10. BRIEF SUMMARY OF SIGHTING Observer looking at moon thru BX & saw obj passing at high alt. Looked like a jet except that it was going twice as fast as the witness believed a jet would fly. No visible markings. Gave appearance of having delta wings. Moving in a Northern direction at 85 degree angle.		11. COMMENTS Observer indicated possibility of jet however no duration of sighting was rptd. While there was no mention of tail or burning there is also the possibility of a meteor observation. Obj sighted in Feb & rptd in Mar. Received for analysis at FTD in May & no attempt for added info. No threat to security of U.S. Case listed as insufficient data.

Dear Sirs:

I would like to inform you of what I saw on the date of Feb. 12, 1962. I was looking at the moon at approximately 4:17 P.M. with binoculars. When I saw a strange object flying between me and the moon. It was flying at a high altitude at a northern direction at a 85 degree angle. It was flying over Rolesville, N.C. near Raleigh.

It looked something like a jet but it was going so fast I could hardly keep up with it. It was going twice as fast as any of our jet that I have seen. If it was a jet it was very small one and it had no visible markings. Will you please reply this letter because I am very curious.

It looked something like this.

Sincerely yours,

P.S.

If you do not take letters like this send it to someone who does. Thankyou.
