5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Civilian		
7. LENGTH OF OBSERVATION 1-15 sec 2-Not Repeated	8. NUMBER OF OBJECTS 1 EACH A TIME	9. COURSE Varied	
10. BRIEF SUMMARY OF SIGHTING 1st sighting: Oval objt. reddish color NE 3 min after satellite going E. 2nd sighting: viewed about 1 hr later going W turning S and then E. Jet engin sound.		11. COMMENTS There were no known satellite reentries at this time. Color and flight path suggests a slow moving meteor. Objt was reported to be moving to NE, and as the earth is turning in this direction objt would appear to be moving slower than it would have if it were moving to W. Second sighting of a/c.	

19. *Amber Biscuit*;

On August 4, 1961, I went outside at 11:45 AM. At 2:15 AM, I spotted one of your satellites going over head. A 2:18 AM. I spotted a U.F.O. going N.E. The satellite was going E. Like the U.F.O. as I could make it out was oval shaped and a reddish color. I tracked it as far as I could with my eye and lost it going NORTHEAST. At 3:10 AM, I spotted it again and it was coming West, then it turned South, and then East again. The first time it went over, it didn't have any sound to it. The second time when it turned East again it had a jet-engine sound to it. I cannot figure out what it was. Do you know? If you do please answer this letter. Thank you. Sincerely yours,

Mr. [REDACTED]

UFO Sighting

Mr. [REDACTED]

Ashland, Kentucky

Dear Mr. [REDACTED]

Your letter to the Department of the Air Force, in which you report the sighting of a UFO, has been forwarded to the Foreign Technology Division. Your letter does not contain sufficient information for a valid conclusion; therefore, request you complete the attached form and return it in the attached self-addressed envelope.

Sincerely

EDWARD H. WINN

U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

4 Day AUGUST Month 61 Year

2. Time of day: 2 Hour 18 Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address: [Redacted]

City or Town: Ashland

State or Country: Kentucky

Additional remarks: NONE

5. How long was object in sight?

Hours Minutes Seconds

15

5.1 How was time in sight determined?

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

6. What was the condition of the sky?

DAY

a. Bright
b. Cloudy

NIGHT

a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight — pitch dark
- d. Don't remember

9. The object appeared:

(Circle One):

a. As a light

RED

b. Shiny

c. Dark

d. Don't remember

10. If it appeared as a light, was it brighter than the brightest stars?

NO

11. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	<input checked="" type="radio"/> No	Don't Know
b. Suddenly speed up and rush away at any time?	Yes	<input checked="" type="radio"/> No	Don't Know
c. Break up into parts or explode?	Yes	<input checked="" type="radio"/> No	Don't Know
d. Give off smoke?	Yes	<input checked="" type="radio"/> No	Don't Know
e. Change brightness?	Yes	<input checked="" type="radio"/> No	Don't Know
f. Change shape?	Yes	<input checked="" type="radio"/> No	Don't Know
g. Flash or flicker?	Yes	<input checked="" type="radio"/> No	Don't Know
h. Disappear and reappear?	<input checked="" type="radio"/> Yes	No	Don't Know

12. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

it moved behind:

13. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

in front of:

14. Did the object appear: (Circle One): a. Solid b. Transparent c. Vapor d. Don't Know

15. Did you observe the object through any of the following?

a. Eyeglasses	Yes	<input checked="" type="radio"/> No	e. Binoculars	Yes	No
b. Sun glasses	Yes	<input checked="" type="radio"/> No	f. Telescope	Yes	No
c. Windshield	Yes	<input checked="" type="radio"/> No	g. Theodolite	Yes	No
d. Window glass	Yes	<input checked="" type="radio"/> No	h. Other	<i>EYES</i>	

16. Tell in a few words the following things about the object.

a. Sound NONE

b. Color KIND OF A DULL RED

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any parts of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

O<NE

18. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there?

Draw a picture of how they were arranged, and put an arrow to show the direction that they were moving.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

B

H

21. How large did the object appear to you as compared to an object with which you are familiar?

•

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

all on it

23. Did the object disappear while you were watching it? If so, how?

NO

24. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

an egg

25. Where were you located when you saw the object? (Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

26. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it? .

*On my way home from night work
and I saw a very bright light just
above the ground, the light was
extremely bright, at 3480ft. I don't know what it was*

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes _____ No _____

29. What direction were you looking when you first saw the object? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest
			i. Overhead

30. What direction were you looking when you last saw the object? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest
			i. Overhead

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North (thru east) and also the number of degrees it was upward from the horizon (elevation).

