FLYING OBJECT REPORT (UFOB). THE FOLLOWING REPORT IS SUBMITTED

IN ACCORDANCE WITH AFR 200-2.

A. DESCRIPTION OF THE OBJECT

(1) SPHERE

(2) THE SIZE OF A QUARTER

(3) COLOR CHANGED FROM A BRIGHT WHITE TO A REDISH ORANGE

(4) 1

N/A

(6) LOOKING AT THE OBJECT AS A CLOCK; TO THE 5 O'CLOCK

AF IN : 1111 (20 June 59)

Page 1 of 4 pages

INCOMINT

PAGE TWO RJEDAHM 8

POSITION THERE WAS A BRIGHT RED SPOT. THIS SPOT REMAINED RED
THROUGHOUT THE SITING.

(7) SOME VERY SMALL SPARKS FELL FROM IT. DID NOT LOOK LIKE
EXHAUST.

(8) NO SOUND WAS HEARD

(9) NONE

B. DESCRIPTION OF COURSE OF OBJECT:

(1) THE INTENSE BRIGHTNESS OF THE OBJECT

(2) 92 MILS - AZIMUTH 5400 MILS

(3) 60 MILS - AZIMUTH 5440 MILS

(4) OBJECT SEEMED TO ORBIT THE SPOT WHERE IT WAS FIRST SIGHTED
FOR APPROXIMATELY FIVE MINUTES. LATER IT MOVED AWAY ON A
NORTHWEST HEADING. IT HELD THIS DIRECTION OF FLIGHT UNTIL
IT DISAPPEARED OVER THE HORIZON.

(5) DISAPPEARED INSTANTLY TO THE NORTHWEST.

(6) OBJECT WAS VISIBLE FOR 30 MINUTES.

C. MANNER OF OBSERVATION:

(1) GROUND VISUAL

(2) TELESCOPES ON AAA GUNS AND BINOCULARS

(3) N/A

AF IN : 1111 (20 June 59)

Page 2 of 4 pages

INCOMINT

PAGE THREE RJEDAHM 8

D. TIME AND DATE OF SIGHTING

(1) 0400 GREENWICH MEAN TIME 17 JUNE 1959

(2) CIGHT

E. LOCATION OF OBSERVERS

47:30 NORTH 84:20 WEST SLIGHTLY NW OF SAULT STE MARIE, MICHIGAN

I DID NOT TAKE TACTICAL ACTION. AFTER AMASSING THE FULL REPORT FROM THE PEOPLE WHO SAW THE OBJECT, CONCLUDED THAT IT MAY POSSIBLE HAVE BEEN THE REFLECTION OF LIGHT, PRODUCED BY THE FURNACES OF THE ALGOMA STEEL COMPANY REFLECTED FROM A CLOUD OF SMOKE.

F. IDENTIFYING INFORMATION ON AN OBSERVER

COMMENTS OF PREPARING OFFICER: 1ST LT. L.M STINGLEY ON DUTY.

WHEN AAA FIRST REPORTED THE OBJECT, THEY REPORTED IT AS A WHITE LIGHT WITH A FLASHING RED LIGHT ON TOP., WHICH WAS IN ORBIT. I

ASSUMED THAT THIS WAS PROBABLY A CARGO OR PASSENGER TYPE A/C EQUIPPED WITH A GRIMES LIGHT. THE OBJECT COULD NOT BE PICKED UP BY ELECTRONIC MEANS, NOR COULD AAA PICK IT UP ON THEIR RADAR. SINCE THE OBJECT WAS NOT IN AN ADIZ, AND WHEN IT DID MOVE IT MOVED TO THE NORTHWEST, PLUS THE FACT THAT NO ONE HAD ELECTRONIC CONTACT WITH THE OBJECT

UFO ANALYSIS SHEET

Location Sault Ste. Marie (Camp Lucas), Michigan

Date 16 June 59 Hour (22) 0400Z

WX 6000' broken, vis 1.5 miles, winds SW @ 25K and NE @ 30 to 40 Knots

Description Sphere, size of a quarter, color changed from a bright white to a reddish orange, at objects 5 o'clock position there was a bright red spot. Some very small sparks fell from object, did not look like exhaust. First seen 92 mls (5 deg) above horiz @ 303 degrees, (over)

Direction of Motion Northwest

Satellite: (AFCIN-4F3, Phone 69219) Ruled out

Astronomical Phenomena (Meteor, Comet, Planet, etc) Ruled out - object only moved about 1 1/2 degrees in 30 minutes.

Radar Analysis (AFCIN-4E1) None

Natural Phenomena (Ball Lightning, etc) Ruled out

Aircraft, Balloons, Airships, etc. Ruled out

Other Probably a reflection - however, there is insuff data to form a valid conclusion.

Evaluation of Source Reliability

Analysis and Conclusions: The object moved only about 1 1/2 degree in 30 minutes. If the reported visibility is correct, this might account for the apparent large size. The disappearance of the object was prob. due to the wind dispersing the clouds. The reason for the small vis. was not given, and the wind direction below 10,000' was not given. Therefore, it is not known if the wind direction is correct to move the clouds to the NW. There is insufficient data to form a valid conclusion.

last seen 60 mils (3.5 deg) above horiz @ 305.5 degrees. Object seemed to orbit the spot where it was first sighted for approx five minutes, then it moved away on a NW heading until it disappeared over the horizon. Object was visible for 30 minutes. Object was viewed through AAA gun scope and binoculars.

approx. point where
object was reported
is approx 4000 ft in
elevation. Elevation

~~approx 4000 ft~~ is approx
1988 ft. ~~at Henderson~~

The mountain range
to the SW of Henderson
rise to as high as
7979 ft, starting at
3000 ft just SW of
Henderson.

