Office of the Secretary,
The Pentagon.

Dear [REDACTED]

Enclosed are the completed forms we spoke of on
the telephone April 19.

I would like to do a story on Project Blue Book
in general, pegging it, if possible, to an evaluation of the two
sightings made by me and my wife. This would add some personal color
to the thing and perhaps make it more interesting to my readers.

Thanks very much for your help. I'll look forward
to hearing from you when you have some information on the enclosed.

Yours truly,

Peter Trueman.
Washington Correspondent.

^(on reporting)
Time lapse ~~not~~ important, because on this occasion I took notes as to color, size and degrees off horizon and course etc...

We had no way of estimating actual altitude or speed, of course, but we had an impression that it was very high and moving very quickly. I think we felt this because had it been an airplane, moving across the horizon that quickly, its light that bright, we'd have heard the engines.

My wife noted at the time that if it had been an airplane "we'd have seen lights blinking". She confirmed my impression that it looked just like a Star "except it was obviously not a shooting star".

Elapsed time of passage - we disagreed. I thought it was something like 3 minutes. My wife thought between 1 and 2. I didn't think to look at my watch until after we'd been looking at it for a while.

I suppose it might have been a satellite
