SUBJECT: UFOB Report

TO: Commander
Air Technical Intelligence Center
ATTN: AFOIN 4E4
Wright-Patterson Air Force Base
Ohio

1. Attached is a letter from [REDACTED], 1741 Clay Avenue, Fresno, California.
2. The "contact" referred to in Mr. [REDACTED]'s letter was processed by the 4602d AISS (ADC) under the log number AISS-UFOB-398-56. The analysis of that sighting was "Probably Over-Active Imagination." This command is of the opinion that this report also falls into that category.

Dear Sir:

1: Enclosed is material covering a observation which I hope maybe of some worth to you.

2: I was in contact with you in September, 1956. At that time filled out and forwarded to you forms pertaining to a sighting then - plus two other sketches and information on separate sightings.

3: I am happy to be of any assistance I can, and would, therefore, like you to answer this question, if possible.

Do you have any one located here in Fresno, California, whom I might contact for speedy reporting? All my efforts of the past year to locate some one in authority, pertaining to sightings, has been nil. *Send him DOD release*

I will be glad to forward any material direct to your headquarters - but what if something is important enough to report immediately - who - even the newspaper doesn't know - the operations at the air field doesn't know - - can't locate any one any where who does know. So you see, Sir, my request is rather important, some where, some how, we here have goofed. So, your answer is requested.

Meantime, it might be in order to mention, a number of good sightings have been buried in my U F O papers, as too late for value, but not because of lack of effort to offer them when ripe.

Thanks for listening.

Sincerely,

~~REDACTED~~

ATTACH TO SIGHTING 201 - August 13th, 1957 - 10:46

Object first sighted coming out of south-west, about 1/6 from horizon to overhead, at 10:46 PM local time.

Its shape was clear - round with 3/4 dome, and was about the size of a large cantaloupe, to the naked eye, as it passed close to overhead. It was of a dull aluminum in colour, no lights - no noise. Very smooth in flight. Visual sighting 8 (eight seconds), and observed in field glasses 16x50 for 3 (three seconds). Held straight flight-path with very slight upward shift as it was lost to sight behind trees - traveling south-east direction. Speed, I judge, about 150 mph. Height - about 1200 feet. *note!*

Witness to sighting - [redacted] Jr. of address -

Fresno, Calif.
[redacted]

I would swear, under oath, to above statement. *R. J. [redacted] as*
Harville

*Believe
This individual has
submitted reports
this type before.*
*Again - Overdone in quality
Put in his previous report*
