10. BRIEF SUMMARY OF SIGHTING Two rpts giving essentially the same info. 1) Rnd obj large like a spotlight, white, very bright. 2) Bright white light closer than a star. No trail, sound, and very little movement.				11. COMMENTS Rptng official believed obj to be a star. Movement & duration of sighting conform to this conclusion. Star Regulus (Mag 1.3) was in the general direction of the rptd obj at 10° elev & ascending. It is probable that the obj observed was this star.
