5. PHOTOS ☐ Yes ☒ No		6. SOURCE Military			
7. LENGTH OF OBSERVATION 1 minute 30 seconds		8. NUMBER OF OBJECTS one		9. COURSE SE	
10. BRIEF SUMMARY OF SIGHTING Round white pea sized body observed at 35 dgr elevation 260 dgr azimuth. Moving at high speed & disappearing after 1 minute 30 second flight at 20 dgr elevation 190 dgr azimuth. Maximum elevation at initial sighting.				11. COMMENTS Possible satellite observation; however, speed indicated by duration of sighting would appear high. Also possible a/c sighting as speed indicated by duration is within normal operational area of both jet and conventional a/c depending upon the distance of the object. Case considered as insufficient data.

10. BRIEF SUMMARY OF SIGHTING Round, white-blue-amber obj viewed fm dark to daylight observed at 30 dgr elevation moving to 90 dgr & becoming stationary. Rpt fm civilian caused witness to look out window & observe obj.				11. COMMENTS Initial sighting of star at 30 dgr. Star Betelgeux. Rigel is on horizon at this time. Pollux at 55 dgr elevation & all have az of about 260 dgrs. At 20 dgr ele. Regulus is at 70 dgr ele but to the South. It is the only 1st mag obj at the coming of daylight that would appear to be overhead. Case listed as misinterpretation of astro-bodies. Rising attributes to refraction of Rigel & transference of identification to Regulus or other star.
