7. LENGTH OF OBSERVATION 2 minutes	8. NUMBER OF OBJECTS one	9. COURSE north	
10. BRIEF SUMMARY OF SIGHTING Circular object appearing like a bright star noticed to move against the star background. Light alternating as bright white and dull red. As obj approached vertical long trail was noted, of yellow white color. Extending at least two feet behind obj. Initial observation at 20 dgr elevation in south. Object moved to north and made smooth sweeping turn to west and back to north. Disappearance below horizon.		11. COMMENTS Duration, description, of object and maneuvers consistent with a/c analysis. Trail considered as normal for a/c contrails at altitude. Maneuverability & duration as well as alternating light rules out meteor sighting. As suggested in report. Case evaluated as a/c sighting.
