About two minutes after they saw the disc - dome object they came to the top of a hill and stopped the car hoping that they would see the first object again. The four saw three yellow lights (the lights appeared disc shaped but it was hard to tell). The three lights were far away and no details could be made out. They flew behind a hill.

DATE November 28, 1954

On August 19, 1954, my sister, cousin, uncle and I were riding in a car between New Martinsville and Wheeling near Moundsville. I was startled by a bright orange-white light windshield

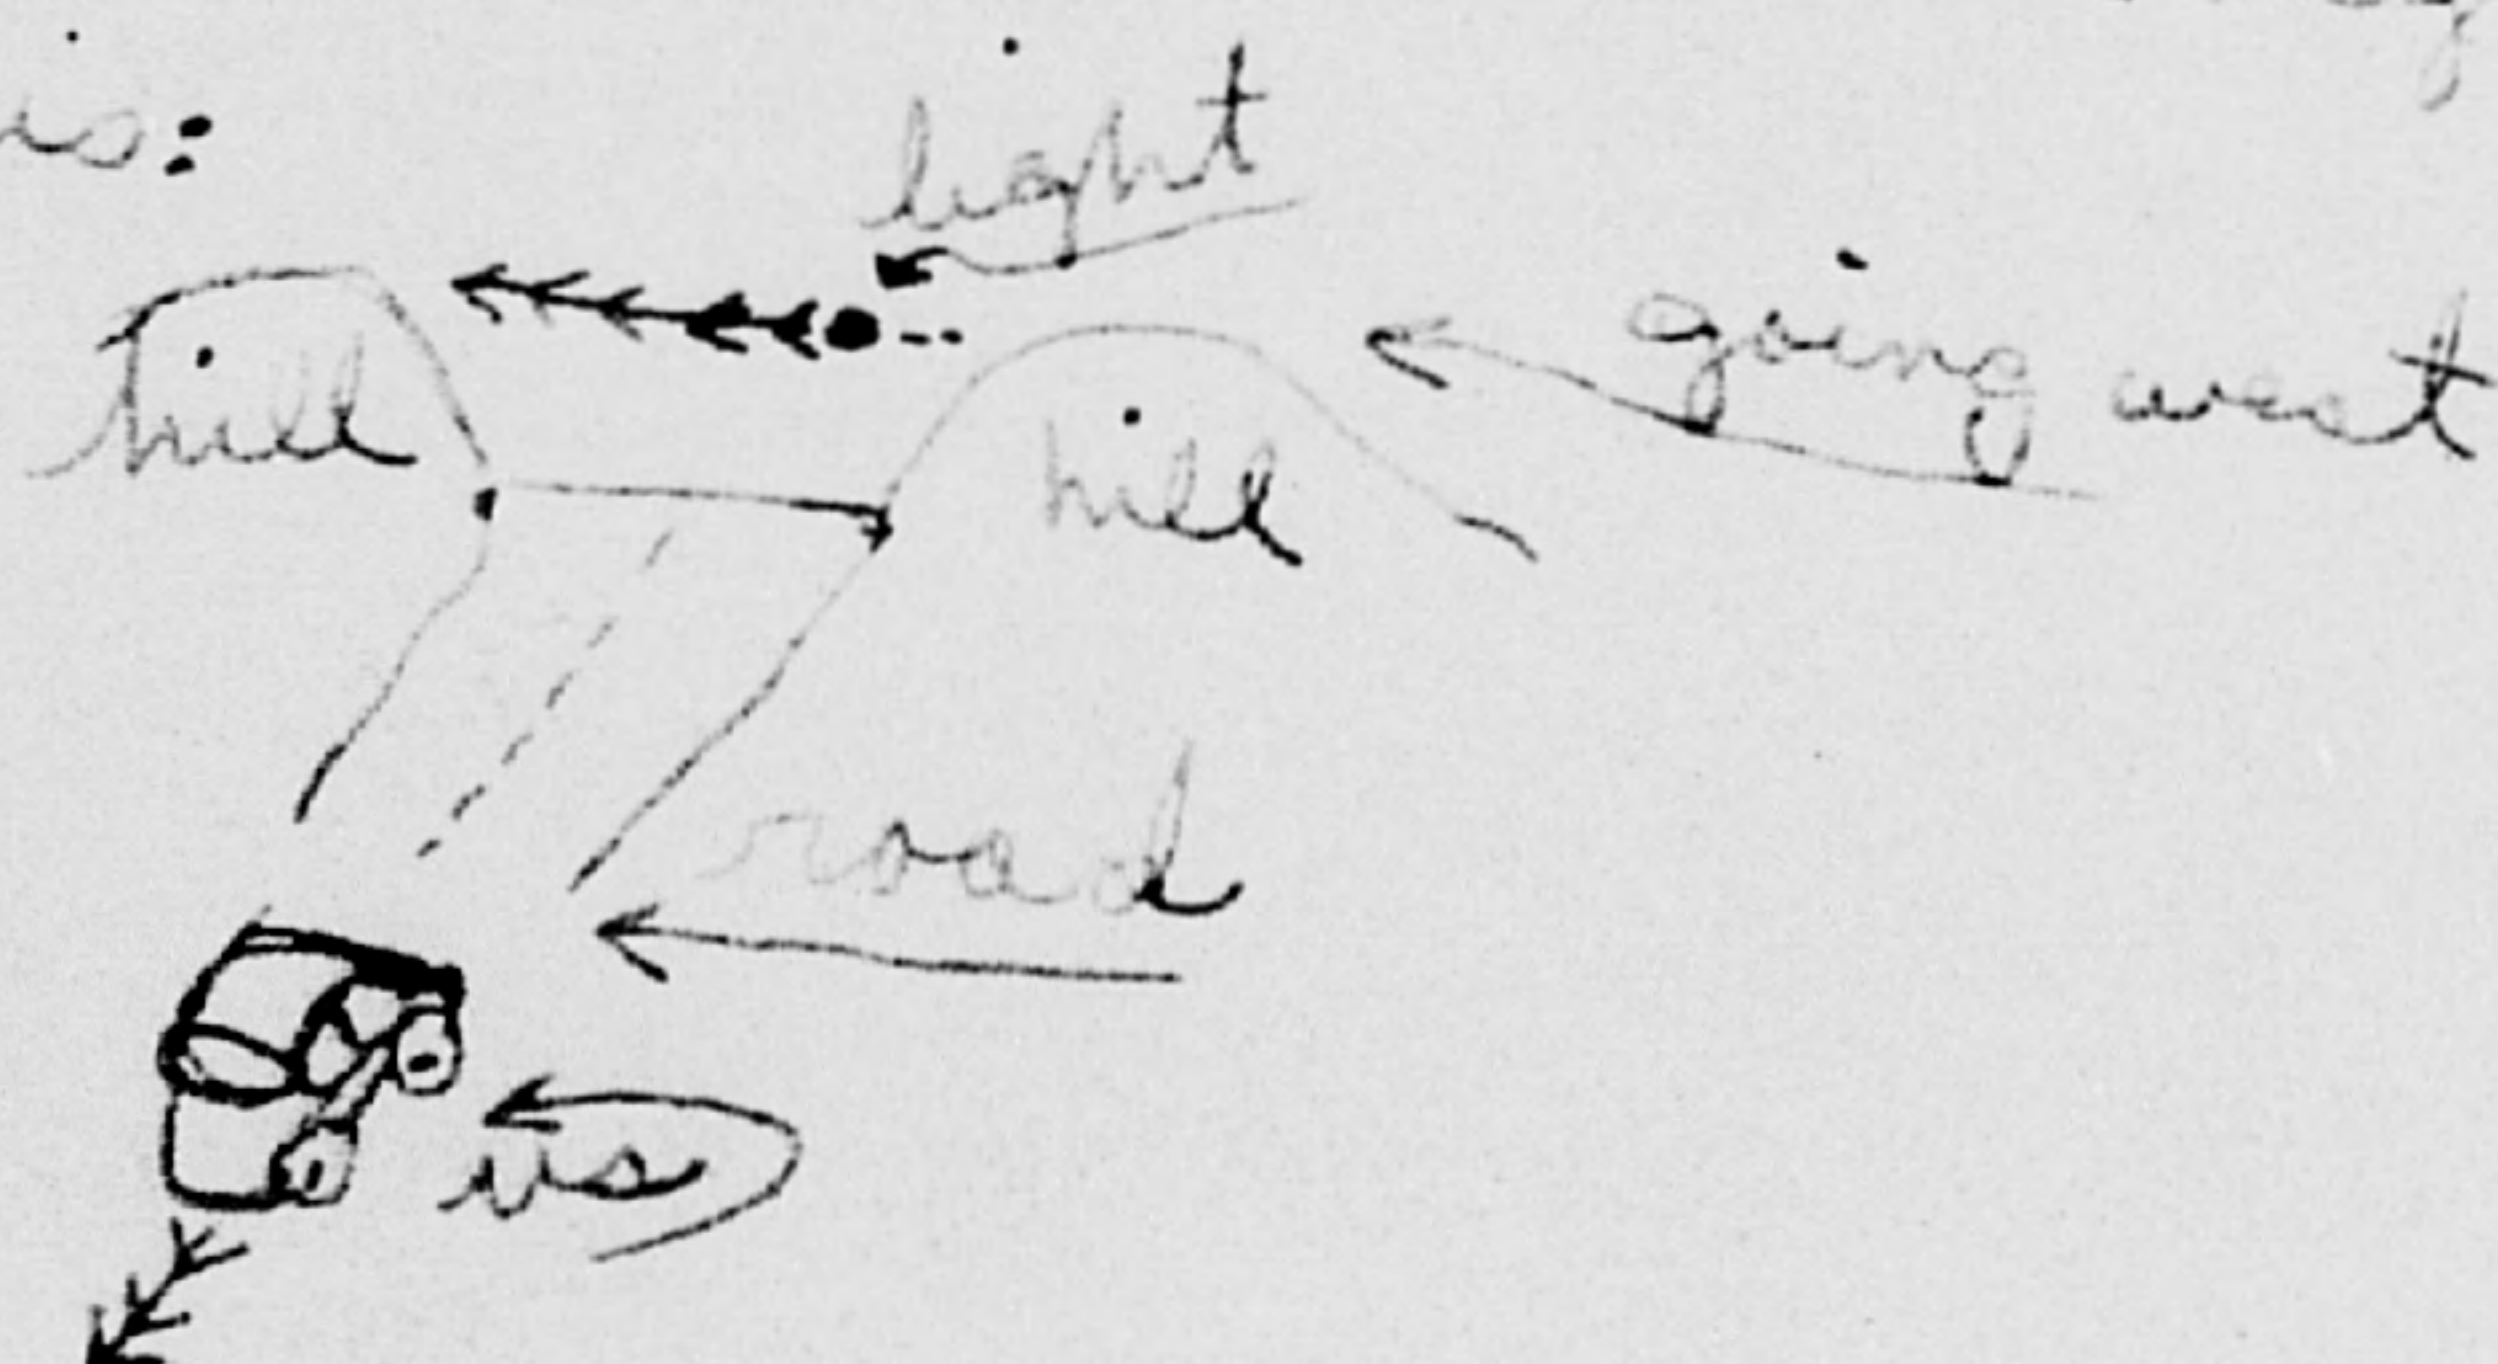

light.

No one realized for a few seconds just what it was, since we were concentrating on the light itself. When our eyes got accustomed to the darkness we discovered that a very large body was attached under the light. I have made drawings showing the shape of the object.

My sister, cousin, and I were too dumb-founded to say anything after we saw the body under the light and we did not say anything to my uncle who was driving. The car turned and went behind a hill and we lost sight of the object. We told my uncle to stop the car but just before he did, my cousin and my sister, who were sitting in the back seat, saw the light move across the sky like this:

