10. BRIEF SUMMARY OF SIGHTING

Ltr frm lady reporting objects viewed at night. 1. Jun 14 shortly after 2 am object in E golden, round w/ragged edges 10-12" across, very bright, disappeared at sunrise. Observed on 4 nights in Jun subsequent to 14th. Did not appear during Jul; appeared in Aug only smaller. 2. Sep 15 bright object in E. Had 3 objects within which would flare up about every min. Not transparent. 3. Sep 15 at 3:50 a.m. object in E. Oblong with 5 spokes. Would fade away and reappear. 5 or 6 times.

11. COMMENTS

Observation of astronomical bodies. First object being Venus. The second Venus and Cirus. The third Regulus.

Dear Miss [redacted]

Your recent letter addressed to the Technical Intelligence Center concerning unidentified flying objects has been referred to this office.

From the description of the sightings seen by your friend we have been able to establish probable identity of the objects. The first object was probably due to atmospheric refraction of the planet Venus. The objects of the second sighting were probably Venus and the bright star Sirius. The object responsible for the third sighting was the bright star Regulus.

I hope that this information is helpful.

Sincerely,

WILLIAM T. COLEMAN, JR.

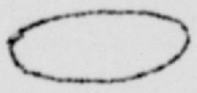
Gentlemen:

I received the following information from a friend of mine living in Bucyrus, Ohio, who tells me she has not informed you of it. Although quite late with it, I am taking it on myself to inform you in case it may be of a little service to you. She told me:

"On September 13th I was away from home and did considerable standing and walking--much more than I was ascustomed to so that after retiring I would catnap and then lie wakeful again. At 2:40 on the morning of the 14th I arose and stood at the east window looking out. A few minutes later I saw a very bright object coming up through the tree branches. It kept rising higher and higher and after it was above the tree-tops it appeared rather oval shaped and, to me it seemed about 5 or 6 feet high, was transparent, and had 3 objects within it which kept flaring up and dying down every minute or two. This object looked about like this:

"A little later I saw another object, very similar in shape, brightness ans size as the first one, only it was not transparent and did not have the three things visible within it altho it was lit up also. It followed the same direction as the first. Thus:



"After a while, I saw a third bright object rising through the outer branches of another tree. This looked to be about 6 feet high and had 5 things (I call them spokes). The whole thing was illuminated and was very bright and shone--color was light silver. Like this:

"All three of these objects kept moving higher in the heavens and moving very slowly to the south. I watched them until 4:15 at which time they were about at a 45° angle in the sky and appeared to be about a block and a half apart.

"This makes 5 objects that I've seen in the sky since a year ago last August."

This party does not sleep too soundly and often gets up to watch the eastern sky and says she often sees strange moving objects and in every case they seem to be rising higher and moving to the south.

Dear Mis[redacted]

Your recent letter to the Aerospace Technical Intelligence Center concerning unidentified flying objects has been referred to this office.

The first object viewed was probably due to atmospheric refraction of the planet Venus. The objects of the second sighting were probably Venus and the bright star Sirius. The culprit responsible for the third sighting was the bright star Regulus. The movements noted are normal for these objects as they progress along the slowly shifting ecliptic during the period of the sightings.

To date, no final conclusion as to the identity of the last object has been reached; however, it is suspected to be Lunik III.

I trust this information is helpful.

Sincerely,

Gentlemen:

Having noticed some unusual objects in eastern sky this summer and fall and being advised to report this to you (per adv. in Fate Magazine) is the reason I am writing you.

The first object noticed was on June 14th shortly after 2 A.M. appeared in eastern sky and was of a golden color with ragged edge, round and 10 or 12 inches across and very bright. Would disappear with arrival of daylight. Did not see it during month of July but noticed a similar object during August but only half the size as was seen in July. Was seen on four different nights during June and after the 14th.

On Sept. 15, 2:45 A.M. noticed a bright object near top of trees to the east and in about 15 minutes this appeared over top of tree then I noticed a similar object -- same size. First one was illuminated, had three objects within which would flare up then recede about once every minute. The second one was not transparent like first one. Both were the color of a coal-oil light flame.

