5. PHOTOS ☐ Yes ☐ No		6. SOURCE Civilian		☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical	
7. LENGTH OF OBSERVATION 20 min		8. NUMBER OF OBJECTS 1		9. COURSE NW	
10. BRIEF SUMMARY OF SIGHTING Brilliant elliptical object, size of fifty cent piece while viewed in theololite. Moved rapidly.		11. COMMENTS Info in initial and subsequent report is too general to allow a valid conclusion. It is possible that objt was a high flying a/c at an altitude where a ground observer could not determine the shape, and in such a position that all that could be seen was a bright spot. Due to the absence of more detailed info, this report is categorized as insufficient data.