~~████████████████████~~
Oklahoma City 6, Okla.
18 July 1959

Dear Major Tacker:

I refer to your letter of 10 July 1959, concerning Unidentified Flying Objects.

✓ I would like to know that name of the present director of Project Bluebook.

✓ At the present time, I have lend the UFO photograph I mentioned out for a private analysis. However, when I receive it back. I will forward it. Should I send it to your office or directly to the ATIC?

He wants to know
Is there any copy of JANAP 146 nearer than Washington, D. C.? For example, is there one at Tinker Air Force Base, here in Oklahoma City? If do, may I examine it?

✓ When is the evaluation of the Henderson, Nevada UFO sighting of 16 June 1959 expected to be complete?

✓ I would also like to request the ATIC conclusion(s) on the UFOs sighted by Captain ~~████████████████~~, of the Pan American World Airways System on 11 July.

Sincerely,

~~████████████████████~~

Lawrence J. Tacker
Major, USAF
Executive Officer
Public Information Division

UFO Reports

SAFIS-3 (Major L. J. Tacker)

11 AUG 1959

1. The following information is in answer to items checked in Mr. [REDACTED]'s letter, copy attached:

- a. Your office is aware of the identity of the present project officer.
- b. The photograph should be sent directly to the AFIC with the original negative and the following information:
 - (1) Type of camera.
 - (2) Type of lens.
 - (3) Shutter speed.
 - (4) Diaphragm opening.
 - (5) In what direction was camera pointed?
 - (6) Location of sun, if taken during the day.
 - (7) The exact time of day.
 - (8) Sky condition.
 - (9) Location of observer.

c. The lights sighted from Henderson, Nevada were evaluated as probably aircraft lights. The Aircraft Lighting Systems Branch of WADC was contacted and they disclosed that most of the present aircraft have two tail lights, one yellow and one white. On some aircraft, such as the F-100, the light is up high on the vertical stabilizer and can be seen from almost any angle. The setting of the switch by the pilot determines whether it flashes or is steady. If the white light is burned out, only the yellow light will be seen. If both are lit, they will have a slight yellow-orange tint. The location of the lights given by the witness is on airway V-21 and V-8 which run NE to SW. The apparent descent probably was due to the rising of the terrain south of the witness' location. There is nothing to indicate that the lights were anything more than the tail lights of aircraft.

2. The streak and object sighted by Miss [REDACTED] and her friend have all the characteristics of a high altitude aircraft leaving a contrail. The nautical almanac indicates evening twilight ended at 2131 local time, and Miss [REDACTED] saw the object between 2030 and 2100 hours. At this time of day an aircraft will appear very bright as it is up high enough to reflect the sun's rays. The fact that the witnesses observed it in the west bears out the ATIC conclusion that they saw an aircraft leaving a contrail. Copy of letter attached.

3. Mr. [REDACTED], Covina, California submitted an UFO report and a portion of roll film. The following additional information is required in order to make an analysis of the sighting:

- a. Was the film used 16MM film split to be used in an 8MM camera?
- b. Was the camera used a still or movie camera? What was the make of the camera?
- c. Did the camera have sprockets for transporting the film, or was the film transported by friction?
- d. What was the shutter speed and lens opening used while taking the pictures?
- e. Was the camera hand held, or was it on something sturdy?

4. Request Mr. [REDACTED] send the original negative of the print he submitted to ATIC for analysis. Copy of Mr. [REDACTED] letter attached.

5. Reference letter from Mr. [REDACTED], copy attached. The ATIC cannot operate a photographic distribution center. The cost of material and the number of manhours required would be prohibitive. Suggest Mr. [REDACTED] contact the owners of the photographs, as they are returned to the owners by this Center.

6. Reference letter from Mr. [REDACTED], copy attached. The ATIC agrees with Mr. [REDACTED] conclusion as to the nature of his sighting. The haze, in conjunction with the hot air, will sometimes create weird phenomena.

FOR THE COMMANDER:

CORDON C. HOFFMAN
Colonel, USAF
Actg. Deputy for Sciences
and Components

5 Atch:

1. Ltr dtd 16 July 59, fr Mr. [REDACTED]
2. Ltr dtd 12 July 59, fr Miss [REDACTED]
3. Ltr dtd 25 July 59, fr Mr. [REDACTED]
4. Ltr dtd 29 July 59, fr Mr. [REDACTED]
5. Ltr dtd 5 July 59, fr Mr. [REDACTED]

2 September 1959

Dear Mr. [REDACTED]:

This is to acknowledge your letter of 16 July 1959 requesting information on the subject of Unidentified Flying Objects.

The present project officer for "Project Bluebook" is Major Robert J. Friend.

The UFO photograph you mention should be sent directly to the Air Technical Intelligence Center at Wright-Patterson Air Force Base, Ohio, with the original negative and the following information:

1. Type of camera.
2. Type of lens.
3. Shutter speed.
4. Diaphragm opening.
5. In what direction was camera pointed?
6. Location of sun, if taken during the day.
7. The exact time of day.
8. Sky condition.
9. Location of observer.

To my knowledge, there are no copies of JANAP 146 at Tinker Air Force Base. Therefore you will have to visit this office to read this directive.

The light sighted over Henderson, Nevada, on 16 June 1957 was evaluated as aircraft lights. The Pacific sightings of 11 July 1959 were attributed to exceptionally bright and large meteors known as "fireballs."

Sincerely,

LAWRENCE J. TACKER
Major, USAF
Public Information Division
Office of Information Services
