7. LENGTH OF OBSERVATION few sec		8. NUMBER OF OBJECTS two		9. COURSE ---	
10. BRIEF SUMMARY OF SIGHTING Ball of dark black smoke in front of witness. No sound. One object behind the other. Witness always outside and saw object upon entering house.				11. COMMENTS Discussion with witness brought out the fact that when she saw the objects their position relative to her head was unchange even when she moved. She also had humming in her head. Further, she was usually emotionally upset prior to the sightings. A visit to the doctor brought out the fact that she suffered from high blood pressure. It is opinion of investigator that witness was seeing images due to excess blood in blood vessels of her eyes.	

SUMMARY OF ALLEDGED UFO SIGHTING

1. This case was investigated by personnel of the Aerial Phenomena Group.
2. The witness, when interviewed, again described the apparent appearance of the objects and the description was consistent with that reported on the phone during the initial interview. The investigator made a thorough search of the house and surrounding area in an effort to discover anything which could possibly be responsible for the sighting. This search revealed nothing to which the sightings could be attributed.
3. Further discussion with the witness brought out the fact that when she saw the objects their position relative to her head was unchanged even when she moved. When asked if she had any discomforting feeling, other than fear, when she saw the objects the witness replied that she had a humming in her head. Further interrogation brought out that the witness usually was emotionally upset prior to the sightings, and on a large number of occasions was seated outside and experienced the sightings after standing and entering the house. The witness stated that apprehension over her experiences had prompted a visit to the doctor; who diagnosed her case as high blood pressure.
4. It is the opinion of the investigator that the witness was seeing images due to the excess blood which was in the blood vessels of her eyes.
5. The probable conditions were explained to the witness and further she was advised as to what action she should take when having one of these experiences. The witness was further advised that she could prove the truth of the diagnosis by ~~shutting~~ shutting her eyes when having the next experience with the objects,, and advised that she should still be able to see them.

U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.
