| 10. BRIEF SUMMARY OF SIGHTING<br>Bright object in sight for 10 seconds. Spotted NW of a/c heading NNE. Object changed brightness in four stages. Flat trajectory; CIRVIS report evaluated no threat. |  |                                                                                                                                                                                                       |  | 11. COMMENTS<br>Duration indicates meteor observation, however the changes in brightness in stages is inconsistent therefore the case is listed as insufficient data due to the brevity of the report.                                                                                                                                                                                                                                                                                                                                                                                                      |  |
