Dear Sir:

On Jan 6th my wife observed a flying object through the living room window, and I immediately went outside, and saw enough that it was moving from about the direction SSE, rather low on the horizon. I thought at first that it was an airplane, but when we intended could not hear a sound, it also interfered with the T.V. [REDACTED]

I have said previously, the object that my wife and I observed, did not make any sound, there was no definite outline or shape. Only the two intense yellow lights. When it disappeared from my wife's view, she claims it went over the house, but I believe it went to differ [unclear] her statement, to differ [unclear] soon after my [unclear] when I ran after my [unclear] and I turned [unclear] [unclear]

unable to see it at any position
in the sky, and I know that
there was not a quiet time

my glasses, and it had to vanish or calculate
with great speed in order to
pass out of the picture.
