Hon. Bruce Alger  
WASHINGTON, D. C.

Dear Sir:

At exactly 4:07 AM CST early Thursday morning, March 9th, I was out in my back yard doing a bit of amateur stargazing....hoping to see the polka-dot 12 footer, and I SAW A BIG, extremely fast, unidentified object streaking from about NE to SW across the sky. It moved so fast was hard to focus on it, but I DO remember quite a bit of the impression it left with me.

This object, seemingly, moved so darn fast that I would never have given it much later thought, except that the 7:00 AM news that morning carried big story that the Russians had orbited a dog, etc. in a 5-ton rocket.

If whoever looks after things like that should happen to want my impressions of this thing I saw, I would be glad to tell them what I remember. I know this is rather a silly letter, but I wanted to 'tell someone', and, naturally, I AM curious as to whether the time coincided with what we might know of when their rocket came down.

Sincerely,

[REDACTED]

Just in case this should be a possible  
sighting of the afore mentioned Russian "vehicle,"  
let me know. Otherwise, forget it, and  
I'm sorry to have troubled you. (I do  
not have much hope that anyone else  
would have seen "this" — it moved so  
rapidly — unless they were real "pros.")
