7. LENGTH OF OBSERVATION 3-5 sec		8. NUMBER OF OBJECTS 1		9. COURSE SE-NW	
10. BRIEF SUMMARY OF SIGHTING Size and shape of dime held at arm's length. Greenish white with tail about twice the length of body of objt. No exhaust; no sounds. High speed; high intensity light. Angle of elevation aprox 20° above horizon arcing upward fm SE to NW.				11. COMMENTS Objt moved in wrong direction for it to have been a satellite reentry. Objt has all characteristics of a very bright type of meteor called a fireball. Duration and apparent long flight path suggests a very high meteoric speed.
