- (d) From Source's letter: "At 11:30 PM, the night of July 1, I glanced out of my window and noticed a yellow-orange light in the sky due east of my house. It moved a few points north very quickly and then remained stationery in the air for 15 seconds. This is what aroused my curiosity. I watched for awhile and it began moving very slowly from its northeast position to southwest, passing near my house. I watched it with my naked eyes and then with a pair of low powered field glasses for about one minute".
