In 1955 of about a dozen photos of UFOs two in particular stood out among the rest. On March 8 an amateur astronomer friend of mine, Mr. ~~XXXXXXXXXX~~, also an active UFO researcher, photographed a round luminous object near the edge of the Moon from Broadway, Virginia.

7. LENGTH OF OBSERVATION Three to five (3-5) seconds		8. NUMBER OF OBJECTS One (1)		9. COURSE Stationary	
10. BRIEF SUMMARY OF SIGHTING One (1) round, very bright object, the size of a softball held at arms length, was noticed in the sky at a distance estimated at three-five miles. The object appeared "fuzzy" at times and seems to have no distinct edges at any time. Observer states the object swerved to miss a cloud. Time of day: dusk.				11. COMMENTS Due to the brevity of the sighting and the improbability of further investigation yielding significant data, no investigation authorized by this organization (4602d AISS). The sighted object has all the characteristics of a balloon. A check with the local weather station revealed that a balloon was released at 08/2100Z Mar 55, forty-six (46) minutes prior to the sighting. Resolved: Possibly Balloon
