7. LENGTH OF OBSERVATION 7 min	8. NUMBER OF OBJECTS 1	9. COURSE NW
10. BRIEF SUMMARY OF SIGHTING Round objt, size of pea, changing white to red, continuous light until disappearance. Observed in level position at 2 o'clock. Disappeared on horizon at 2 o'clock. Objt appeared stationary. Spokane center called and confirmed a target was in contact moving rapidly to NW, suggesting objt moving away giving no apparent az movement. No break up or diminishing in intensity was noted prior to disappearance. Sighting speed estimated at 1050 knots by Spokane Center.		11. COMMENTS Appearance of objt and its azimuth from the observer suggests that it was probably planet Venus. From witnesses' location and altitude planet would have been just on horizon and atmospheric refraction could have been responsible for illusion of motion and caused color change. It is believed that objt reported by radar was not related to visual sighting other than by possible cause of both being due to atmospheric refraction. The objt of this sighting was probably planet Venus.
