Insufficient data:

06/02/02 + 01/02/02 Mar

(1) Claim to have observed a object through a 200x telescope (apparently a good instrument with a azimuth and elevation scale) yet did not state which way or direction they were looking.

(2) Claimed object followed airlines — yet check of area reports — shows not one single report of anything unusual from air ground radar or other units in the area. (Insert data to evaluate) 576
