Andes Mts, Argentina

Andes (Mendoza Area)

Between June 18 and 24, a large party of scientists, meteorologists and Argentine Army engineers were up on the Andes studying the Zodiacal Light. On several of the nights they saw great red lights which moved up and down and to and fro on the sheer rock faces of the Cordillera, in the vicinity of the famous gigantic statue of Christ the Redeemer, and near the Santa Eléna Peak. Huddled in their mountain huts, the party also heard strange "metallic noises" outside, and there was much uneasy talk among the troops of flying saucers.

The whole area being uninhabited and all the climbing routes being blocked at the time by very heavy snowfalls, it was agreed by all concerned that "absolutely no explanation could be found". The report of this affair is also given by CODOVNI, who add that personnel of the Argentine and Chilean meteorological services who have to do duty on these lonely Andean heights confirm that they have frequently seen the mysterious moving lights.

A large object which seemed "as large as an orange" was seen by Mr & Mrs Marvin Hall. Mr Hall described the object as of a bright white color with variations of red and brown. It was round, with two extension lights revolving about the central body. "It bobbed like a buoy in the water", explained the husband. The object moved W to NW and was last seen fading in intensity as it disappeared behind trees..... No sound, trail, exhaust, etc.

26 June 1963
Rockland, Mass.

Another June 26 sighting was made by Mr. and Mrs. Richard Tonsberg of Rockland, Mass. They were sitting outside their home along with Mrs. Tonsberg's brother-in-law William Henderson. They saw a lighted object with the same exact colors and light relationship but flying much higher. They heard no sound. All three reported the object traced a zig-zag path, making a series of sharp 90-degree turns without pausing in its flight. The glow the object emitted was orange and white. Mr. Henderson reported the object's flight path was sharp and irregular as in the photograph taken in Wollaston about 1:30 on the 25th or 26th. He said it appeared to be heading northwest, but repeatedly doubled back and forth over its path. "All three of use watched it for about five minutes," Henderson said, "and the main reason we did so was the large number of almost-perfect right angles taken by whatever it was." The trio first saw it when a commercial airliner bound for Logan Airport passed over their house. When the plane had passed, all three saw the orange-white light source "much higher than the airplane, tracing this zig-zag pattern."
