1 OF 3 PAGES

At 1545R, 1 Oct 57, we were informed by ACofS, G-2 USARCARIB, that Pvt William T. Hannon, 62nd Machine Record Unit, Fort Amador, C.Z., reported sighting an unidentified flying object at 2240R, 21 Sept 57.

Pvt Hannon stated to the reporting officer, that on the night in question, he was behind the Fort Amador Post Exchange which is on the east bank and adjacent to the Panama Canal, when he became aware of a rapidly moving object on the opposite bank. The object appeared to come through a saddle formed by the hills on Fort Kobbe (approximately 2½ miles West) and was at a low altitude, stating that it was definitely below the clouds which were reported at 1600 feet. This object made no noise, and appeared to be emitting a phosphorescent or luminescent light over its entire surface. The object was moving in a straight line on a course of approximately 130 degrees. He stated the object was in sight between 5 and 10 seconds during which time it covered an estimated distance of seven miles. The object was similar in size and shape of a C-54 fuselage as seen at 1500 feet altitude and a mile distant. It disappeared suddenly with an erratic upward movement. Vision was partly obscured at this time by small trees. When he moved to another point, the object had disappeared. During the time the object was in sight, it progressed from a scattered cloud background to clear area. He said that he spent several minutes studying wind conditions and reflections from the rotating beacon at Albrook in an effort to explain the phenomena. He then attempted to call the radar station without success. The following morning, Pvt Hannon informed his unit commander of the incident.

A query of the Radar Officer of the 65th AAA Group at Fort Clayton revealed that the station situated on Tobago Island was on watch but had not made any reports of contacts which were in the immediate area. This site was approximately 7 miles across the water from the sighting.

Private Hannon is an intelligent, lucid, individual, with a serious mien.

## 1. DESCRIPTION

- a. Cigar shaped
- b. About the size of C-54 fuselage as seen from 1500 feet and a mile distant.
- c. Luminescent white *good line*.
- d. one
- e. N/A
- f. No external features discernable
- g. None
- h. See narrative report for additional details

## SUPPLEMENT TO AF FORM 112

ORIGINATING AGENCY

REPORT NO.

PAGE 2 OF 3 PAGES

IR-14-57

## 2. DESCRIPTION OF COURSE

- a. The glow or light object was emitting
- b. Angle of elevation about 30 degrees. Azimuth of initial observation was approximately 265 degrees.
- c. Angle of elevation at time of disappearance was 20 degrees and appeared to climb. Azimuth was approximately 154 degrees.
- d. Object seemed to make an erratic movement upward
- e. 5 to 10 seconds

## 3. MANNER OF OBSERVATION

- a. Ground visual, no contacts were made on a TPS-1D radar installation located approximately 7 miles from point of disappearance.

## 4. TIME AND DATE OF SIGHTING

- a. 22 0340Z September 1957  $0340Z - 5 = 2240 \text{ hrs}$
- b. night  $\rightarrow 10:40 \text{ PM (Local)}$

## 5. LOCATION OF OBSERVER

- a. See inclosure #1 (Map of area)

## 6. IDENTITY OF OBSERVER

- a. [REDACTED] Private, 62nd MRU, Ft. Amador  
Administrative Clerk, Machine Record Unit.  
Individual can be classified as reliable.

## 7. WEATHER CONDITIONS

- a. Local thunder shower had just terminated, clouds scattered and low. Winds light from west. Visibility good.

- b. Winds aloft - 22 0000Z observation

## ADDITIONAL INFORMATION

Rawinsonde balloon releases

1st release - 1831R

2nd release - 2000R (estimated) a light is attached to balloon if darkness requires initial tracking by visual means.