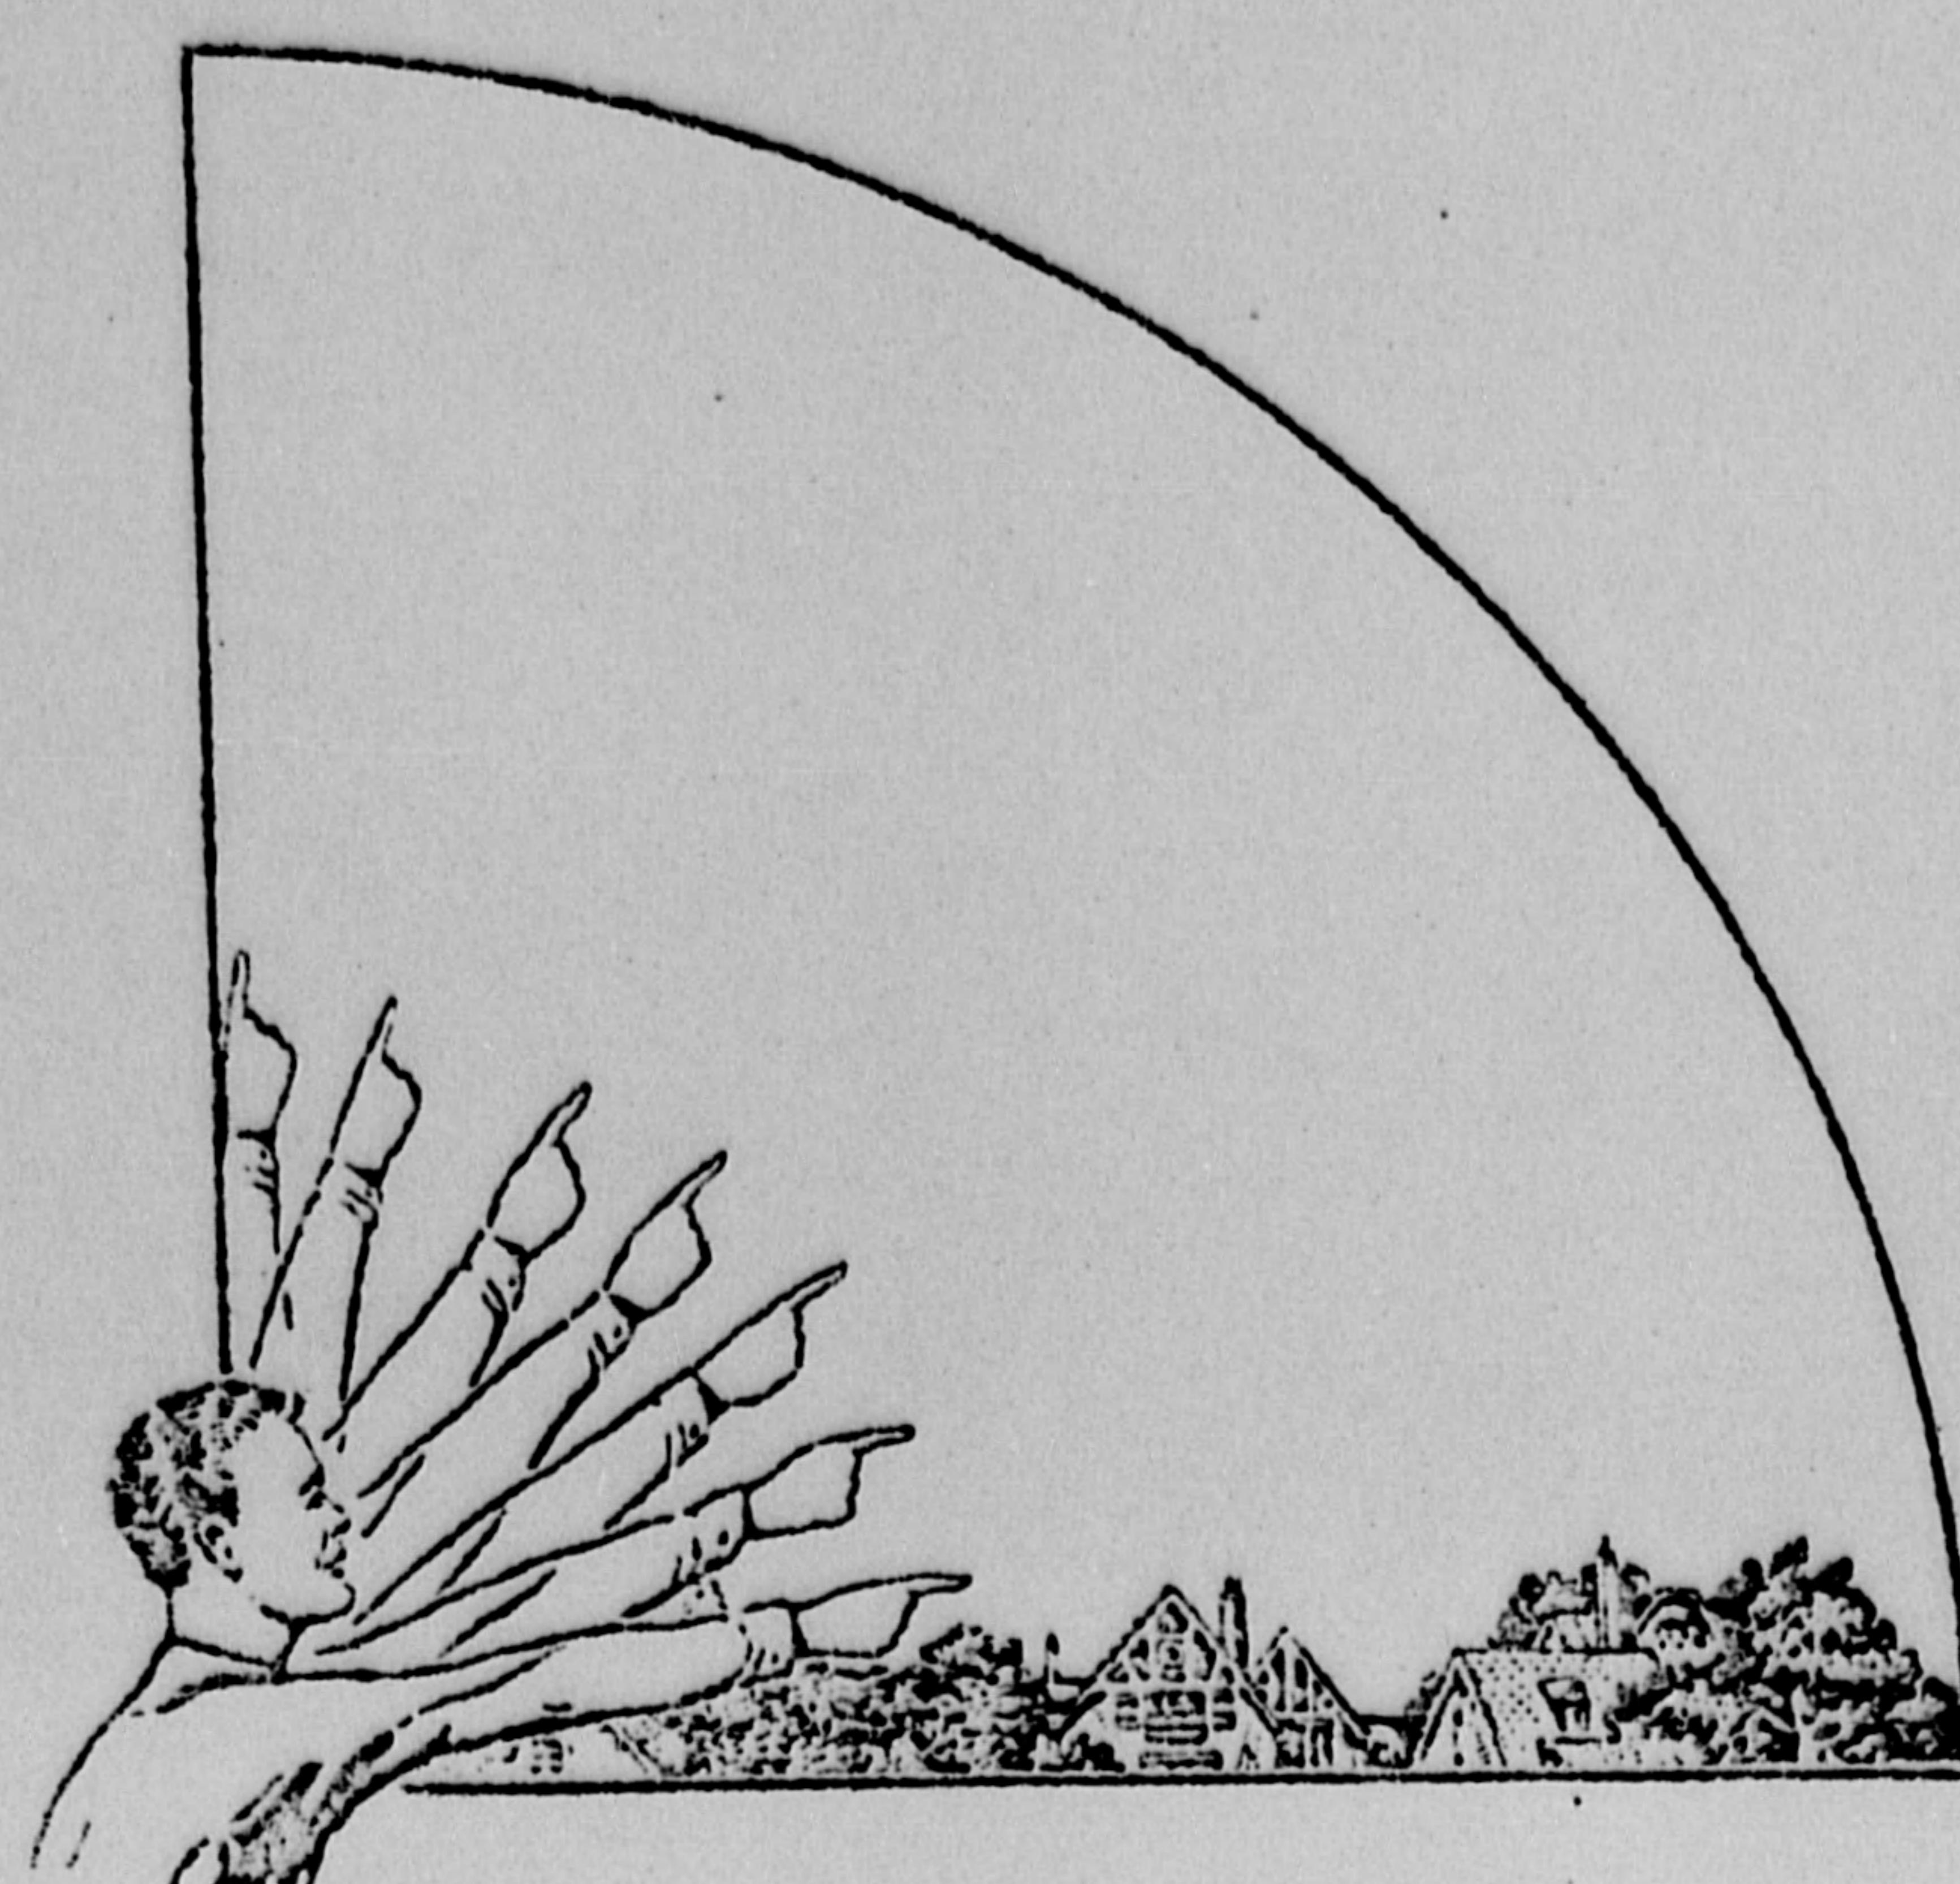

31.1 When it first appeared:

- a. From true North _____ degrees.
- b. From horizon 45 degrees.

