approximately fifteen minutes.

4. Both of the above lights were visible at the same time, but shortly after the second light appeared, the first one disappeared.

5. Lt SORGE reported both lights to "CORNBET and FRANKFURT AIR TRAFFIC CONTROL. The second light was visible until the aircraft started a procedure turn at STADEN Beacon (NKJF 5518). When the light disappeared the aircraft returned to its original heading of 300° and attempted to resight it, with no success.

a. Lt SORGE stated that the clouds were in two layers. The top of the layer at 6000 to 7000 feet. The upper layer was light an at approximately 10,000 feet.

b. All observations were between the cloud layers.

7. Aircraft was flying on a heading of 300° at 3500 feet. TAS approximately 150 knots. Ground Sp ed 110 knots.
