10 December 1957

SUBJECT: Unidentified Flying Objects

TO: Commander  
Stead Air Force Base  
Nevada

1. A letter dated 5 November 1957, written by Mr. [REDACTED], Reno, Nevada, has been received by this office. The letter pertains to the sighting of an unidentified flying object by Mr. [REDACTED] on 16 September 1957, and was addressed to the Federal Bureau of Investigation, who, in turn, referred it to the Office of Special Investigations.

2. Reference is made to paragraph 7, AFR 200-2, dated 12 August 1954, pertaining to the reporting of information relating to unidentified flying objects.

3. On 4 December 1957, Mr. [REDACTED] was interviewed by Special Agent CARLYLE D. SCHAAD and furnished the following information concerning the sighting:

(1) Description of the object:

- (a) Shape: Round
- (b) Size: Approximately eighteen inches (18") in diameter
- (c) Color: Vivid, deep orange and red
- (d) Number: One (1)
- (e) Formation: N/A
- (f) Any discernible features or details: None
- (g) Tail, trail or exhaust, including size of same compared with size of object: Orange jet flame appearing along the top rim
- (h) Sound: None
- (i) Other pertinent or unusual features: None

FOR OFFICIAL USE ONLY  
(AFR 190-16)

*Incl #1*

10 December 1957 AFIC 200-2

SUBJECT: Unidentified Flying Objects

(2) Description of course of object:

(a) What first called the attention of observer to object: N/A

(b) Angle of elevation and azimuth of the object when first observed: Ground level, below horizon off the peak of Mt Wheeler (Altitude: 13,058 feet). Object remained stationary. *← note*

(c) Angle of elevation and azimuth of object upon disappearance: See "2b" above.

(d) Description of flight path and maneuvers of object: Object remained stationary.

(e) Manner of disappearance of object: Diminished and disappeared. *← If ground light, could be anything - headlights, window light, campfire light, etc being*

(f) Length of time in sight: Object observed twice for approximately one and one-half (1½) to two (2) minutes duration, with *10 minutes of* approximately three (3) minutes lapse between sightings.

(3) Manner of observation:

(a) Ground-visual

(b) No optical aids utilized

(c) N/A

(4) Time and date of sighting:

(a) Zulu time-date group of sighting: 0700 Zulu time, 16 September 1957.

(b) Light conditions: Night ✓

(5) Location of observer: Observing was traveling North on U. S. Highway 93, Nevada, approximately five (5) miles South of Lincoln County line, Nevada (38 degrees 2 minutes; 114 degrees 5 minutes), One Hundred (100) miles Northeast of the Eastern edge of the Bombing Range, North of Las Vegas, Nevada. Object observed was reported to be approximately twenty-five (25) miles North Northeast of the position of the observer. *note*

(6) Identifying information of observer:

10 December 1957

SUBJECT: Unidentified Flying Objects

(a) Mr. [REDACTED], Civilian, [REDACTED], Reno, Nevada; Mortician, and Owner of [REDACTED]

(7) Weather and winds-aloft conditions at time and place of sighting:

(a) Observer's account of weather conditions: Clear, with no cloud cover and no moon.

(b) Report from nearest AWS or U. S. Weather Bureau Office of wind direction and velocity in degrees and knots:

At 10,000 feet - 10 knots from 200 degrees

At 11,000 feet - 10 knots from 200 degrees

At 15,000 feet - 15 knots from 200 degrees

(c) Ceiling: Not available

(d) Visibility: Not available

(e) Amount of cloud cover: See "7a" above

(f) Thunderstorms in area and quadrant in which located: N/A

(8) Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting: None

(9) Interception or identification action: None

(10) Location of any air traffic in the area at the time of sighting: N/A

4. Three individuals, Mr. [REDACTED] Chief of Police, Mr. [REDACTED] Captain of Detectives, and Mr. [REDACTED], Chief, ID Bureau, all Reno Police Department, Reno, Nevada, were interviewed, and all advised that Mr. [REDACTED] enjoys a sound and reliable reputation.

5. No further investigation is contemplated by this office and the case is considered closed in the files of this District Office.

*In my opinion, this is a matter of tax payers money - collecting the FBI to report a ground sight.*

*W. E. Zuerner*

## Area Plot + Analysis

### General Statement of Observer:

Round, orange red object or light, 13 inches in diameter, seen on ground level about 25° (NE). Object remained stationary. Remained in sight for approx 2 min. Then disappeared.

1. Detailed check of locale of sighting, using Aero Chart No. 362 (Bryson Canyon - Gt Coordinates made.
2. Observers line-of-sight to object NNE lines up in the vicinity and direction of MILFORD airport approx 50-60 miles away.
3. This line-of-sight also parallels Traffic Arway AMBER #2. The direction of this airway is NE.
4. Time 0700 Z - 7 = 1200 (Midnight)
5. Bright Star BETELGEUSE was practically on horizon at that time. However, would not appear the large size reported by SOURCE unless over-estimated or exaggerated. (Astro check - Ephemeris - HOWEVER, MOON was low or horizon at that general time. H.O. data)

NOTE: Above were plotted on basis object was sighted NNE as given - item 5 of report. However, this is contradicted by (2)a and (2)b. in which he gives the location of object (when 1st seen and when disappeared) as "off" Mt. Wheeler. This

CONTRADICTION  
IN  
SOURCES  
STATEMENTS

Mountain is approx 31N., 115W. and therefore to  
the NW of the observer. ~~As the peak is not visible from  
this or other points~~

32° 02' N, 119° 05' W

6. OBSERVER POSITION, from his statement, was  
plotted as approx. 9 miles NW of HAMLIN, NEVADA.  
CONCLUSIONS:

A. Therefore, assuming he was looking towards  
the NW — the moon is the best explanation  
is it was low and near the horizon at  
1230 AM that night (See Barrett-Sawicki Computer)  
The peak (Mt. Wheeler) would account for it appearing  
lower on the ground.

B. Assuming he was looking towards the  
NE — he was looking almost directly  
into the flight path of aircraft. The  
tail end observation of jet aircraft (based  
on many reports received) looks orange-red  
and large at night. The distance would  
make it appear on the ground a nice size  
hazy.

C. Because of the inconsistencies of bearings  
given at two different places in his  
report, must conclude as Inconsistent  
Data (Other).