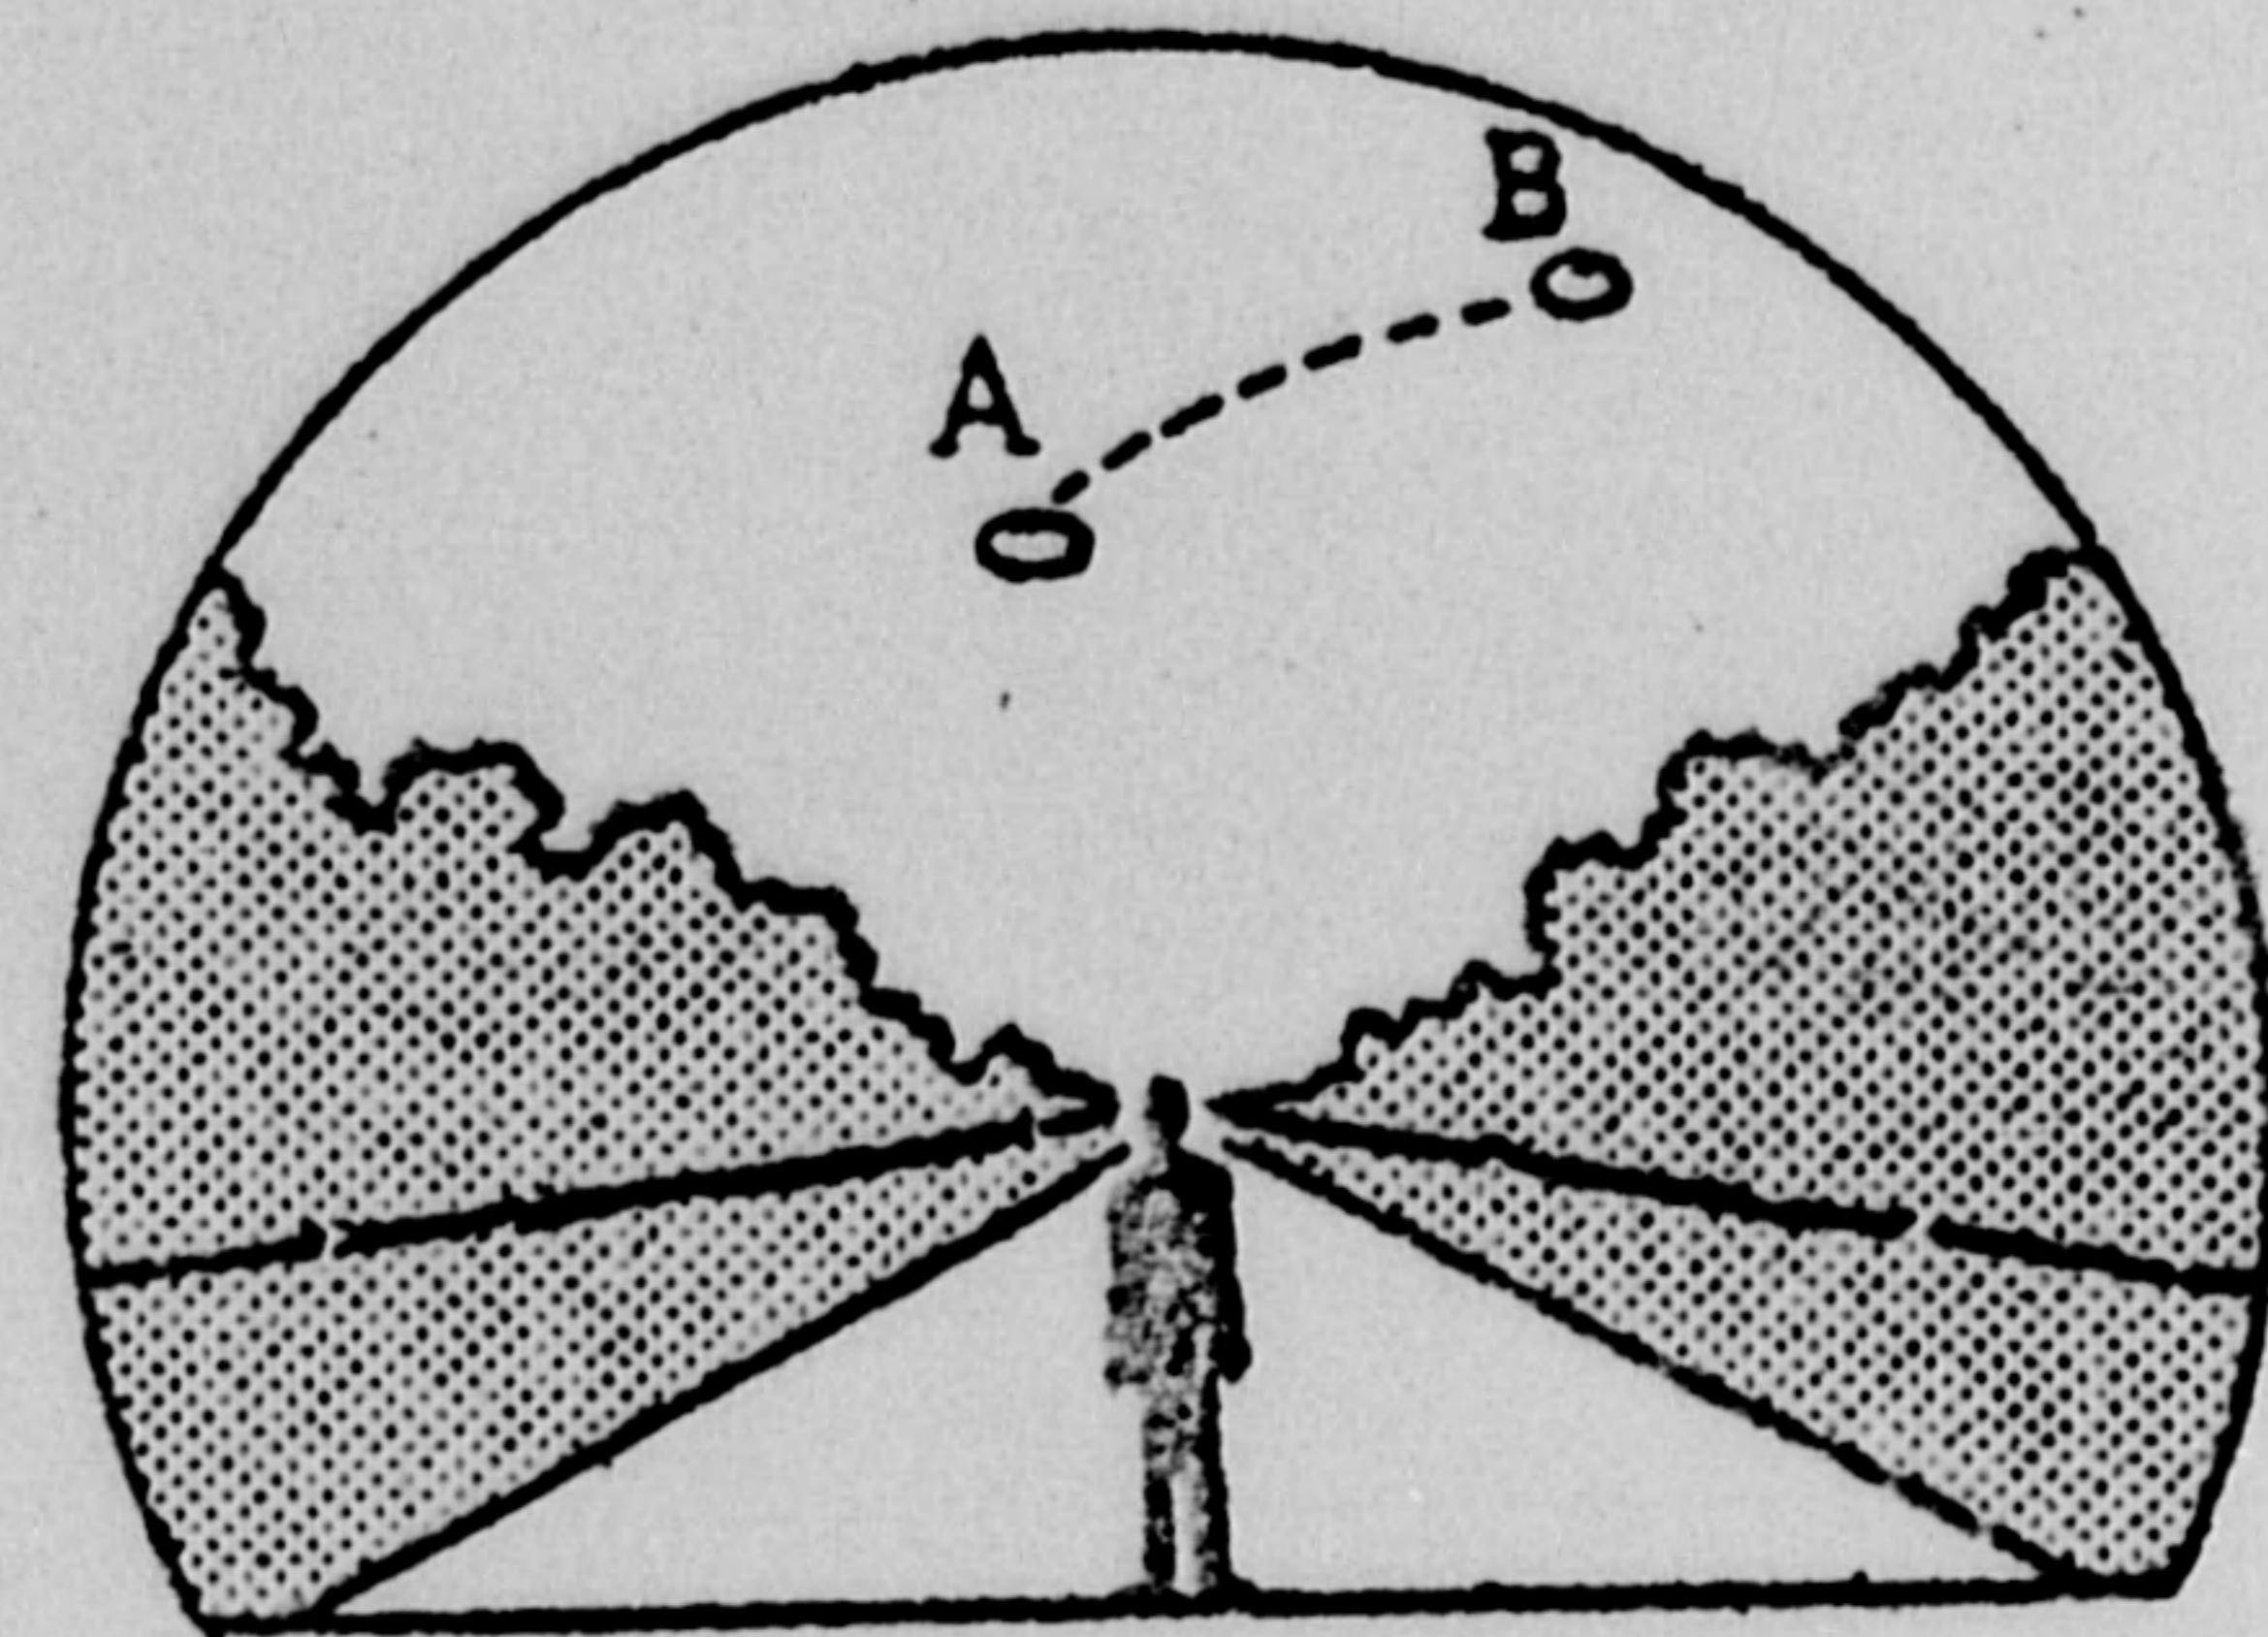

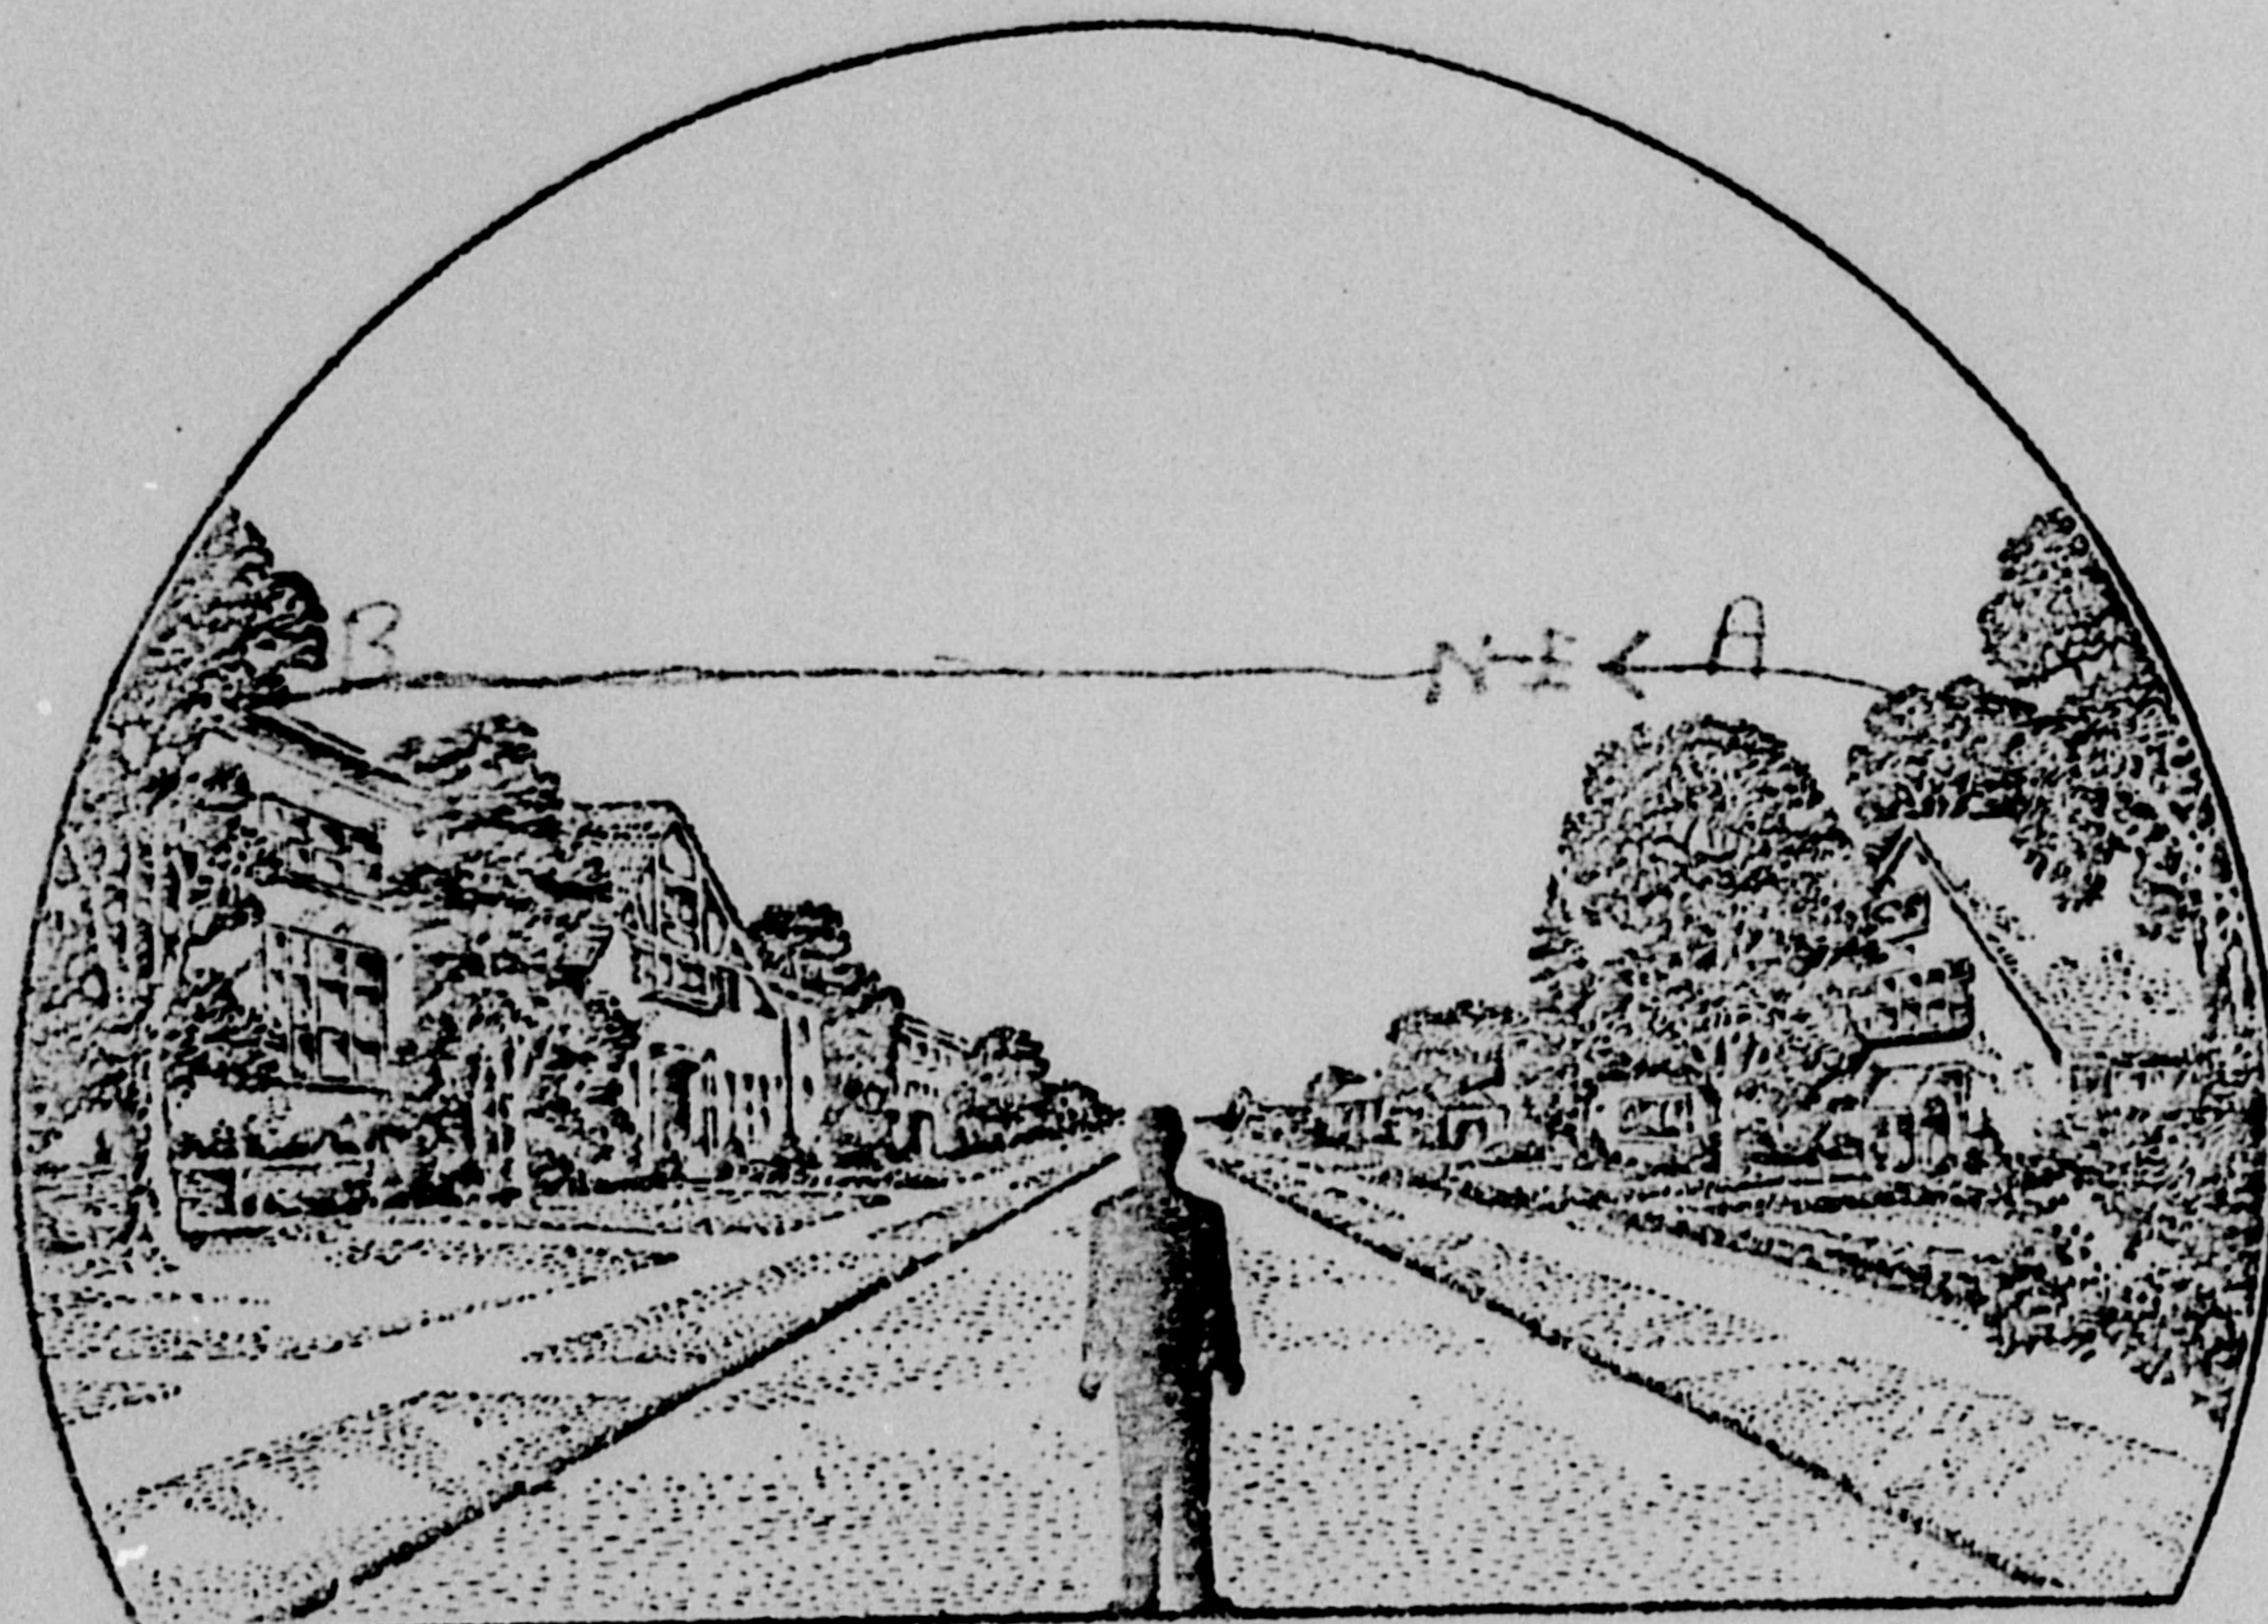

31.2 When it disappeared:

- a. From true North _____ degrees.
- b. From horizon 45 degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the *same* curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

35. When and to whom did you report that you had seen the object?

4

Month

Year

36. Was anyone else with you at the time you saw the object?

(Circle One) Yes No

36.1 IF you answered YES, did they see the object too?

(Circle One) Yes No

36.2 Please list their names and addresses:

27. Was this the first time that you had seen an object or objects like this?

(Circle One) Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

39. In your opinion what do you think the object was and what might have caused it?

In your opinion what do you think we should do?

39. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? about 100 miles per hour

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? about 1000 feet

41. Please give the following information about yourself:

NAME [REDACTED] First Name [REDACTED] Middle Name [REDACTED]

ADDRESS [REDACTED] City [REDACTED] Zone [REDACTED] State NY

TELEPHONE NUMBER [REDACTED]

Age 15 Sex Boy

Indicate any additional information about yourself, including any education, which might be pertinent.

I am in the eighth grade, but I have not
failed in any grade. The reason I am not
in my right grade is I have moved around
so much in my 20 plus years and I have
had to repeat for a year or two.

