SUMMARY (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on next page)

I. CONTENTS:

PART ONE: Description of sighting by Lt/Col. R [REDACTED] [REDACTED] EDS/Plans, HQ MATS, Andrews AFB, Maryland.
(Georef GJPJ 0847)

PART TWO: Description of sighting by Maj. Louis E. Curges, Office of Manpower & Organization, HQ MATS, Andrews AFB, Maryland.

PART THREE: Description of sighting by Mr. [REDACTED] Admin. Asst. to Congressman [REDACTED] (Each).

PART FOUR: Supplementary Investigative Efforts

PART FIVE: Comments of Preparing Officer

II. SUMMARY: An unidentified flying object was sighted in the vicinity of Hillcrest Heights, Maryland, (Georef GJPJ 0453), at 26/0242Z June 55. The information contained in this report was obtained from persons visually observing the object and from an investigation conducted to determine the actual cause of the phenomena.

Age: 38

Occupation: Lt/Col., USAF

Education: College Graduate

Qualifications: Senior Pilot

II. RELIABILITY: Excellent

III. SOURCE'S DESCRIPTION OF SIGHTING: (The following is a verbatim account)

"On 25 June 1955, at approximately 10:45pm (EDST), my wife and I were visiting [REDACTED] and Mrs. [REDACTED] [REDACTED] at their home in Hillcrest Heights, Md. At approximately 10:45, a neighbor of the [REDACTED], Mr. [REDACTED], called Maj. [REDACTED] to come outside to observe an object in the sky, which Mr. Zumwalt didn't or couldn't identify. We all went outside and looked. The object was a yellow light in the sky, which was moving from East to West, then SW, and moving very rapidly. It seemed to stop and hover for about one minute, then move to the left (SW). There were no airplanes flying at this time. The sky was overcast with five to seven-tenths coverage, visibility over fifteen miles under the overcast. The object seemed to be controlled, because it seemed to hover for awhile and then move. The size and shape can only be guessed at. It was round or at least resembled a glowing light bulb. I looked at my watch as soon as I stepped outside and it read 10:46. We all observed the object for approximately six minutes, after which time the object disappeared."

Home Address: [REDACTED], Hillcrest Heights, Maryland.

Age: 35

Occupation: Major, USAF

Education: Three years college

Qualifications: Senior Pilot

II. RELIABILITY: Excellent

III. SOURCES DESCRIPTION OF SIGHTING:

"We had just finished dinner and had begun watching television on the evening of 25 June 1955 in my home in Hillcrest Heights, Washington 21, D.C., when our neighbor, Mr. [REDACTED], knocked on the door and yelled for us to come outside to observe something (a flying object), which we might be able to identify. Myself, Col. [REDACTED] and guests went out on the front lawn and I immediately checked my watch. It was 10:45 P.M. EDT. We saw a bright, yellowish-orange object, approximately 70° elevation, traveling at great speed in a zigzag course to the Southwest. It stopped and hovered once, then circled and departed in a straight line due west. It appeared to cover the vicinity of Washington National Airport from our position as it disappeared into the overcast, at about 30° elevation. When it had disappeared, I again checked my watch and it was 10:51 P.M. EDT.

The object at no time emitted any noise, nor did it change color or intensity. It appeared to have a triangular-shaped tailcone attached to the round object the size of a grapefruit. Both the tail cone and the circular part of the light were of the same color and intensity. At no time did this object change color, nor did it appear to get larger or smaller from the time of my first observation until it disappeared into the overcast."

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) Flight 3-H, 4602d AISS	REPORT NO. 3H-UFOB-6-55	Part Three 4 PAGE OF 9 PAGES
-----------------------------------------	----------------------------	------------------------------------

I. SOURCE:

Address: [REDACTED] Hillcrest Heights, Maryland

Age: 54

Occupation: Administrative Ass't to R. [REDACTED] (Wash.).

Education: College Graduate

Qualifications: Good vision and above average intelligence

II. RELIABILITY: Good

III. SOURCE'S DESCRIPTION OF SIGHTING: SOURCE had been standing in the driveway of his home when his son brought his attention to a strange object in the sky. The first impression was that it might have come from a landing gear of an aircraft, however, the absence of noise seemed to rule this out as a possibility. The time of the original sighting was 10:43 P.M. EDT. A brilliant red ball of light was passing overhead from east to west at what SOURCE estimated to have been 2000 to 3000 feet. There was no visible outline of the object nor was there any trail of exhaust. There was also no sound of aircraft aloft in the area, which is extremely rare.

SOURCE further estimated the object's course to have been on a direct line from Andrews AFB, Md., to Washington Nat'l. Airport. It continued on this course until directly over Washington Nat'l., where it hovered for ten to fifteen seconds. As the object hovered, its light blinked off for approximately three seconds, then came back on, shifting course abruptly 90° to the left. As the object proceeded now on a southwesterly course, SOURCE called next door for Maj. Curdes to come outside and help identify the object. It then shifted directions several times as it rose gradually, disappearing finally into the overcast. The phenomenon was observed for a period of ten minutes.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	Part Four		
Flight 3-H, 4602d AISS	3H-UFOB-6-55	PAGE	5	OF 9 PAGES

SUPPLEMENTARY INVESTIGATIVE EFFORTS:

1. A check with the Air Traffic Control Center at Washington National Airport revealed that the only information which they had on the UFOB was what had been relayed to them by Maj. Curdes. They had received no confirmation either from their units or from any surrounding radar installations.

