AIR INTELLIGENCE INFORMATION REPORT

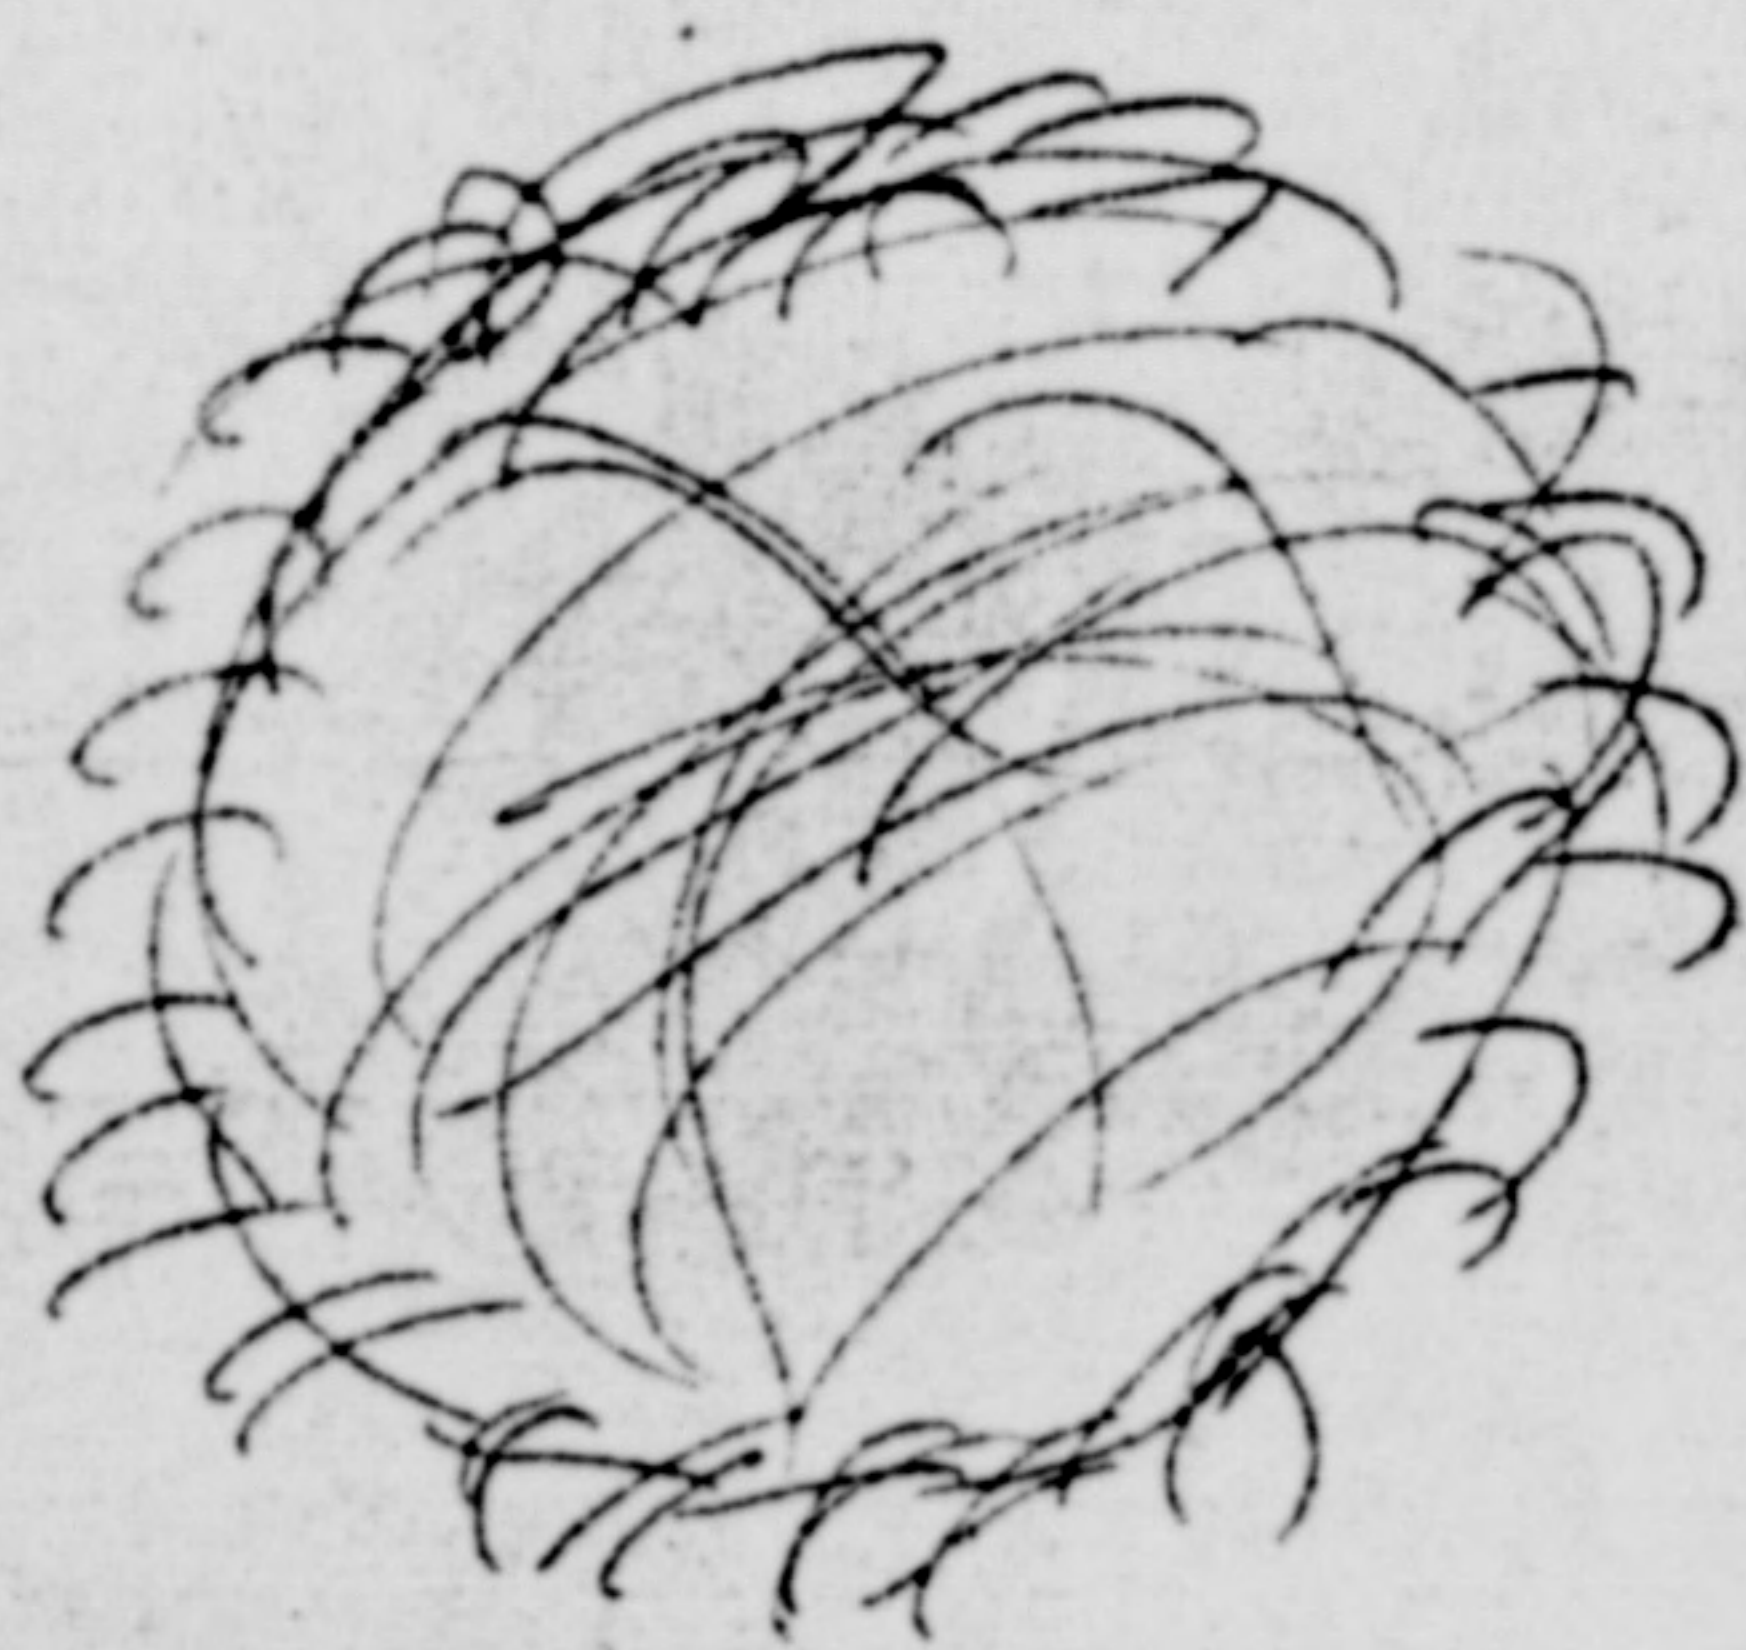

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
29th Air Div (Def)	CID-3-53	1	1	1

1. Object appeared to be star like, only quite a bit larger, with a bluish, greenish color. It would fade and then grow brighter, or appeared to twinkle at times. Traveled slowly to the west from first sighting and moved up and down slightly while in flight. There was no sound, exhaust or any other unusual features. There was only one object seen. The shape was round as described by both observers. The altitude was unknown but guessed at about 3,000 ft.
2. Mr. [REDACTED] first sighted the object about 110410Z, he watched for quite a while then called the observation post and informed the observers on duty about 0420Z. Mr. [REDACTED] lost sight of the object about 0430Z after he had traveled about one (1) mile west of Laurel. The observer, Mr. [REDACTED], watched the object from about 0425Z till about 0450Z. He was on top of a two (2) story building which might account for the longer sighting.
