10. BRIEF SUMMARY OF SIGHTING

Object 2 times as bright as 1st magnitude star, first seen 060° at 80° elev, last seen 080°, 40° elev, flight path was southerly followed by steady movement easterly. Viewed 3 min.

11. COMMENTS

The object moved S then E, ruling out the possibility of its being a star or planet and the duration ruled out a meteor. A description of the object, other than its brightness, was not reported. Due to the area of sighting, an investigation would not be practical. Due to the limited information reported, a valid conclusion cannot be made.
