Low flying object about 2 to 3 miles above the earth - orbiting to the northeast - at very high speeds. No sound, and under a fairly cloudy area - The speed was faster than anything I've ever seen! No particular color, like a small meteor. It started above our heads and went to the northeast at very high supersonic speeds. The ones who saw it were as folling

[redacted] checked for the nearest sattelite it was suppose to have burned up in December, 1959, but was not sighted.

Thank you,