3. The manner of observation was only by eye sight. Mr. [REDACTED] tried to contact the owner of a local observatory but was unable to, so couldn't look at the object through a telescope.
4. The location was approximately 108° 47' longitude, 45° 39' latitude, and followed this longitude west till out of sight. The observers were east of the object when it was first sighted.
5. Mr Earl [REDACTED] has about five (5) years in the Air Force. He was a Crew Chief and a Flight Engineer, and a Flying Officer for four (4) years. He is reliable and went to some length trying to get a better view of the object. Mr [REDACTED], is fifteen (15) years old but serious and fairly reliable.
6. The weather was clear with a slight wind, possibly five (5) miles per hour with gusts from the west.
7. There appeared to be nothing meteorological that would have anything to do with the sighting.
8. There was no photographs taken and nothing found giving any physical evidence.
9. None
10. There was no aerial activity at the time or during the sighting.

~~at~~ at 9:45 a whitish blue object
~~appeared~~ appeared in the western sky.
about the size of a lamp or street light
203 miles away. It was round & seemed
to be traveling at a rather slow rate
of ~~off~~ speed almost following the
Laurel Park City road. It was
a rather clear night with no
planes or my shift. at about
9:45 I received a phone call from
Mr. Al. Granger. who also saw
the object before but our times didn't
check.

~~Fact #1~~ [REDACTED]
UNCLASSIFIED

The object I saw Feb 10 ¹⁹⁵³ at 9:10 PM was star like, blinking, bluish green, and slightly to the west of Laurel when first seen. It was traveling slow, almost directly west and went over the horizon at near 9:30 PM. I could hear no sound of any kind. It was moving very slightly in an up + down motion as it travelled out of sight. I drove about 1 mile west of Laurel, and observed the light for the last 10 minutes it was in sight, to prove for my own satisfaction that it was something besides an ordinary light.