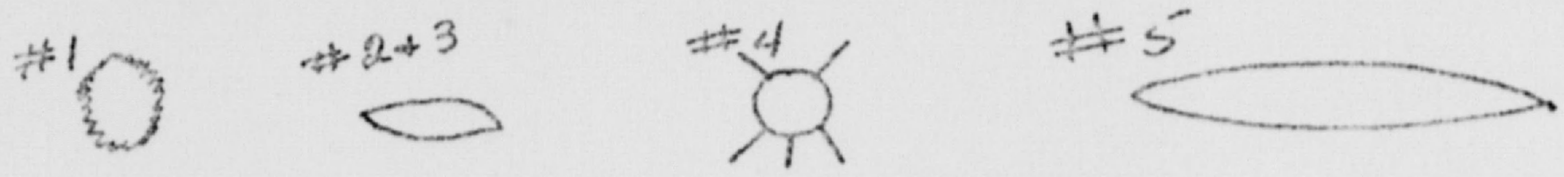
At about 3:50 A.M. also on Sept 15th another object appeared in eastern sky, was oblong about 15" x 20" -- had 5 spokes, two on top and three below, was all illuminated and color like silver. At first appearance after a few minutes would fade away then in several minutes would reappear and this happened 5 or six times and after that was always visible. All three of these objects kept moving higher in the heavens and to the south and I watched them till 4:15 A.M. at which time all three objects were at about a 45 degree angle.

Also wish to report another object in sky and was noticed by my neighbors and myself August 14, 1960 while we were out in back yard waiting for "Echo" to appear. This object was about 8 x 30 ft, illuminated, of a golden color, coming from east and going west and appeared just above tree tops, and within a minute or two had disappeared over the tree tops to the west of where we were.

I have trouble getting to sleep some nights which is the reason I happened to see these things.

I would appreciate hearing from you as to whether you have had reports from others who may have seen them, also whether they are from a foreign country or of our own.

Below is marked the shape of the objects seen:



Sincerely

s/[redacted]

No Case (Information Only) 3 Jun 1961 Italy

Source: Flying Saucer Review (Jul-Aug 63)

I went out in a motorboat with Giuseppe Pordoi, businessman, Filippo Marin, office employee, and Silvano Guardiabate, owner of the boat. When quite a good distance out to sea, we shut off the engine and sat there chatting and enjoying the morning breeze. It was 6.35 a.m. on June 3, 1961.

Suddenly the rocking motion of the waves increased, and the boat began to roll badly. We looked around, thinking it must be due to the proximity of one of the many tankers that put into our port, but nothing of the sort. At a distance of a kilometre from us, the surface of the sea was rising like an enormous ball, with long billows going out from it on all sides. Dumbfounded, we were still wondering what it was when, suddenly, a strange contraption rose up from the bulge of water. Perhaps it was one of the celebrated flying saucers, for the lower part of it looked like a plate upside down and the upper part ended in a cone. While it was emerging from the sea, the water was thrust away all round it, as by a cushion of air. After it had emerged completely from the sea, it stayed still for a few seconds at a height of 50 metres or so, and then rocked slightly a few times. Then a halo formed round the base of it, and the thing shot away very fast across the sea and vanished towards the north-west.

Here again we have plenty of food for thought. How often we have seen accounts in which witnesses—often simple peasants—tried to describe this moment when a saucer, having risen to a height of a few feet, pauses very briefly, absolutely still, then dips or rocks sideways or up and down a few times, before shooting off at vertiginous speed?

It seems possible that, in addition to the subterranean bases of which we have just heard, there are also underwater bases, too. But are they the bases of the same type of beings? Does anybody know?