42. Date you completed this questionnaire:

17 Day 5 Month 61 Year

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? About 47,000 ft. P.H.

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? 3,900 Miles at first sighting.

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? _____ miles per hour.

None

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

None

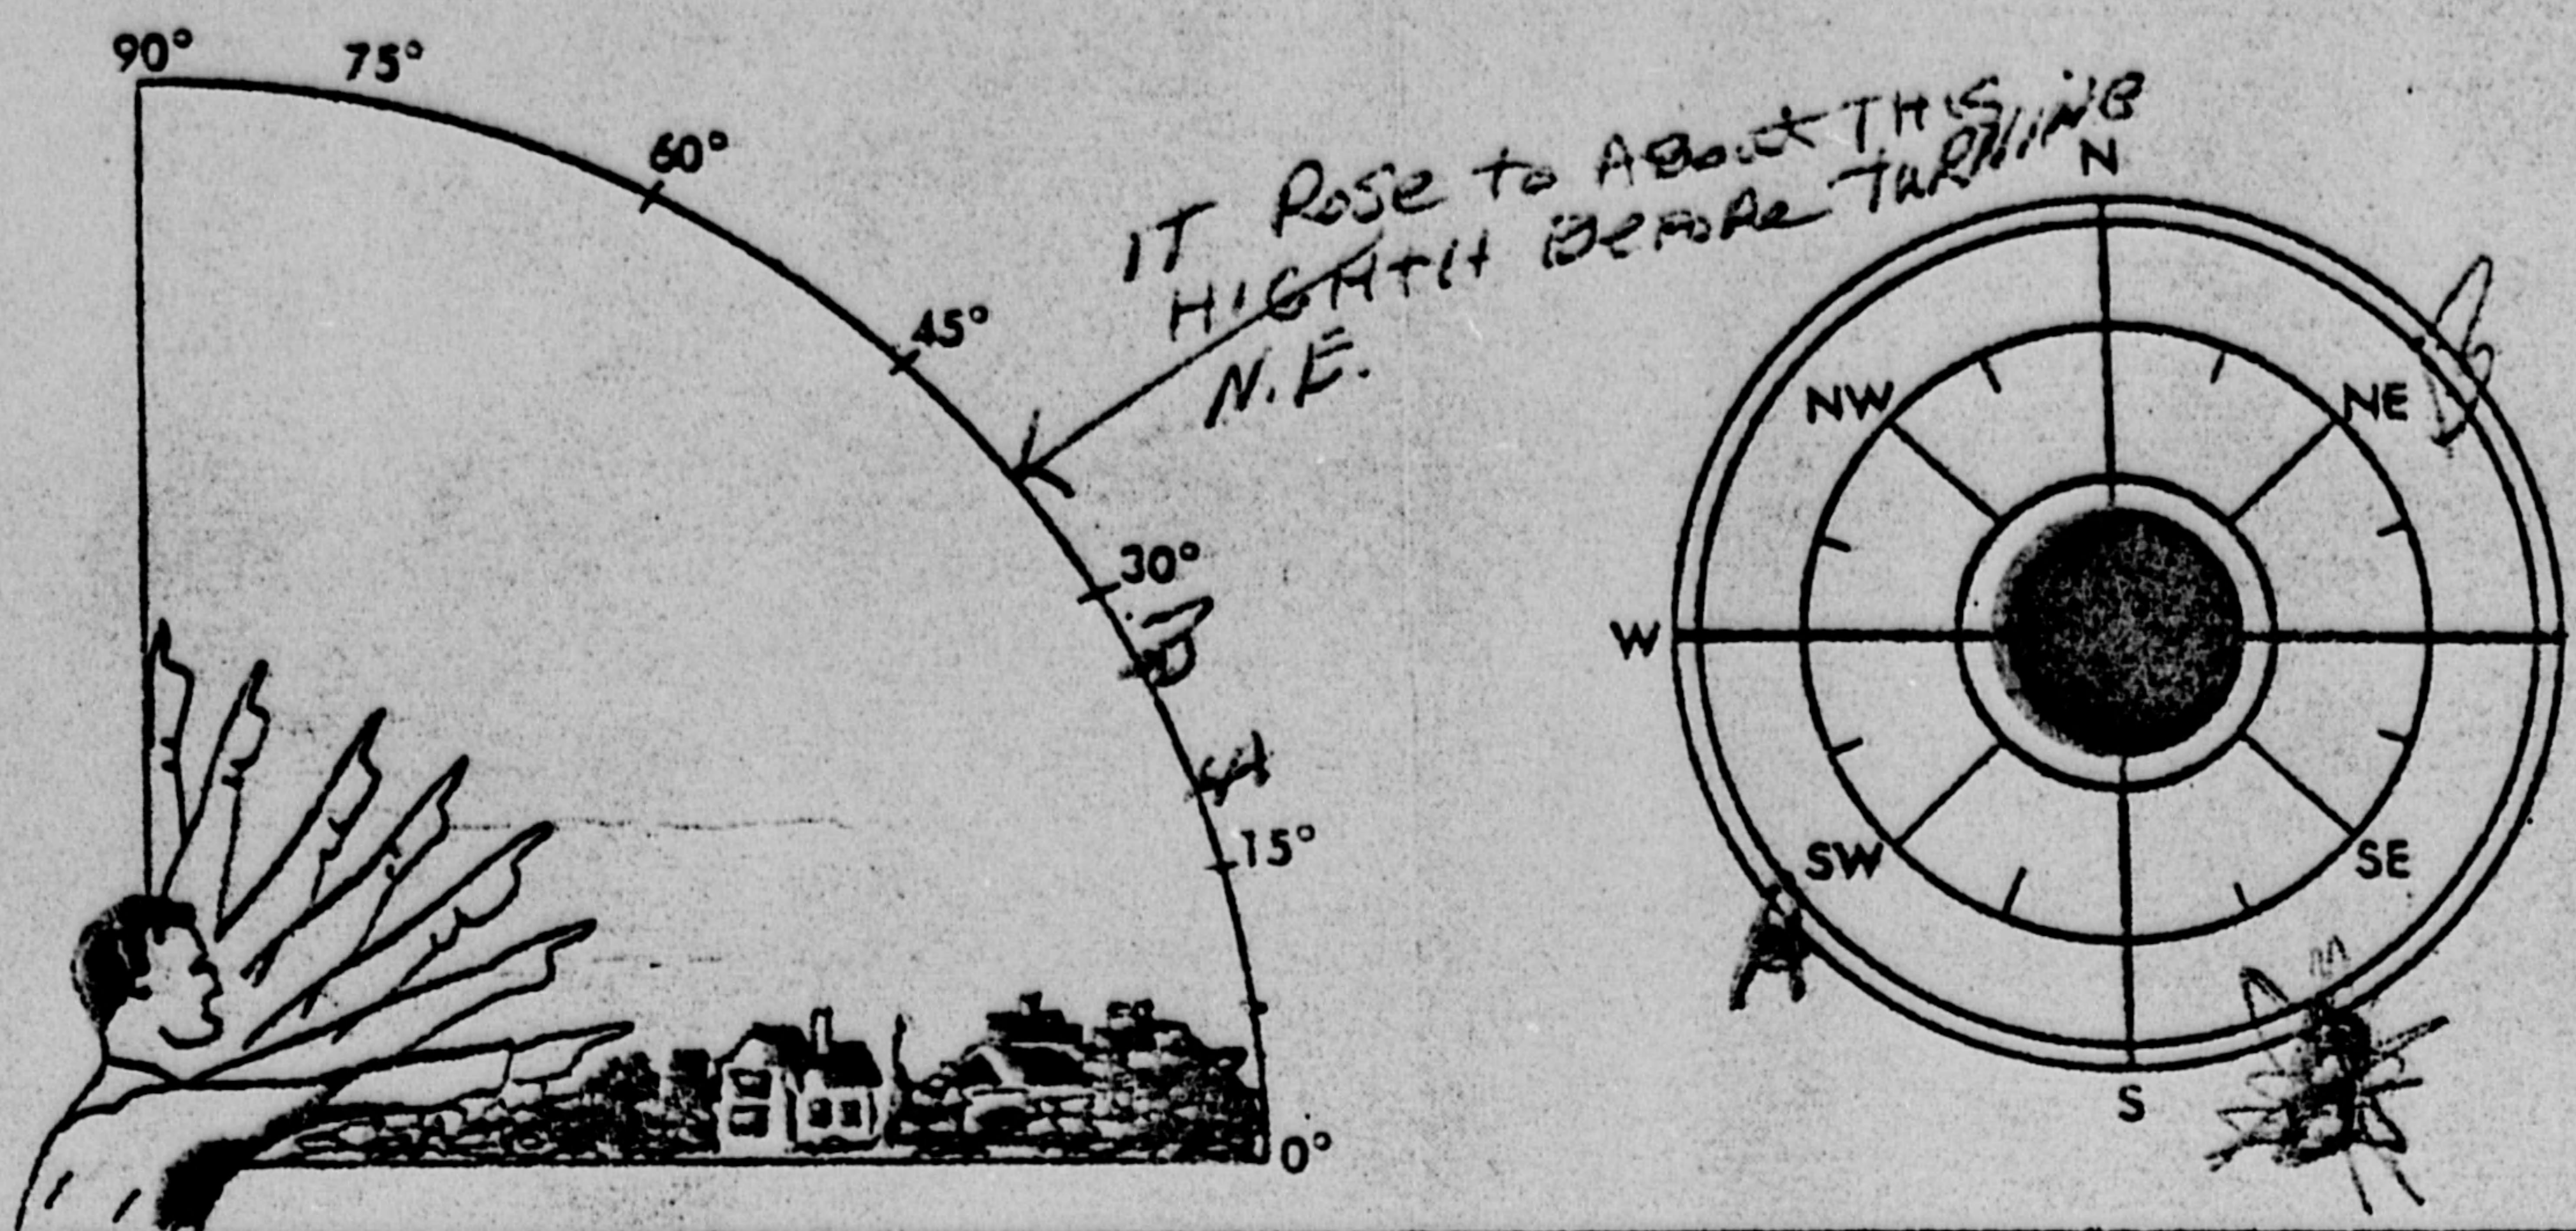

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A fire, egg shaped ball of fire that moves in different directions, then disappears over the N.E. horizon at great speed.

Official U.S. Air Force UFO form

Page 5

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass when you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. If there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The night I saw the U.F.O. I had just come out of the house about 50 minutes earlier. I have always been interested in science and astronomy. So I was looking at the stars when the object came up from the south heading north. It had a reddish-orange glow to it mixed with yellow

Page 8

Feb. 20, 1967

Dear Maj. Lumentilla and all concerned with
Project Blue Book:

My name is ~~██████████~~. I have seen only one U.F.O. In my life but hope that I see more so I myself can study them and satisfy myself to an extent where I will be satisfied that they do ~~██████████~~ and are not the so called ~~██████████~~ "natural phenomena" that they have thus far been labeled as.

At the time I sighted the U.F.O. I was living in Ashland, Ky. and 14 or 15 years old. It was August 4, 1961, and I just happened to be outside ~~██████████~~ because I could not sleep. I came outside about 6:15 or 12:30 A.M. and was looking at the stars. I had a watch and put the time down in a little book I called "Science Notes" because of what I saw. The time is exact eight to the minute because at that time I was very interested in science and math. Why I don't know. But I always liked it and I still do very much. About 1:05 to 1:08 A.M. E.S.T. there I sighted a reddish-orange