PROJECT 10073 RECORD CARD

1. DATE
27 October 1957

2. LOCATION
Humboldt, Saskatchewan, Can

3. DATE-TIME GROUP
Local 2030
GMT 28/0130Z

4. TYPE OF OBSERVATION
☒ Ground-Visual ☐ Ground-Radar
☐ Air-Visual ☐ Air-Intercept Radar

5. PHOTOS
☐ Yes
☒ No

6. SOURCE
Civilian

7. LENGTH OF OBSERVATION
45 seconds

8. NUMBER OF OBJECTS
one

9. COURSE
descending

10. BRIEF SUMMARY OF SIGHTING

Star-like object of second magnitude, around twice the size of a pinhead, bright white in color. Fell very slowly until obscured by tree.

11. COMMENTS

Although this sighting occurred in late 1957, it was not rptd until late 1961. The information reported is limited in nature, and due to the age of the sighting it is impractical to attempt to gather further information. It is possible that the object was a meteor, but due to limited information, a valid conclusion cannot be made.

12. CONCLUSIONS

- ☐ Was Balloon
- ☐ Probably Balloon
- ☐ Possibly Balloon
- ☐ Was Aircraft
- ☐ Probably Aircraft
- ☐ Possibly Aircraft
- ☐ Was Astronomical
- ☐ Probably Astronomical
- ☐ Possibly Astronomical
- ☐ Other
- ☒ Insufficient Data for Evaluation
- ☐ Unknown

ATIC FORM 329 (REV 26 SEP 52)

ATIC.
Page one

DESCRIPTION OF THE OBJECT(S)

Shape As discernable shape as it had the appearance of two saucers placed

Size compared to a known object (Use one of the following terms:Head of a pin, pea, dime nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball)held in the hand at about arm's length. Approximately twice the size of a pinhead

Color/~~color~~ Bright white Number one (1)

Formation, if more than one no formation

Any discernable features or datails None

Tail trail,or exhaust, including size of same compared to size of the object(s) None

Sound , if heard describe sound No Sound

Other pertinent or unusual features It followed a straight course and was seen by two.

DESCRIPTION OF COURSE OF THE OBJECT(S)

What first called the attention of observer(s) to the object(s) It broke following station.

Approximate angle of elevation of object(s) when first observed 60°-70°

Approximate angle of elevation of Object(s) upon disappearence 20°-30°

Description of flight path and manuevers of the object(s) slow straight falling motion

How did the object(s) disappear? (Instantaneously to the north etc,) Slowly fell until obscured behind trees

How long ewas the object(s) visible ? (B e specific , 5minutes, 1 hour etc.) 45 seconds

INVESTIGATIONS

Investigations I made ob August 4, 1961 at my residence 531 5th Street

Investigator's mane adn address Dennis Duncan 531 5th Street

Plymouth Pennsylvania

MANNER OF OBSERVATION

Use one or any combination of the following terms: Ground-visual, ground-electronicor air electronic (If electronic specify type of radar) Ground-visual

Statement as to optical aids (telescopes,binoculars etc,) no aids

LOCATION OF OBSERVER(S)

Exact latitude and longatitude of each observer and/or geographical position . Aposition with reference to a known landmark should also be given, such as "2miles N of Deeville;" "3 miles SW of Blue Lake " (example 98 45 n, 192 71 W) 105° 7' Longitude 52°13' Latitude (Humboldt, Saskatchewan)

TIME AND DA TE OF SIGHTING

Time and date of sighting 8:30 P.M. October 27, 1957

Light conditions (use one of the following terms :Night, day, dawn, dusk) Night

IDENTIFYING INFORMATION ON OBSERVER(S)

Name(s) [redacted] Age(s) 15

Mailing address(es) General Delivery, Humboldt Saskatchewan Canada.

Occuption Student (Humboldt Collegiate Institute)

WEATHER CONDITIONS AT TIME OF SIGHTING

Observer(s) account of weather conditions 5 m.p.h. No clouds +10°F

Ceiling Unlimited Visibility Excellent

Amount of cloud cover None Thunderstorms in area and wherethey were located None

Temperature rise Unobtainable

Any other unusual activity or conditions, meteorlogical, astronomical,or otherwise which might account for the sighting I would not know any unusual conditions

Existence of physical evidence , such as materialsor photographs None.

WITNESSES

Please collect as many as is possible and have them give their addresses

Person who is giving the report will sign below and willgeive his or her address

[redacted] Humboldt, Saskatchewan, Canada.

INVESTIGATOR'S REMARKS

As I happened several years ago, at the time I was greatly enthused in astronomy I made a notation in an old note book which contained a rough estimation of the results. I am not sure, but I think that the writer called it Procyon X. I did not mention Tisdale the circumstance before, but I saw a flaming meteor Oct 27, 1866 a second magnitude star below Procyon began to fade slowly. Total time 45 sec

Report sent in on August 7/61 I did not obtain witnesses as stated by time. (No other witnesses) And who am I to judge my own reliability? suggestion: deflated balloon not too plausible - of F.