at this point the girls got almost hysterical and we just drove on to Wheeling, where we were vacationing with our Aunt.

Since then I have seen several "flying Saucers" but nothing like this machine I have described above.

P.S. On same night saw 3 other lights but don't know what caused them.

DAMES FOIL 'CLUMSY' ESPIONAGE ATTEMPT

Stockholm, in English to Eastern North America, Aug. 24, 1954, 1200 GMT--E

(Text)

A thoroughly clumsy attempt at espionage was described in yesterday's issue of the Danish newspaper EKSTRA-BLADET. It took place at a military camp in the southern part of Jutland. A motorist approached the guard on duty and tried to coax military information out of him by offering cigarettes and candy. The guard, however, refused to be taken in, and when the car started driving away he noted its license number. Then he reported to his commanding officer, and so on through channels.

The completed investigation showed that the car belonged to the Polish legation in Copenhagen.

FLYING SAUCER LANDING IN NORWAY REPORTED

Paris, AFP, Radioteletype in French to Authorized Recipients in Europe, Africa, and the Near East, Aug. 24, 1954, 2230 GMT--E

(Text)

20 AUGUST

Oslo--A flying saucer is reported to have landed last Friday in the region of Mosjoen, about 300 kilometers northeast of Trondheim.

The pilot, a bronzed man with long hair, was seen by two sisters who were picking berries in the mountains, according to a local paper.

An officer of the Mosjoen police force confirmed the fact that the two sisters, aged respectively 24 and 32 years, who are not believed to suffer hallucinations, claimed to have seen the saucer land.

According to them, the pilot wore an aviator's coverall with no buttons. After trying in vain to make himself understood by means of signs drawn on a piece of paper, he got back into his machine, waved his hand to the two sisters, and took off fast and vertically.

The ladies did not have time to get close to the machine, and can give only vague details as to its appearance, but according to their story it was composed of two discs approximately 5 meters in diameter.

In spite of the unlikeliness of their statements, the local police will go tomorrow to the landing spot in the hope of finding some trace of the flying saucer.
