10. BRIEF SUMMARY OF SIGHTING  Rnd obj, appeared to be slightly larger than the planet Mars, red-orange. Traveling at terrific speed. Two rpts, both essentially same w/the exception that one estimates the duration as 2 mins and the other, 5 mins. Both give the same DTG but no mention is made of observers being together at the time of observation.		No confirmation of satellite track; however, sighting is characteristic of orbital observation. 1958 Gamma was visible fm 26 Mar - Jun 28 '58. Case considered probable 1958 Gamma or Sputnik III.
