10. BRIEF SUMMARY OF SIGHTING One circular object, the size of a large grapefruit held at arm's length, silver in color, appeared in the north at an azimuth of approximately 350 dgrs and at an angle of elevation of 45 Hgrs. The object disappeared by "whirling into the haze." Seen thru binoculars of unknown power. Visibility was unlimited with no surface wind at the time of the sighting.  NO REPORT IN FILE			11. COMMENTS Received by letter. Due to the description of the object and the fact that the color of the object compares with pibalo balloons released on clear days, it is the opinion of this HQ that this sighting was possibly generated by a weather balloon.
