AF FORM 112—PART I

APPROVED 1 JUNE 1948

COUNTRY U.S.A.	REPORT NO.	(LEAVE BLANK)
AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT FLYINGPT, GROUND OBSERVER POST REPORT OF UNIDENTIFIED FLYING OBJECT		
AREA REPORTED ON CAPE VINCENT, NEW YORK	FROM (Agency) PQ 3808	655TH AGCW SQ, WATERTOWN, NY
DATE OF REPORT 20 MARCH 1953	DATE OF INFORMATION 2105 EST, 19 MARCH 1953	EVALUATION RESTRICTED
PREPARED BY (Officer)	SOURCE THRU GOC, CAPE VINCENT, NY OF CAPE VINCENT	
REFERENCES (Control number, directive, previous report, etc., as applicable) AF 200-5, DATED 29 APRIL 1952 MSG THIS HQ ACL 02079, 20 MARCH 1953		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

At approximately 0025 EST, 20 MARCH 1953, the following information was received by this station (P-49) from CGC Post # PQ 48 Red located at PQ 4808, Cape Vincent, New York area:

CGC Post at Cape Vincent, New York, Station # PQ 48 Red, notified this station that a Mr. Wiley of Cape Vincent, New York, Phone 3951, observed an unidentified flying object at approximately 2105 EST, 19 March 1953. Object was reported as Northwest of observer at a low altitude, no distance given. Object was described as a ball of fire with an orange border at a low altitude. Object seemed to hang in the sky and to move in a northerly direction. Object was observed approximately 8 or 9 times in 4 hours, for approximately 15 to 30 minutes each time, and could be seen through the clouds. Witnesses to observation were: Mr. [redacted], [redacted], and [redacted]. It was reported that objects have been sighted previously but never reported.

Weather in that vicinity was 8,000 overcast with winds Southwest at 11.

The authenticity of this report seems reliable to a fair degree since four persons observed this object.

And now to the 2nd batch; of 26 March 53:

In the 2nd batch, only 2 are Venus: 13 (bartlesville) and 19 (Cape Vincent) March. There is a possibility that also the 15 March, Germany, was the star Sirius. Most interesting to me is March 18, Williams AFB. This one could be a Menzel mirage. Would be interesting to know elevation above horizon. Would be interesting to have questionnaire filled out on this one. If the heading had been 270° instead of 90° , these might very well have been Sundogs. My guess is, however, that this was some sort of meteorological phenomena.

Now as to the remainder, the 23 March Casper could have been a meteor if the reported 2 minutes is in error. How large was the disk? Does altitude here refer to elevation? What is your opinion of this one?

The 15 March Courtlands could have been a meteor. The short time of observation seems to make follow-up not worthwhile.

The 19 March Newfoundland case is very interesting, but only one observer. The fact that the measured ceiling was 2700 feet puts a limit ~~mx~~ to height. Were there any witnesses? If so, this would be worthwhile following up.

The 18 March Great Falls, Mont., gives us another Nocturnal Meandering Light. Can a balloon be ruled out? I think a questionnaire here would be appropriate. Maybe you ought to station a special observer at Great Falls!

The 19 March Tanawanda has insufficient data. The 21 March Elmira is quite interesting but observed only a few seconds. I don't see how Menzel can explain this one.

the 13 March Maxwell AFB has insufficient evidence.
Finally, the 14 March Greenville, could be a balloon.

In both batches there are 3 cases I should personally like to follow up. Those are Shaw AFB, 5 March; Wms AFB 18 March; and 18 March Great Falls.

My plan, Lieutenant, is to concentrate on relatively few cases that show promise of affording scientific data. I purposely want to keep the number of cases down for ~~some~~ obvious reasons of time limitation. If it becomes possible to obtain the services of one full time assistant, then I could assign certain follow up jobs which would facilitate matters a great deal.

I hope we can discuss these and other matters at your visit here 22 April.

Best Wishes,

Sincerely.

Allen Hynek

P.S. Any further word on the Port Austin Case of 17 Feb?

I should appreciate talking with Dr. Kaplan concerning the Menzel plan.

Wade - Ask Port Austin by Twx if the object may have been a helicopter, asking info on local helicopter activity, companies, mail runs, etc.

Lt. Ossian
