TO: SAFOI-3c (Major Coleman)

1. Reference the attached letter to the USAF from Mr. [REDACTED] of Pleasant Garden, North Carolina, reporting the sighting of an unidentified flying object.
2. Suggest you forward two (2) ATIC Forms 146 to Mr. [REDACTED] to be completed independently by him and his son and returned to the USAF.
3. It is suggested that you also request Mr. [REDACTED] to list the geographical coordinates of his location at the time of the sighting. As an alternative, if Mr. [REDACTED] does not understand the coordinate system, require him to list the direction and distance of Pleasant Garden from the nearest large city.

Gentlemen:

This may be a waste of time, nevertheless, I shall report what I have seen with the hopes that I may find a logical explanation.

Last evening, August 30, at a few minutes until nine o'clock P.M. I saw an orange light of about the intensity of the star, Polaris, almost due west of here at an elevation of twenty degrees above the horizon. Since I was on the look out for the passing of our satellite, Echo, I naturally observed whether or not I could detect any movement. There was, and I called my son who had left the room to check the time by the clock in my bedroom. Together we watched this light for a period of ten minutes or more follow a generally straight course, reaching an elevation of about thirty-five degrees in the southwest and fading out about due south thirty degrees above the horizon. Altogether it was in my view about twelve minutes by the clock. Its light was steady and its movements were interrupted by up and down gyrations, fast and slow forward progress, punctuated by stops or near stops as if it were a balloon tossed about by turbulent air currents. I could pass it off as a balloon if it had been earlier in the evening, but at that time of night approximately 8:58 to 9:11, it would have to have been an extremely high flying balloon to capture the light of the sun. Its irregular movements rule out the possibility of its being a plane, besides no motor noise was heard and the light was steady and of an orange glow. Its fading out at an elevation of thirty degrees does indicate that it passed into the earth's shadow. It was not Echo for its course was approximately at right angles to Echo's, and Echo has no noticeable variations of movement.

Your explanation will be appreciated by me, and I hope that this report may serve in some way to clear up the "alleged" mysteries of unidentified objects in the skies.

Sincerely yours,

[REDACTED]

OFFICE OF THE SECRETARY

Dear Mr. [REDACTED]

This is in reference to your letter of August 31st concerning the UFO sighting you witnessed.

I am enclosing our standard questionnaire. It would be appreciated if you would complete it and forward in the enclosed envelope. Be sure to include information whereby we can pinpoint your exact location at the time you witnessed the sighting. For instance, if you do not know your latitude and longitude, provide us the direction and distance of Pleasant Garden from nearest large city. I have enclosed a questionnaire for your son to complete also.

Your interest in this matter is appreciated.

Sincerely,

  
WILLIAM T. COLEMAN, JR.

## U.S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for further details.

**1. When did you see the object?**

Information supplied in letter of Aug. 31  
 Day 30 Month Aug Year 61

**2. Time of day:** before 9:30  
 Hour 9 Minutes 30  
 Info. supplied in letter of Aug. 31

Additional remarks: \_\_\_\_\_

**5. How long was object in sight?**

Information supplied in letter of Aug. 31  
 Hours 10 Minutes 0 Seconds 0

**5.1 How was time in sight determined?**

By electric clock in our home

a. Certain  
 b. Fairly certain

c. Not very sure  
 d. Just a guess

**6. What was the condition of the sky?**

**DAY**

a. Bright  
 b. Cloudy

**NIGHT**

a. Bright mostly a few thin  
 b. Cloudy scattered clouds

**7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?**

(Circle One):  
 a. In front of you  
 b. In back of you  
 c. To your right

d. To your left  
 e. Overhead  
 f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight — pitch dark
- d. Don't remember

9. The object appeared:

(Circle One):

- a. As a light
- b. Shiny
- c. Dark
- d. Don't remember

10. If it appeared as a light, was it brighter than the brightest stars?

26

11. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

16. Tell in a few words the following things about the object.

a. Sound None

b. Color about that of the planet, Mars

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

*Only in the form of light*

18. The edges of the object were:

(Circle One): a. Fuzzy or blurred  
b. Like a bright star  
c. Sharply outlined  
d. Don't remember

e. Other like an average star

19. IF there was MORE THAN ONE object, then how many were there? only one

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

B \_\_\_\_\_ A

(Appeared to start and stop at times, especially after making an up or down movement.)