2. The Ass't. Operations Officer at Andrews AFB was contacted. Confirmation negative. The above-referred officer contacted the local AC&W Det, GCA unit, each giving negative reports.

3. Maj. Springer and Capt. Casey at Bolling AFB Operations reported negative confirmation of the June 25 sighting. Capt. Casey helped contact the Flight Service Center at Washington National, which was unable to offer any confirmation.

4. A phone call to Capt. Gray, Ass't. Supt. of the Washington Naval Observatory, revealed that no UFOB's had been sighted by his faculty for over a year. Results negative.

5. The Director of the Georgetown University Observatory was contacted but was unable to give confirmation. Their observations on the night of 25 June had been restricted to less than an hour due to a heavy overcast.

6. A check with the Silver Hill Weather Observatory (Hillcrest Heights, Md.), located approximately five blocks from the area of first sighting of the UFOB, produced the following information: Namely, that twice daily, 0500 EST and 2200 EST, weather balloons are released from their station. One of these balloons had been released at about 10:45 EDST, 25 June 1955, containing a small, bright magnesium light. The ground winds at 10:45 EDST were 7 Knots East. (From the east) At 2000' the wind was from the NE. At 6000' the wind had shifted to the NW. Such wind conditions could easily have carried the balloon along the approximate path of the unidentified object.

7. The Baltimore Filter Center was contacted but no information could be furnished on the June 25 sighting.

8. The Ground Observer Corps Hdq. in the Pentagon was contacted. Results negative.

9. Both the Processing Branch and D&D of DCS/OPS, Hdq. USAF were contacted but results were negative.

10. Col. Mason at the Command Post, Hdq. USAF was called by telephone, but aside from the information which Maj. Curdes had relayed to him nothing additional had been reported to his office in regard to the June 25 sighting.

11. Finally, the DCS/I, MATS, Lt/Col. Rhody, was interviewed at Andrews AFB. He surrendered a copy of his report of the incident to the 4602d AISS Investigating Officer. From conversations which he had had with the authorities at the Silver Hill Weather Station regarding weather and wind conditions at the time of the balloon's release (10:45 EDST 25 June 1955), Lt/Col. Rhodes concluded that the UFOB sighted could have been this very same balloon.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	Part Five	
Flight 3-H, 4602d AISS	3H-UFOB-6-55	PAGE 3	OF 3 PAGES

COMMENTS of Preparing Officer:

1. The opinion of the Preparing Officer is that the UFOB sighting of 25 June was in fact the sighting by several observers of a weather balloon being carried aloft through shifting currents of air. It is further the opinion of this officer that the balloon sighted by the several observers in Hillcrest Heights, Maryland was the same which was released by the Silver Hill Weather Observatory at approximately 26/0245Z Ju55.

a. The object's general appearance and behavior seen to have been very deceptive to the observers on the ground.

(1) First, the object's apparent speed seemed to rule out all possibility of its being a balloon. However, this could easily have been the deception created by the balloon's low altitude at the time it was first observed.

(2) The object's altitude could easily have been misinterpreted by the observers on the ground since the absence of any sound being emitted from it, in addition to the fact that it was nightfall and the object was suspended in space, would have made it virtually impossible for an observer on the ground to have accurately estimated its altitude.

b. All SOURCES when informed of the coincidence in time of the release of the Silver Hill Observatory balloon and their sighting of the UFOB conferred that the two objects could well have been one and the same.

✓ (1) All SOURCES were aware of the nearness of the Silver Hill Observatory to their observation posts in Hillcrest Heights.

(2) SOURCES generally acknowledged this Officer's belief that the sporadic action of the object can be explained by the constant shifting of wind currents at various altitudes during its ascent, and that the brilliant light observed on the object could easily have been the glow from the magnesium light attached to the Silver Hill balloon.

(3) The searchlight beam neutralizing phenomenon which was noted in the original TT message was what the Hillcrest Heights observers seemed to see, yet in fact it was probably caused by advertising searchlights in the city some 10 miles away. A clicking on and off at the source of light or a sudden power failure at the source might have given the effect of their being neutralized to an observer 10 miles away.

c. In the absence of any positive radar or other confirmation of the nature of the object sighted, and in view of the overwhelming coincidence surrounding the release of the Silver Hill Weather Observatory balloon on the night of 25 June 1955, this Officer concludes that the phenomenon observed was the ascent of the Silver Hill weather balloon.

COMMENTS of Approving Officer:

Concur with the opinion of the Preparing Officer that the sighting was probably caused by the balloon released from the Silver Hill Weather Observatory, Hillcrest Heights, Maryland.
