ATIC FORM 329 (REV 26 SEP 52)

Maple Heights, Ohio
September 15, 1959

SUBJECT: U.F.O. Sighting - Area: Cleveland, O. - September 14, 1959

U.F.O. Project Officer
Wright-Patterson Air Force Base
Dayton, Ohio

Gentlemen:

Following is a report of a U.F.O. sighting made at approximately 19 hundred hours, September 14, 1959.

LOCATION: West of Maple Heights, O. - estimated to be considerably in excess of ten miles distance.

HEIGHT: Probably 50,000 feet or more.

SIZE: Slightly larger and brighter than North Star when viewed with the naked eye.

MOVEMENT: None (from viewing position) Observed for ten to fifteen minutes until obscured by dark clouds in western sky.

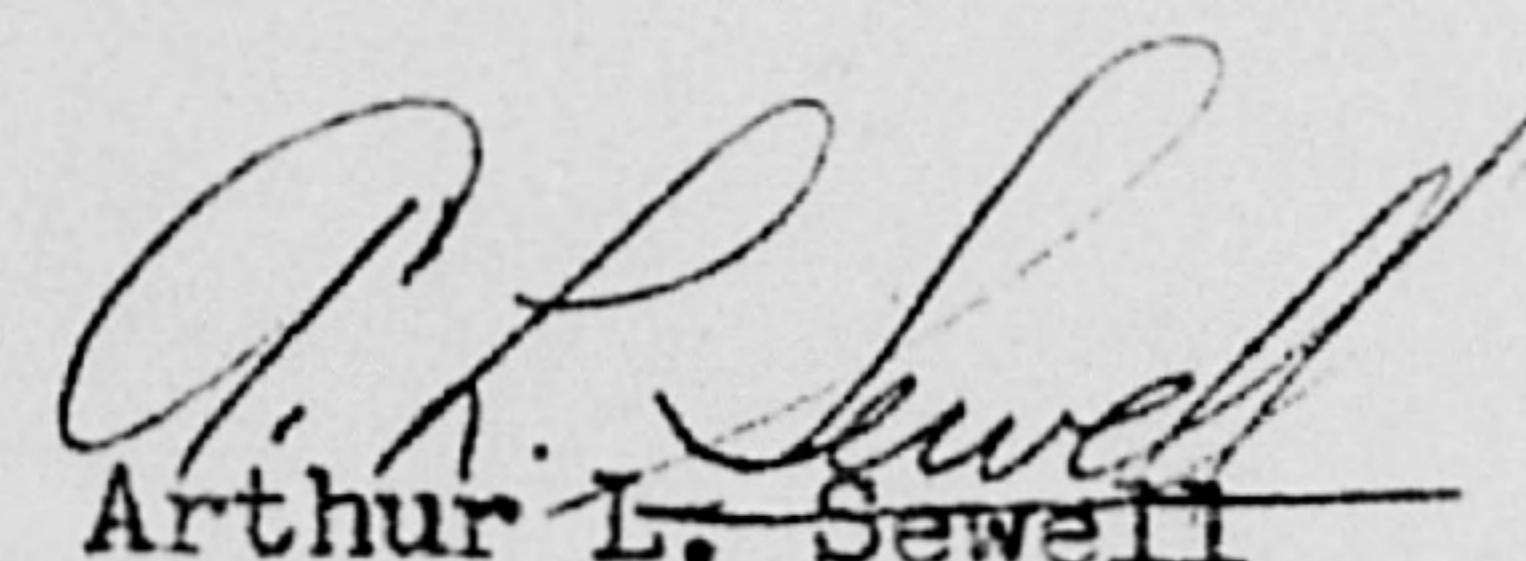

OBSERVATIONS WITH 50 POWER TELESCOPE:

SHAPE: Elliptical (vertical) 20 percent off perfect circle.

COLOR: Light tan, believed to be reflecting color of setting sun as though through the object. Appearance is that of sun's rays passing through a white or silver translucent object.

HEAT INDICATIONS: Object gave off dancing heat waves to distance of about 10 percent of its size.

CONCLUSION: Object could be a huge weather balloon if inflated with very warm air or gasses of sufficient temperature to cause heat waves in cold upper atmosphere.

Had brilliant object about size of pin head (larger than V star) called to attention at approximately 7008m while finishing dinner. When viewed through telescope (50x) it appeared about the size of a ten colored pea, was motionless, egg shaped, even on top & bottom (O) - gave off radiating lines such as heat waves over a hot stove - however, these were later considered imperfections in the telescope. Object retained in view until eventually covered by dark clouds (& layers of fleacy high moving clouds) which moved in off the horizon line. Object may have been solid; however, due to ten color felt the sun was sending light through it. Object viewed for about 15 minutes.