Note

8. Negative Radar Report

9. None

10. Assistant Director of Intelligence, CAirC.

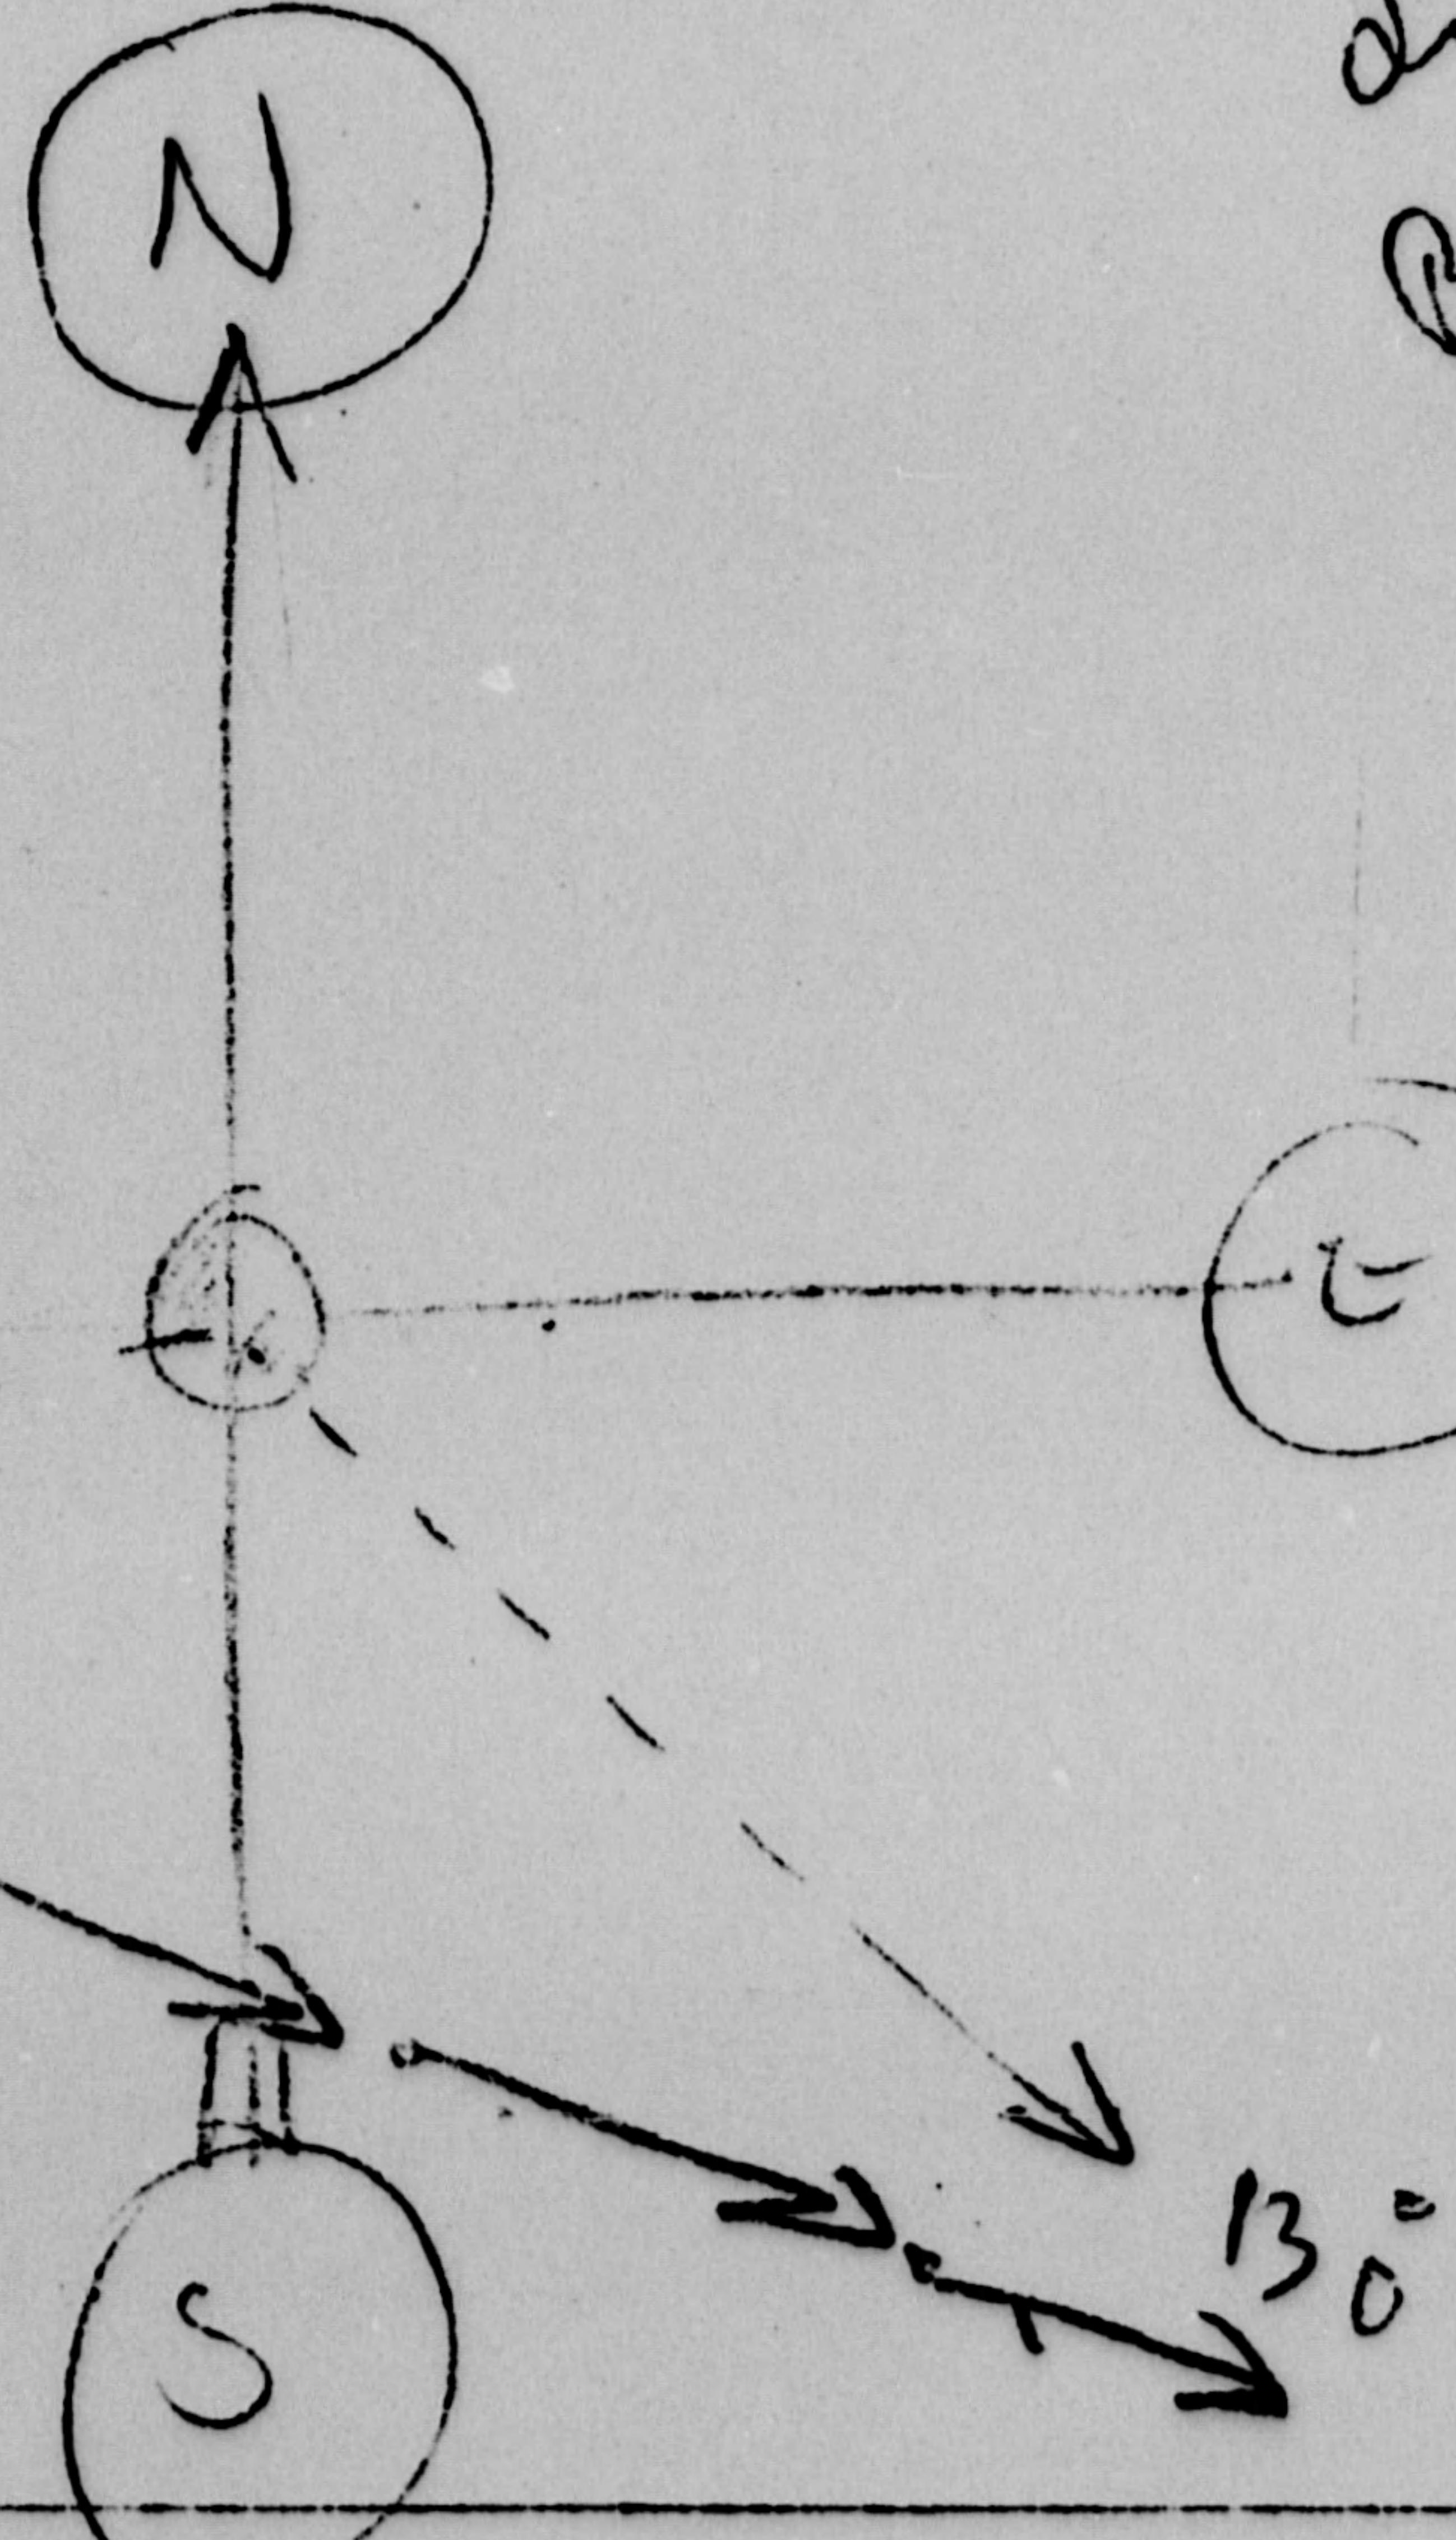

The reporting officer believes the observer witnessed a weather phenomena associated with thunderstorms commonly called fire balls.

12. None

Concur: One of the few instances a reporting officer attempts to properly evaluate a UfO.

Support, based on known knowledge of Bolbs(Fireballs):

1. Straight line
2. Last more than 6-8 seconds
3. glow brilliantly - fluorescent light
4. enter earth's atmosphere at decanted angle
