BOLIDE OF 1958 JULY 4/5
A.M.S. No. 3572
F. B. EASON and C. P. OLIVIER

On this date at $13:07 \pm$ E.S.T. a brilliant bolide appeared over the off the North Carolina coast. We owe to the late F. B. Eason, good reports from in or near on, N.C. But these come from an area to furnish a solution and pilot of a plane, well to the

southeast over the Atlantic, sent in a report which would be the key, but it is so incomplete as to be almost worthless. Two other planes saw it but apparently reported no data. At Wilmington, the path was from south to north at an angle of $29^\circ \pm$, from 3 estimates. The apparent diameter was from 15' to 30',

— 16 —

and before the explosion it was blue-white in color. The bolide was so brilliant that it was seen from places over 300 km away but no usable reports were received from such places. One excellent report was from C. W. Hallin in the control tower of New Hanover Airport, Wilmington, N.C. He saw the whole path. His coordinates were: $a_1 = 252^\circ$, $h_1 = 20^\circ$; $a_2 = 230^\circ$, $h_2 = 0^\circ$, angle to horizon estimated 25° , duration 7 sec., trail 3 seconds. One Wilmington observer confirms $h_2 = 0^\circ$, another that it disappeared behind trees. Indirect reports from radio operators

in Williamston, Elizabeth City and Norfolk state that, when it burst, every color of the rainbow was seen, and that it apparently fell into the ocean, off Cape Hatteras. Not having a list of radio operators, there was no way of checking reports from these sources. However, it is almost certain that the bolide or its fragments did fall in the Atlantic. One single good report from a ship, or from one of the planes, would have permitted a good solution when combined with the Wilmington observations.

No Case (Information Only)

11 July 1958
Silver City, Texas

1958

CLOSE TEXAS SIGHTING: A strange cigar-shaped object, brightly illuminated with a trailing green glow, was reported by Mr. and Mrs. ██████████ of Silver City, Texas on the night of July 11th. The couple was awakened by the sound of wolves howling nearby, and got up to investigate. The UFO passed almost directly over their house, and was so close that they could hear the throbbing of the motor. It was traveling at great speed, but stopped twice and just hovered for a few seconds each time. The main body of the object was about 50 feet long, according to the witnesses, who watched it through field glasses.
