7. LENGTH OF OBSERVATION <u>Four (4) to Five (5) Minutes</u>	10. BRIEF SUMMARY OF SIGHTING One (1) long, silver object, the size of a pea held at arm's length, appeared as the nose of the object was larger than the tail of same.	11. COMMENTS Coupled with the sighting of San Margaretta, California, it is entirely that the observers of these two separate reports saw the same thing. The fact that this object seemed long does not exclude the possibility of the object being a balloon. With much balloon activity in this area it is highly possible that the UFOB was a balloon.
