Despite his age, [REDACTED] appears to be a competent observer. He reported what he saw and was restrained about jumping to conclusions. He was familiar with many technical concepts which aided in the interview. His mother's previous report probably gave him the confidence to turn this UFO in and did not appear to bias his report.

REPORT OF SUBSEQUENT INVESTIGATION

Patterson Field Ops

F-101 up at 1915. All F-104 returned. KC-135 landed at 1924. Four bright lights on it made it look "like a Christmas tree"--very unusual according to observer. The lights pointed toward the wings.

The possibility that the KC-135 might have been the UFO is intriguing. The pulsation seen by Spine might have been the result of a/c banking and turning. I called him up again and found that the only ~~other~~ noise he had heard was the propeller driven aircraft which apparently was coming in for a landing. He heard no jet planes and the prop a/c was not very loud. Heard no jets before or after the UFO sighting.

Wright Field Ops

Several falling stars noted. No WADC special projects tonight.

Balloon released at 6:30. Headed toward north, then started circling around to the east. Balloon broke 84 minutes later, azimuth 316°, altitude 86,000 ft. At 7:15, azimuth 333°, altitude 13,000 meters, range 46,700 meters -- "just about where the fellow saw it"; velocity, 23 meters/sec or 45 kts. At 6:30, cloud coverage was scattered with some altocumulus. Wind direction 333°.

Balloon might have been in the sun at 7:15 but the weather bureau man wasn't sure.

Cox

No unusual reports. T-33 with lights made ILS then VFR to Patterson. Hazy at time of UFO sighting, would prevent low altitude sightings of phenomena at Wright Field.