glowing object at about 18° or 20° , or 10° to 12° above the horizon because of a range of hills just south of the house by 1 to $1\frac{1}{2}$ miles. It rose rapidly by inclination and degrees very fast. At about 85° to 87° it turned East and disappeared out of sight ~~██████████~~ because ~~at the~~ the roof of the house rose about 15 or 18 ft. above the ground. About 1:10 P.M. it reappeared coming from East to West at about 75° to 80° angle. After coming to within the original spot it had left, it turned North-North-East and disappeared at a great rate of speed. I would estimate its speed at possibly 5,800 to 6,000 M.P.H., and about ~~██████████~~ miles away when I first sighted it, at a height of about 200 to 250 miles.

I have drawn you a small conception of what I saw. The speed and miles may not be correct,

so you can figure those out for yourself. If there are 15 miles in a degree, the the figures are approx. correct. I just looked up the miles in one degree, so the figures are not correct. The distance ~~of~~ from me was approximately 3,900 miles South; The height was approx. 1,800 miles; speed approx. 47,000 M.P.H.

If you don't mind me telling you how to figure it out, it is this way. 1 DEGREE = over 60 miles
DISTANCE: 65° South: by subtracting the 20° angle I spotted it at from the 85° or 40° at which it turned East. 65° total traveled from first sighting
 $\frac{60 \text{ mile}}{1^\circ} = 1^\circ$
3,900 Miles South.

Height: Figure this by the picture enclosed by the height at its highest point in degrees multiplying it by 60 miles to one degree. 30° at highest point

$$\frac{60}{1^\circ} = 1,800 \text{ miles height}$$

SPEED: This refers to the distance traveled in 5 minutes or so. Five minutes = $\frac{1}{12}$ of 1 hour. Multiply 12 times 3,900 miles = About 47,000 M.P.H.

See if you don't get the same answers, if you will. Let me know your results as soon as you can, and please correct those figures if they are wrong. Thank you very much.

My ADDRESS IS:

MR. [REDACTED]

FB[REDACTED]

LOS ANGELES, CALIF.

Sincerely yours
