out of sight towards SE horizon

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

Material - something light as aluminum foil, paper  
 round or oval shape, high in middle and tapering off

Common object in sky would be similar to flame from  
 rear of jet except thicker and smaller -

Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Objects appeared  $\frac{1}{2}$  mi apart, oval in shape, color green about  $\frac{1}{2}$  the shade of a traffic light, no apparent protrusions or wings, no apparent vapor trails. Seemed to have their own lights, as if it came from the object itself, pale green appeared to be part of the object. Appeared to be about 3000-4000' above ground (both objects), traveling at least 300-400 mph ground speed. Objects 2-3 mi distance (approx) - did not appear to change altitude, and stayed approx same distance.
