35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

After the flying object had ascended it floated or sailed much faster than it had when first sighted. My daughter and I seem to agree that in hovering almost to a stand still that this vapor like object had lost its strength and was either seeking energy or trying to generate some; and as soon as it had gained more power from what, we do not know, then it was able to ascend and speed up. In all other accounts where people were chased there seem to be metal (as with a car). Perhaps this object needed such an attraction this particular night to gain the desired height and speed. It could not have been seen by anybody other than persons living along our alley until it received this sudden boost which allowed it to rise above the third floor level, after it left our alley. When I looked at the clock (after the object was out of sight it was 9:40) five minutes had passed. I then decided to see if

this vapor had caused a reaction on the surrounding things. When I looked at the moon which was bright and full that night I didn't see a moon but a beautiful ornate cross with a trail of light extending downward. There was a blaze of light behind it, but no moon.

Ex

The lines of the cross were prominent, the light was behind the cross and it was bright yellow. This lasted a while and then disappeared. The moon was seen again but it seemed to be transparent and a much paler yellow than before. It didn't effect the stars. It was about a half hour later

before we saw any airplanes and they were flying very high and at a distance. The nearby fields reported no airplanes enroute at the time we called about the mysterious vapor.
