| 10. BRIEF SUMMARY OF SIGHTING<br>Object like 3/4 moon, size of a half-dollar orange in color. No motion. Object would diminish in size to disappearing point over a five minute period and then rapidly regain it's large size. Repeated cycle during entire observation of 3 1/2 hours. |  |                                                                                                                                                                                                       |  | 11. COMMENTS The witnesses were at a drive-in theater and there was no other report of the object. The object remained in one position throughout the sighting. The reporting officers indicate that the object's location was on an azimuth that would place the object over Westover AFB. There were high thin cirrus clouds at the time, plus a temperature inversion from 8-9,000 ft. A <del>XXXXXX</del> light from an unknown source was probably reflecting off the inversion layer rather than the clouds, since it did not move. Case is evaluated as a reflection from this inversion.                    |  |

MR [REDACTED] WAS UNAVAILABLE AND IT HAS NOT BEEN POSSIBLE TO MAKE CONTACT WITH HIM. SINCE THE MOON ROSE AT 8130Z AND WAS IN ITS LAST QUARTER, THIS CAN BE RULED OUT. | 10. BRIEF SUMMARY OF SIGHTING<br>Bright yellow balls of light. Brighter than stars and a lot closer. Faded away to the East. Object as bright as the moon. Three lights always in same relative position to each other. Appeared in North and disappeared in East. Speed constant. Slight dip in flight path, but direction remained the same. |  |                                                                                                                                                                                                       |  | 11. COMMENTS<br>The object of the sighting was in all probability an a/c. Sighting was at night and only lights were visible. The witness indicated that it was a bright night, yet the moon was only 0.28 illuminated as viewed from the Earth and it was low on the horizon. No evidence that would indicate that this was not misidentification of an a/c.                                                                                                                                                                                                                                     |  |

21. How large did the object appear to you as compared to an object with which you are familiar?

IT WAS NOT QUITE AS BIG AROUND AS THE MOON, BUT IT WAS A LOT CLOSER THAN THE MOON.

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

IT WOULD HAVE COVERED ABOUT  $\frac{1}{10}$  OF IT

23. Did the object disappear while you were watching it? If so, how?

YES IT JUST FADED SLOWLY AWAY, AND WE DID NOT SEE IT AGAIN.

DATE 9-7-61

On the 9-6-61 I went out to [REDACTED] house to see [REDACTED], who were visiting her. About 15 until 10 [REDACTED] and I walked out of the house and down the drive way. We were looking at the stars and I thought I heard a rabbit or something in the bushes and so I looked around. When I didn't see anything I glanced up at the sky and then was when I saw it. We watched it for a while and then we ran to the house to get [REDACTED] and her mother. When they came out the object was a lot closer. We were standing there watching it and it moved toward us, then it turned and moved east. We watched it until it faded away. While it faded away it turned to a blue and back to a bright yellow.
