PAGES

(1) Description of the object (s):

(a) Long bare object, approximately 20 feet long and six feet high.

(b) Object appeared to be twice the length of an auto.

(c) Black.

(d) One.

(e) N/A.

(f) Neg.

(g) Neg.

(h) Low frequency whine.

(i) Sound varied once to low pitch as a light was flashed on the object.

(2) Description of course of object (s):

(a) Bluish-green glow seen by observer in the auto.

(b) Object appeared close to the ground, approximately on the same level with the auto.

(c) Object disappeared on same level as auto.

(d) Upon original sighting in the distance, object appeared to be approaching observers in a straight line of flight to within 10 to 20 feet of auto and the length of time of approach was from 10 to 15 minutes. Object then approached to within 6 to 10 feet of auto. One observer opened the door of auto and was met with a frigid blast of air. Observer flashed light toward object, object withdrew 10 to 20 feet. The observer reentered auto and proceeded to leave the area at a speed of 50 to 60 miles per hour. Observer stated that the object followed auto at a distance of approximately 20 feet to the right and slightly behind for a distance of approximately one mile. Observers traversed many dips in the road, but object followed and did not vary from straight line of flight. Auto made a sharp turn to the left, object made turn without deviation.

(e) As auto traversed a deep dip in the road, the object had disappeared when auto came out of the dip.

(f) Sighting time was approximately 30 to 45 minutes.

Comment

In incidents of this sort which involve a number of persons, but / young and impressionable age - with their known tendency for exaggeration or desire for publicity - each principal should have been interrogated

separately - and a comparative analysis made of the 4 stories.

Thus it would well inevitably indicate the veracity or reliability of the principals, and the story as a whole.

STATEMENT

STATEMENT

STATEMENT

Statement made by A/3c [REDACTED]

Well around 2230 hrs. 24 January, 1957, we went down Charleston Blvd, to Nellis Blvd; and then own up a dirt road on Sunrise Mountain about 1/2 mile after the second turn off we turned around and parked to the right side of the road. We had been there a few minutes, and one of the girls noticed a blue tenge light just to the rear of the car, about two miles away. One of the girls got scared and started to cry, so I told them the lights were probably reflecting from Bolder or some where; so we didn't pay any attention to it till later when one of us noticed that something solid, long, and narrow seem to be to the rear and to the right of the car, about that time Frank noticed a car coming up the road, towards the mountain so we started the car and began to come down the road. We watched this long black thing, seem to stick to us like glue, around 20 feet out in the ~~darkness~~ desert, at 70 MPH it didn't vary in distance from us from the time we started till it left us when we turned to turn right, and then we came straight down to Nellis Ave.

There were four of us in the car, my self, Miss [REDACTED] and two others name unknown.