21. How large did the object appear to you as compared to an object with which you are familiar?

about the size of the planet, Mars

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Would just about cover the object

23. Did the object disappear while you were watching it? If so, how?

Yes, gradually fading at about its highest elevation (could have gone behind one of the scattered thin clouds)

24. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

similar to satellite, Eclips, but not as bright

25. Where were you located when you saw the object? (Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other \_\_\_\_\_

26. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other Sparsely developed Village

27. What were you doing at the time you saw the object, and how did you happen to notice it?

Sitting on the west porch of my house watching for the passage of satellite, Echo

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest

28.2 How fast were you moving? \_\_\_\_\_ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

29. What direction were you looking when you first saw the object? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest
			i. Overhead

30. What direction were you looking when you last saw the object? (Circle One)

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest
			i. Overhead

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North (thru east) and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 90 degrees.
- b. From horizon 20-25 degrees.

31.2 When it disappeared:

- a. From true North 180 degrees.
- b. From horizon 25-30 degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it.

33. In the following larger sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One)

- a. Clear sky
- b. Hazy
- c. Scattered clouds (Very thin)
- d. Thick or heavy clouds

WEATHER (Circle One)

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

35. When and to whom did you report that you had seen the object?

31 Aug 1961 Dept of The Air Force  
Day Month Year

36. Was anyone else with you at the time you saw the object?

(Circle One)  Yes No

36.1 IF you answered YES, did they see the object too?

(Circle One)  Yes No

36.2 Please list their names and addresses:

[Redacted] (son)

Pleasant Garden, NC

37. Was this the first time that you had seen an object or objects like this?

(Circle One)  Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

This was the first time, but on the night of  
Sept. 3 or 4 I and my son, Dave, and I'd 13  
year old friend saw the same or a similar object before and after  
which remained in view more than 20 min. / Perhaps 25 9:15

38. In your opinion what do you think the object was and what might have caused it? Since reporting  
the first passage of the object and observing more closely  
the second passage, I can only believe that it was self  
illuminated since on the last night sighted it was kept  
in view until it was in the low horizon in the  
south-southeast, about 10° elevation. Since it forward droges  
was more or less silent and still it could not have been an  
ordinary plane, besides no motor noise occurred.

39. Do you think you can estimate the speed of the object?

(Circle One) Yes  No   
 much slower than a high flying jet and a lower  
 flying prop plane  
 IF you answered YES, then what speed would you estimate? \_\_\_\_\_

40. Do you think you can estimate how far away from you the object was?

(Circle One) Yes  No

IF you answered YES, then how far away would you say it was? \_\_\_\_\_

41. Please give the following information about yourself:

DATE Sept 25, 1961

Most of the pertinent information has been supplied in my letter of Aug. 31 and the questionnaire. Knowing that one's eyes sometime play tricks and that I could have been mistaken about the erratic behavior of the object I rested my face in my hands with my elbows firm upon my knees and watched closely the second passage of the object and its up and down start and stop (or near stop) it appears was unmistakably observed, especially when observed against a background of stars and using particular ones closest to the object as a stationary point of comparison. When in proximity of one particular star its movement slowed down and it more slowly returning to about its former elevation and seemed to prowl forward with a sudden burst of speed only to repeat these performances again and again. I have watched

it so many times and sometimes seem to see slight irregular movements but always I could trace this to slight movements of my head, body or eyes. However, I am satisfied beyond any doubt that

this is not so in the movement of the object of which I am reporting. On the second night of its passage my son and his friend called its irregular movements as I saw them a fraction of a second before they spoke.

I have no well founded opinion of what the object or objects may have been and if your department cannot give an opinion I would still appreciate your informing me as to whether or not a similar apparition has been reported.

Sincerely,

[REDACTED]

Pleasant Garden, the location of the sighting is located on NC #22 about 8 miles south of Greensboro, N.C.

When I was <sup>shown</sup> it, it seemed to be moving slower than Echo ~~Satellite~~ Satellite. The object appeared to be moving up and down as it moved Southwardly. It also appeared to stop and start, and speed up. It faded out the same way Echo does.

On the following Sunday we saw it again
