BRIEF SUMMARY OF SIGHTING:

1. CIEVIS Report A/C in flight Reported intense light SE at 2335Z 2. A/C over Puerto Rico Observed intense light NW of his position at 2338Z. At 2350 Ramey AFB Puerto Rico tower personnel spotted light to NW moving SSE. 3. Report from vessel at 32.6N 67.5W spotted globular object resembling cluster of flashing lights with trail of luminous haze in view for 3 minutes. 4. Report from San Juan of light moving Easterly very rapidly at 2340Z (received from A/C in flight). 5. At 2335Z Object observed by 12 men at sub base in Puerto Rico. Object described as a group of "L" shaped lights. Object had two lights flashing and a halo type cloud encircled the object at all times. Faded at 2342Z 6. 200-2 Report from A/C pilot over South Carolina enroute to Tyndall of object that resembled a comet or flounder shaped cloud. Halo present. Normal contrail. At twilight from 2330Z for 5 minutes.

EVALUATION: CASE CATEGORY: Other (Missile)

CONCLUSION: Confirmed test AFMTC 119/1

REPLY TO
ATTN OF: ABDO

8 FEB 1962

SUBJECT: Report on Unidentified Flying Object

TO: Aerospace Technical Intelligence Center (AFCIN) 4E2X
Wright-Patterson AFB, Ohio

In accordance with AFR 200-2, paragraph 15, dated 14 September 1959, the attached Flying Object Report and sketch are submitted.

FOR THE COMMANDER

ROBERT E. COLE
Captain, USAF
Associate Administrative Officer

1 Atch
UFO Report w/3 atch

Report on Unidentified Flying Object (UFO)

1. Description of the Object:

- a. Shape - Resembled a comet
- b. Size - Appeared the size of a bright star
- c. Color - bright white
- d. Number - 1
- e. Formation - N/A

f. Tail or Trail - Streaming very similar to a comet at the vicinity of the object; however, the trail fanned out rapidly behind the object into what looked like a very large flounder shaped ice cloud which narrowed again into a normal contrail some distance behind at a lower altitude.

g. Unusual Features - Within the large flounder shaped cloud there appeared a point of light which grew in intensity until it became very bright with a large halo about it. It then decreased in intensity, but the halo persisted for approximately five minutes.

2. Description of Course of Object:

a. When first noticed, the object was a normal looking contrail, level with me at my 1100 position coming toward me. I was at 36,000 ft, heading 240° MC.

b. Angle or Elevation of the Object. The object seemed to be climbing, its maximum elevation was reached when it was in my 0900 position in the direction of Richmond, Va. I would estimate it to have been 20° above the horizon at this point. It then gave the impression of a turn to a more easterly heading so that it was continuing to climb directly away from me.

c. Manner of Observation - Visual while airborne from B-57E, 55-4256, 36,000 ft, MSL, 240° MC, 420 KTAS from Stewart AFB, N. Y.

d. Time and date of sighting.

(1) 1/29/2330Z

(2) Light conditions - twilight.

e. Location of Observer - On a course between Baltimore TACAN and Gordonsville TACAN 70 NM from Gordonsville; observed for a period of 10 minutes.

f. Identifying information on observer - Military, Ronald L. Widner, Captain USAF, 4713th Def Sys Eval Sqdn, Pilot. ✓

g. Weather and Winds -

(1) CAVU, winds 290°/100K

(2) No significant weather activity or cloud cover in the area.

Allan E. Aaronson

ALLAN E. AARONSON
Captain, USAF

Tyndall AFB, Florida

3 Atch

1. Statement (Capt R. L. Widner)
2. Sketch of UFO
3. Sketch of UFO

Know Base JFB 11/11/74

S T A T E M E N T

At ²³³⁰~~0030~~Z, between Baltimore and Spartansburg, I observed a contrail apparently at my level on a reciprocal heading. It seemed to climb leaving a very large pattern of what looked like the formation of a cirrus cloud. As it approached my 1030 position, I would see a very bright object resembling very much the appearance of a comet streaming this odd shaped cloud. By ~~20~~40Z it had reached my 0900 position and was very high (my altitude was 36,000 ft). It then headed more in an easterly direction and became difficult to see in the rapidly fading twilight. I was flying a B-57E enroute to Tyndall AFB from Stewart AFB.

R. L. WIDNER
Captain, USAF