Incidentally, Signor Bruno Ghibaudi, whose remarkable story has been told in the May-June issue, took some excellent photos of three saucers flying in formation above the Adriatic shore of Italy, near Pescara, in April, 1961. These pictures are published in the Italian illustrated weekly *Le Ore* for January 24 last, and one of the captions under the photos is of particular interest as it reads: "There are eyewitness accounts from fishermen who have often seen the saucers, *and even seen them emerging from the sea.*"

Bruno Ghibaudi says that the number of definitely ascertained landings on the Earth now total 2,000, and the reporting sightings at least 20,000. It was stated in *La Domenica del Corriere* last year that there had been at least 200 landings in Italy alone. The latest one of these to be mentioned in *Le Ore* of January 24 of this year. The report states that a 45-year-old farmer, Antonio De Leone, saw a grounded saucer at a distance of 50 metres from his house at San Pietro Vernotico (Brindisi) on January 17. The disc, enveloped in a dazzling greenish light, was standing in the open field, and in the mists of it he could see several people wearing strange clothing. Shortly afterwards the disc took off and disappeared towards the north-west.

June 3: Manasca, Wisc. Reported by Police Chief Rod Taubel, a UFO was seen maneuvering over the area.

Washington 25, D.C.

Dear Major Coleman:

We have a report that a UFO maneuvered over Tyndall AFB, Florida, on the morning of May 20th of this year resulting im an attempted intercept by USAF aircraft. Will you please send us the Air Force conclusion on this case?

Also the conclusion on the June 4, 1961, sighting of a large "cigar" or ellipse with several satellite objects over Blue Ridge Summit, Penna.

Thank you for your attention to this matter.

Sincerely yours,

[redacted]
Secretary of NICAP

June 4, Blue Ridge Summit, Pa. -- A cigar-shaped or long elliptical UFO with a cluster of smaller unidentified objects were sighted in the early afternoon by Mrs. James W. Amos, librarian. At first the UFOs were motionless, then the smaller objects streaked across the sky to the large object. The UFOs were then obscured by trees in the foreground of the NE sky. [illegible] observation about ten minutes.

4 JUNE 1961

25 August 1961

Dear Mr. Hall:

Reference is made to my recent telephone conversation with you concerning the findings arrived at by ATIC relative to two UFO sightings.

The case of May 20th near Tyndall AFB, Florida has not been concluded. As soon as the evaluation has been completed we will advise you of the outcome.

Could you provide more details of the Blue Ridge Summit sighting of June 4th? From the information you have provided we are not able to find any material related to this sighting.

Sincerely,

WILLIAM T. COLEMAN, JR.
Major, USAF
UFO Project Officer
Public Information Division
Office of Information

Mr. Richard Hall
Secretary
National Investigations Committee
on Aerial Phenomena
1536 Connecticut Avenue, N.W.
Washington 6, D.C.

June 7: Helna, Mont. A UFO alternately hovering and moving at high speed, estimated at 100 feet in diameter by Under-sheriff Reed Collings, also was sighted by numerous Helena citizens. Collings, who observed the UFO with high-powered binoculars, said it seemed to be made of a "clear plastic" or similar material. A suggested "balloon" answer was ruled out by the UFO's high rate of speed when it disappeared on a southwest course. The weather bureau also stated it had no record of any balloon in the area.

June 9: Charleston, S.C. A rapidly moving round object, sighted between 10:30 and 10:45 a.m., was reported by three witnesses. One watching it with binoculars, described it as "fairly small, white with black around the edges. The 792d Aircraft Control and Warning Squadron stated that all objects appearing on its radar screens at the time had been identified.

No Case (Information Only)

10 June 1961
Wheaton, Illinois

....A tear-shaped object was seen speeding over Wheaton, Illinois, last June 10th by a 19-year-old youth named Barry Stark. "It was moving from north to south, said Stark. "Then it stopped and moved to east and west three times, and finally went off to the southeast." Stark described the UFO as moving with the "blunt end forward," with flashing white lights...

June 12: Waynesville, Ohio. An unknown object, described as "a ring of smoke with a ball of fire swinging around the ourside," was seen for five minures, before disappearing on a NE course.
